THE ASTROPHYSICAL JOURNAL

AUTHOR INDEX

PARTS 1 & 2, VOLUMES 528 –530

2000 JANUARY 1 TO FEBRUARY 20

ADELBERGER, KURT L. The Ultraviolet Spectrum of MS 1512−cB58: An Insight into Lyman-Break Galaxies. *Max Pettini, Charles C. Steidel, Kurt L. Adelberger, Mark Dickinson, & Mauro Giavalisco.* 528, 96 (2000)

AGOL, ERIC. Magnetic Stress at the Marginally Stable Orbit: Altered Disk Structure, Radiation, and Black Hole Spin Evolution. *Eric Agol & Julian H. Krolik.* 528, 161 (2000)

Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)

AGUIRRE, ANTHONY N. On the Superradiance of Spin-1 Waves in an Equatorial Wedge around a Kerr Hole. *Anthony N. Aguirre.* 529, L9 (2000)

AHN, SANG-HYEON. Environment of the Gamma-Ray Burst GRB 971214: A Giant H II Region Surrounded by a Galactic Supershell. *Sang-Hyeon Ahn.* 530, L9 (2000)

AIRAPETIAN, V. S. Winds from Luminous Late-Type Stars. I. The Effects of Nonlinear Alfvén Waves. *V. S. Airapetian, L. Ofman, R. D. Robinson, K. Carpenter, & J. Davila.* 528, 965 (2000)

AJHAR, EDWARD A. See KELSON, DANIEL D., et al. The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVII. A Derivation of the Hubble Constant Using the Fundamental Plane and D_n-σ Relations in Leo I, Virgo, and Fornax.

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

ALARD, C. The Optical Gravitational Lensing Experiment Monitoring of QSO 2237+0305. *P. R. Woźniak, C. Alard, A. Udalski, M. Szymański, M. Kubiak, G. Pietrzyński, & K. Zebruń.* 529, 88 (2000)

ALEXANDER, T. See LUTZ, D., et al. A Search for Broad Infrared Recombination Lines in NGC 1068.

ALLENDE PRIETO, CARLOS. Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

ALLOIN, DANIELLE. New CO and Millimeter Continuum Observations of the $z = 2.394$ Radio Galaxy 53W002. *Danielle Alloin, Richard Barvainis, & Stephane Guilloteau.* 528, L81 (2000)

ALONSO-HERRERO, ALMUDENA. The Nature of LINERs. *Almudena Alonso-Herrero, Marcia J. Rieke, George H. Rieke, & Joseph C. Shields.* 530, 688 (2000)

ALOY, MIGUEL-ANGEL. Radio Emission from Three-dimensional Relativistic Hydrodynamic Jets: Observational Evidence of Jet Stratification. *Miguel-Angel Aloy, José-Luis Gómez, José-María Ibáñez, José-María Martí, & Ewald Müller.* 528, L85 (2000)

AMARI, T. A Twisted Flux Rope Model for Coronal Mass Ejections and Two-Ribbon Flares. *T. Amari, J. F. Luciani, Z. Mikic, & J. Linker.* 529, L49 (2000)

ANDERSON, SCOTT F. Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)

ANDO, M. See HURLEY, K., et al. *ASCA* Observations of the Quiescent X-Ray Counterpart to SGR 1627−41.

ANTOKHIN, IGOR I. Light Curve Solution of HD 93205 (O3 V + O8 V) Containing the Earliest Known Star in a Well-studied Binary. *Eleonora A. Antokhina, Anthony F. J. Moffat, Igor I. Antokhin, Jean-François Bertrand, & Robert Lamontagne.* 529, 463 (2000)

ANTOKHINA, ELEONORA A. Light Curve Solution of HD 93205 (O3 V + O8 V) Containing the Earliest Known Star in a Well-studied Binary. *Eleonora A. Antokhina, Anthony F. J. Moffat, Igor I. Antokhin, Jean-François Bertrand, & Robert Lamontagne.* 529, 463 (2000)

ANTONUCCI, E. See CIARAVELLA, A., et al. *Solar and Heliospheric Observatory* Observations of a Helical Coronal Mass Ejection.

APPONI, A. J. Laboratory Detection of Four New Cumulene Carbenes: H_2C_7, H_2C_8, H_2C_9, and D_2C_{10}. *A. J. Apponi, M. C. McCarthy, C. A. Gottlieb, & P. Thaddeus.* 530, 357 (2000)

ARAGÓN-SALAMANCA, ALFONSO. A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

ARIKAWA, YUJI. See IKEDA, MASAFUMI, et al. Large-Scale Mapping Observations of the C I ($^3P_1$–$^3P_0$) and CO (J = 3–2) Lines toward the Orion A Molecular Cloud.

ARIMOTO, NOBUO. A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

ARNETT, D. Two-dimensional versus Three-dimensional Supernova Hydrodynamic Instability Growth. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazán, E. Müller, B. A. Fryxell, & R. Teyssier.* 528, 989 (2000)

ARONS, JONATHAN. Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

ARTZNER, G. In-Flight Determination of the Plate Scale of the Extreme-Ultraviolet Imaging Telescope. *F. Auchére, C. E. DeForest, & G. Artzner.* 529, L115 (2000)

ASIDA, S. M. Calibrating the Mixing-Length Parameter for a Red Giant Envelope. *S. M. Asida.* 528, 896 (2000)

ASO, YOSHIYUKI. See IKEDA, MASAFUMI, et al. Large-Scale Mapping Observations of the C I ($^3P_1$–$^3P_0$) and CO (J = 3–2) Lines toward the Orion A Molecular Cloud.

ATRIO-BARANDELA, F. On the Number Density of Sunyaev-Zeldovich Clusters of Galaxies. *C. Hernández-Monteagudo & F. Atrio-Barandela.* 528, L69 (2000)

AUCHÉRE, F. In-Flight Determination of the Plate Scale of the Extreme-Ultraviolet Imaging Telescope. *F. Auchére, C. E. DeForest, & G. Artzner.* 529, L115 (2000)

AURASS, H. On the Solar Origin of Complex Type III–like Radio Bursts Observed at and below 1 MHz. *M. J. Reiner, M. Karlický, K. Jiřička, H. Aurass, G. Mann, & M. L. Kaiser.* 530, 1049 (2000)

AVILÉS, ROBERTO. See CLOCCHIATI, ALEJANDRO, et al. The Luminous Type Ic Supernova 1992ar at z = 0.145.

AWAKI, H. See LUTZ, D., et al. A Search for Broad Infrared Recombination Lines in NGC 1068.

AXON, DAVID. Unveiling the Active Nucleus of Centaurus A. *Alessandro Marconi, Ethan J. Schreier, Anton Koekemoer, Alessandro Capetti, David Axon, Duccio Macchetto, & Nicola Caon.* 528, 276 (2000)

BAHCALL, JOHN N. How Much Do Helioseismological Inferences Depend on the Assumed Reference Model? *Sarbani Basu, M. H. Pinsonneault, & John N. Bahcall.* 529, 1084 (2000)

BAILES, M. High-Energy Gamma-Ray Observations of Two Young, Energetic Radio Pulsars. *V. M. Kaspi, J. R. Lackey, J. Mattox, R. N. Manchester, & M. Bailes.* 528, 445 (2000)

BALACHANDRAN, SUCHITRA C. The First Stellar Abundance Measurements in the Galactic Center: The M Supergiant IRS 7. *John S. Carr, K. Sellgren, & Suchitra C. Balachandran.* 530, 307 (2000)

BALL, C. D. Laboratory Detection of a Molecular Band at λ4429. *C. D. Ball, M. C. McCarthy, & P. Thaddeus.* 529, L61 (2000)

BALLY, JOHN. A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

BALTZ, EDWARD A. Event Rate and Einstein Time Evaluation in Pixel Microlensing. *Edward A. Baltz & Joseph Silk.* 530, 578 (2000)

BARING, MATTHEW G. Inverse Bremsstrahlung in Shocked Astrophysical Plasmas. *Matthew G. Baring, Frank C. Jones, & Donald C. Ellison.* 528, 775 (2000)

BARON, E. Metallicity Effects in Non-LTE Model Atmospheres of Type Ia Supernovae. *Eric J. Lentz, E. Baron, David Branch, Peter H. Hauschildt, & Peter E. Nugent.* 530, 966 (2000)

BARTON, ELIZABETH J. Tidally Triggered Star Formation in Close Pairs of Galaxies. *Elizabeth J. Barton, Margaret J. Geller, & Scott J. Kenyon.* 530, 660 (2000)

BARVAINIS, RICHARD. New CO and Millimeter Continuum Observations of the $z = 2.394$ Radio Galaxy 53W002. *Danielle Alloin, Richard Barvainis, & Stephane Guilloteau.* 528, L81 (2000)

BASTIEN, PIERRE. Magnetic Orientations and Energetics in Interstellar Clumps within Small Clouds. *Jacques P. Vallée & Pierre Bastien.* 530, 806 (2000)

BASU, SARBANI. How Much Do Helioseismological Inferences Depend on the Assumed Reference Model? *Sarbani Basu, M. H. Pinsonneault, & John N. Bahcall.* 529, 1084 (2000)

BASU, SHANTANU. Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

BAUER, FRANZ. X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

BAUMGARTE, THOMAS W. On the Maximum Mass of Differentially Rotating Neutron Stars. *Thomas W. Baumgarte, Stuart L. Shapiro, & Masaru Shibata.* 528, L29 (2000)

BAUTISTA, MANUEL. Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

BAUTZ, M. See HARRIS, D. E., et al. *Chandra* X-Ray Detection of the Radio Hot Spots of 3C 295.

BAZÁN, G. Two-dimensional versus Three-dimensional Supernova Hydrodynamic Instability Growth. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazán, E. Müller, B. A. Fryxell, & R. Teyssier.* 528, 989 (2000)

BEASLEY, ANTHONY J. VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)

BECKMAN, J. E. Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

BEERS, TIMOTHY C. Primordial Lithium and Big Bang Nucleosynthesis. *Sean G. Ryan, Timothy C. Beers, Keith A. Olive, Brian D. Fields, & John E. Norris.* 530, L57 (2000)

BEGELMAN, MITCHELL C. The Evolutionary Status of SS 433. *Andrew R. King, Ronald E. Taam, & Mitchell C. Begelman.* 530, L25 (2000)

BEHR, BRADFORD B. A New Spin on the Problem of Horizontal-Branch Gaps: Stellar Rotation along the Blue Horizonal Branch of Globular Cluster M13. *Bradford B. Behr, S. G. Djorgovski, Judith G. Cohen, James K. McCarthy, Patrick Côté, Giampaolo Piotto, & Manuela Zoccali.* 528, 849 (2000)

BELL, J. F. The Temperature and Cooling Age of the White Dwarf Companion to the Millisecond Pulsar PSR B1855+09. *M. H. van Kerkwijk, J. F. Bell, V. M. Kaspi, & S. R. Kulkarni.* 530, L37 (2000)

BENZ, WILLY. Dynamics of Circumstellar Disks. II. Heating and Cooling. *Andrew F. Nelson, Willy Benz, & Tamara V. Ruzmaikina.* 529, 357 (2000)

BERLIND, ANDREAS A. Locally Biased Galaxy Formation and Large-Scale Structure. *Vijay K. Narayanan, Andreas A. Berlind, & David H. Weinberg.* 528, 1 (2000)

Topology from the Simulated Sloan Digital Sky Survey. *Wesley N. Colley, J. Richard Gott III, David H. Weinberg, Changbom Park, & Andreas A. Berlind.* 529, 795 (2000)

BERNATH, PETER F. See ZOBOV, NIKOLAI F., et al. Using Laboratory Spectroscopy to Identify Lines in the *K*- and *L*-Band Spectrum of Water in a Sunspot.

BERSHADY, MATTHEW A. The Asymmetry of Galaxies: Physical Morphology for Nearby and High-Redshift Galaxies. *Christopher J. Conselice, Matthew A. Bershady, & Anna Jangren.* 529, 886 (2000)

BERTELLO, L. Random-Lag Singular Cross-Spectrum Analysis. *F. Varadi, R. K. Ulrich, L. Bertello, & C. J. Henney.* 528, L53 (2000)

BERTRAND, JEAN-FRANÇOIS. Light Curve Solution of HD 93205 (O3 V + O8 V) Containing the Earliest Known Star in a Well-studied Binary. *Eleonora A. Antokhina, Anthony F. J. Moffat, Igor I. Antokhin, Jean-François Bertrand, & Robert Lamontagne.* 529, 463 (2000)

BHARADWAJ, SOMNATH. Evidence for Filamentarity in the Las Campanas Redshift Survey. *Somnath Bharadwaj, Varun Sahni, B. S. Sathyaprakash, Sergei F. Shandarin, & Capp Yess.* 528, 21 (2000)

BILDSTEN, LARS. Viscous Boundary-Layer Dumping of *r*-Modes in Neutron Stars. *Lars Bildsten & Greg Ushomirsky.* 529, L33 (2000)

A Method for Distinguishing between Transiently Accreting Neutron Stars and Black Holes, in Quiescence. *Robert E. Rutledge, Lars Bildsten, Edward F. Brown, George G. Pavlov, & Vyatcheslav E. Zavlin.* 529, 985 (2000)

BILLÉRES, M. Detection of *p*-Mode Pulsations and Possible Ellipsoidal Luminosity Variations in the Hot Subdwarf B Star KPD 1930+2752. *M. Billéres, G. Fontaine, P. Brassard, S. Charpinet, James Liebert, & R. A. Saffer.* 530, 441 (2000)

BIRK, G. T. The X-ray Emission of the Centaurus A Jet. *G. T. Birk & H. Lesch.* 530, L77 (2000)

BIRKINSHAW, M. X-Ray–emitting Atmospheres of B2 Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 530, 719 (2000)

BISNOVATYI-KOGAN, G. S. Magnetic Field Limitations on Advection-dominated Flows. *G. S. Bisnovatyi-Kogan & R. V. E. Lovelace.* 529, 978 (2000)

BLACKMAN, ERIC G. Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

BLAES, O. M. Simultaneous *EUVE/ASCA/RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

BLAIN, A. W. Radio Constraints on the Identifications and Redshifts of Submillimeter Galaxies. *Ian Smail, R. J. Ivison, F. N. Owen, A. W. Blain, & J.-P. Kneib.* 528, 612 (2000)

BLAKESLEE, JOHN P. See KELSON, DANIEL D., et al. The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVII. A Derivation of the Hubble Constant Using the Fundamental Plane and D_n-σ Relations in Leo I, Virgo, and Fornax.

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

BLELLY, PIERRE-LOUIS. A Generalized Model for the Proton Expansion in Astrophysical Winds. III. The Collisional Transfers and Their Properties. *François Leblanc, Daniel Hubert, & Pierre-Louis Blelly.* 530, 478 (2000)

BLOOM, S. D. Radio and Millimeter Spectral Properties of Newly Identified High-Energy Gamma-Ray Sources. *S. D. Bloom, J. Hallum, H. Teräsranta, & M. Tornikoski.* 529, 675 (2000)

BLUM, JÜRGEN. An Experimental Study on the Structure of Cosmic Dust Aggregates and Their Alignment by Motion Relative to Gas. *Gerhard Wurm & Jürgen Blum.* 529, L57 (2000)

BLUM, S. Analyzing X-Ray Pulsar Profiles: Geometry and Beam Pattern of Hercules X-1. *S. Blum & U. Kraus.* 529, 968 (2000)

BOBROWSKY, MATTHEW. A *Hubble Space Telescope* Snapshot Survey of Proto–Planetary Nebula Candidates: Two Types of Axisymmetric Reflection Nebulosities. *Toshiya Ueta, Margaret Meixner, & Matthew Bobrowsky.* 528, 861 (2000)

BÖHRINGER, H. See DE GRANDI, S., et al. A Flux-limited Sample of Bright Clusters of Galaxies from the Southern Part of the *ROSAT* All-Sky Survey: The Catalog and log N–log S: Erratum.

BOESGAARD, ANN M. A Uniform Analysis of Boron in F and G Disk Dwarfs from *Hubble Space Telescope* Archival Spectra. *Katia Cunha, Verne V. Smith, Ann M. Boesgaard, & David L. Lambert.* 530, 939 (2000)

BÖTTCHER, M. A New Approach to Statistics of Cosmological Gamma-Ray Bursts. *M. Böttcher & C. D. Dermer.* 529, 635 (2000)

BOHLENDER, DAVID A. Further Evidence for Carbon Isotopic Structure in the λλ5797 and 6614 Diffuse Interstellar Bands. *Gordon A. H. Walker, David A. Bohlender, & Jacek Krełowski.* 530, 362 (2000)

BOHLIN, RALPH C. See D'CRUZ, NOELLA L., et al. *Hubble Space Telescope* Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri.

BOLTE, MICHAEL. Globular Cluster Giant Branch Luminosity Functions: "Extra Stars" and "Deep Mixing." *G. E. Langer, Michael Bolte, & Eric Sandquist.* 529, 936 (2000)

BOMBACI, IGNAZIO. Conversion of Neutron Stars to Strange Stars as the Central Engine of Gamma-Ray Bursts. *Ignazio Bombaci & Bhaskar Datta.* 530, L69 (2000)

BONO, GIUSEPPE. Classical Cepheid Pulsation Models. III. The Predictable Scenario. *Giuseppe Bono, Vittorio Castellani, & Marcella Marconi.* 529, 293 (2000)

BORGANI, STEFANO. Optical Luminosities and Mass-to-Light Ratios of Nearby Galaxy Clusters. *Marisa Girardi, Stefano Borgani, Giuliano Giuricin, Fabio Mardirossian, & Marino Mezzetti.* 530, 62 (2000)

BORNE, KIRK D. Evidence for Multiple Mergers among Ultraluminous Infrared Galaxies: Remnants of Compact Groups. *Kirk D. Borne, Howard Bushouse, Ray A. Lucas, & Luis Colina.* 529, L77 (2000)

BOROSON, BRAM. Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

BOROZDIN, KONSTANTIN N. *Rossi X-Ray Timing Explorer* Observations of an Outburst of Recurrent X-Ray Nova GS 1354−644. *Mikhail G. Revnivtsev, Konstantin N. Borozdin, William C. Priedhorsky, & Alexey Vikhlinin.* 530, 955 (2000)

BOSS, ALAN P. The Jeans Condition and Collapsing Molecular Cloud Cores: Filaments or Binaries? *Alan P. Boss, Robert T. Fisher, Richard I. Klein, & Christopher F. McKee.* 528, 325 (2000)

BOTHUN, G. The Space Density of Galaxies through $\mu_B(0) = 25.0$ Magnitudes per Inverse Arcsecond Squared. *K. O'Neil & G. Bothun.* 529, 811 (2000)

BOUWENS, RYCHARD J. Young Red Spheroidal Galaxies in the Hubble Deep Fields: Evidence for a Truncated Initial Mass Function at $\sim 2\ M_\odot$ and a Constant Space Density to $z \sim 2$. *Tom Broadhurst & Rychard J. Bouwens.* 530, L53 (2000)

BOWERS, CHARLES W. Far-Ultraviolet Emission from Elliptical Galaxies at $z = 0.55$. *Thomas M. Brown, Charles W. Bowers, Randy A. Kimble, & Henry C. Ferguson.* 529, L89 (2000)

BOWYER, STUART. See MORALES, CARMEN, et al. Far-Ultraviolet Absolute Flux of α Virginis.

BRAATZ, JAMES A. *Hubble Space Telescope* and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

SUBJECT INDEX

PARTS 1 & 2, VOLUMES 528–530

2000 JANUARY 1 TO FEBRUARY 20

ACCELERATION OF PARTICLES

Generation of Electron Suprathermal Tails in the Upper Solar Atmosphere: Implications for Coronal Heating. *Adolfo F. Viñas, Hung K Wong, & Alexander J. Klimas.* 528, 509 (2000)

Inverse Bremsstrahlung in Shocked Astrophysical Plasmas. *Matthew G. Baring, Frank C. Jones, & Donald C. Ellison.* 528, 775 (2000)

Age of Cosmic-Ray Protons Computed Using Simple Configurations of the Galactic Magnetic Field. *M. T. Brunetti & A. Codino.* 528, 789 (2000)

Interplanetary and Interacting Protons Accelerated in a Parallel Shock Wave. *R. Vainio, L. Kocharov, & T. Laitinen.* 528, 1015 (2000)

Spatial Variations of the Synchrotron Spectrum within Tycho's Supernova Remnant (3C 10): A Spectral Tomography Analysis of Radio Observations at 20 and 90 Centimeter Wavelengths. *D. M. Katz-Stone, N. E. Kassim, T. Joseph W. Lazio, & R. O'Donnell.* 529, 453 (2000)

Confinement and Isotropization of Galactic Cosmic Rays by Molecular-Cloud Magnetic Mirrors When Turbulent Scattering Is Weak. *Benjamin D. G. Chandran.* 529, 513 (2000)

The X-ray Emission of the Centaurus A Jet. *G. T. Birk & H. Lesch.* 530, L77 (2000)

ACCRETION, ACCRETION DISKS

Magnetic Stress at the Marginally Stable Orbit: Altered Disk Structure, Radiation, and Black Hole Spin Evolution. *Eric Agol & Julian H. Krolik.* 528, 161 (2000)

The Cooling Flow to Accretion Flow Transition. *Eliot Quataert & Ramesh Narayan.* 528, 236 (2000)

Changes in the Long-Term Intensity Variations in Cygnus X-2 and LMC X-3. *B. Paul, S. Kitamoto, & F. Makino.* 528, 410 (2000)

Global Magnetohydrodymanical Simulations of Accretion Tori. *John F. Hawley.* 528, 462 (2000)

LMC X-2: The First Extragalactic Z Source? *Alan P. Smale & Erik Kuulkers.* 528, 702 (2000)

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

The Rapid X-Ray Variability of V4641 Sagittarii (SAX J1819.3−2525=XTE J1819−254. *Rudy Wijnands & Michiel van der Klis.* 528, L93 (2000)

A Theoretical Light-Curve Model for the 1999 Outburst of U Scorpii. *Izumi Hachisu, Mariko Kato, Taichi Kato, & Katsura Matsumoto.* 528, L97 (2000)

Iron Line Reverberation Mapping with *Constellation-X*. *A. J. Young & C. S. Reynolds.* 529, 101 (2000)

The Dynamics of a Viscous Gas Ring around a Kerr Black Hole. *H. Riffert.* 529, 119 (2000)

Dynamics of the Transition from a Thin Accretion Disk to an Advection-dominated Accretion Flow. *Tadahiro Manmoto, Shoji Kato, Kenji E. Nakamura, & Ramesh Narayan.* 529, 127 (2000)

Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

Dynamics of Circumstellar Disks. II. Heating and Cooling. *Andrew F. Nelson, Willy Benz, & Tamara V. Ruzmaikina.* 529, 357 (2000)

High-Resolution Studies of Gans and Dust around Young Intermediate-Mass Stars. II. Observations of an Additional Sample of Herbig Ae Systems. *Vincent Mannings & Anneila I. Sargent.* 529, 391 (2000)

Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

Pulse Profiles, Accretion Column Dips, and a Flare in GX 1+4 during a Faint State. *A. B. Giles, D. K. Galloway, J. G. Greenhill, M. C. Storey, & C. A. Wilson.* 529, 447 (2000)

Parsec-Scale Images of Flat-Spectrum Radio Sources in Seyfert Galaxies. *C. G. Mundell, A. S. Wilson, J. S. Ulvestad, & A. L. Roy.* 529, 816 (2000)

Magnetic Field Limitations on Advection-dominated Flows. *G. S. Bisnovatyi-Kogan & R. V. E. Lovelace.* 529, 978 (2000)

A Method for Distinguishing between Transiently Accreting Neutron Stars and Black Holes, in Quiescence. *Robert E. Rutledge, Lars Bildsten, Edward F. Brown, George G. Pavlov, & Vyatcheslav E. Zavlin.* 529, 985 (2000)

Modeling the X-Ray Timing Properties of Cygnus X-1 Caused by Waves Propagating in a Transition Disk. *R. Misra.* 529, L95 (2000)

The Effect of Resistivity on the Nonlinear Stage of the Magnetorotational Instability in Accretion Disks. *Timothy P. Fleming, James M. Stone, & John F. Hawley.* 530, 464 (2000)

The Evolutionary Status of SS 433. *Andrew R. King, Ronald E. Taam, & Mitchell C. Begelman.* 530, L25 (2000)

Discovery of Circularly Polarized Radio Emission from SS 433. *Robert Fender, David Rayner, Ray Norris, R. J. Sault, & Guy Pooley.* 530, L29 (2000)

The Neutron Star Census. *S. B. Popov, M. Colpi, A. Treves, R. Turolla, V. M. Lipunov, & M. E. Prokhorov.* 530, 896 (2000)

Correlated Timing and Spectral Variations of the Soft X-Ray Transient Aquila X-1: Evidence for an Atoll Classification. *P. Reig, M. Méndez, M. van der Klis, & E. C. Ford.* 530, 916 (2000)

Interaction of Infall and Winds in Young Stellar Objects. *G. Delamarter, A. Frank, & L. Hartmann.* 530, 923 (2000)

Broad Emission Line Regions in Active Galactic Nuclei: The Link with the Accretion Power. *Fabrizio Nicastro.* 530, L65 (2000)

ASTROMETRY

A New Kinematic Distance Estimator to the Large Magellanic Cloud. *Andrew Gould.* 528, 156 (2000)

Astrometric Parallax Measurements of Gravitational Microlensing Events. *Cheongho Han & Ho-Il Kim.* 528, 687 (2000)

Timing Observations of Four Millisecond Pulsars with the Arecibo and Effelsberg Radio Telescopes. *A. Wolszczan, O. Doroshenko, M. Konacki, M. Kramer, A. Jessner, R. Wielebinski, F. Camilo, D. J. Nice, & J. H. Taylor.* 528, 907 (2000)

ATOMIC DATA

Measurements of Absolute, Single Charge-Exchange Cross Sections of H^+, He^+, and He^{+2} with H_2O and CO_2. *J. B. Greenwood, A. Chutjian, & S. J. Smith.* 529, 605 (2000)

Electron Collision Excitation of Fine-Structure Levels in S IV. *S. S. Tayal.* 530, 1091 (2000)

ATOMIC PROCESSES

Fluorescent Molecular Hydrogen in the Extragalactic Giant H II Region NGC 5461. *P. J. Puxley, S. K. Ramsay Howat, & C. M. Mountain.* 529, 224 (2000)

A Generalized Model for the Proton Expansion in Astrophysical Winds. III. The Collisional Transfers and Their Properties. *François Leblanc, Daniel Hubert, & Pierre-Louis Blelly.* 530, 478 (2000)

Ultraviolet Emission from Oxygen Precipitating into Jovian Aurora. *Weihong Liu & D. R. Schultz.* 530, 500 (2000)

Electron-Impact Excitations of Hydrogenic Ions in Strongly Coupled Plasmas. *Young-Dae Jung & Jung-Sik Yoon.* 530, 1085 (2000)

Electron Collision Excitation of Fine-Structure Levels in S IV. *S. S. Tayal.* 530, 1091 (2000)

BLACK HOLE PHYSICS

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)

Magnetic Stress at the Marginally Stable Orbit: Altered Disk Structure, Radiation, and Black Hole Spin Evolution. *Eric Agol & Julian H. Krolik.* 528, 161 (2000)

Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)

On the Maximum Mass of Differentially Rotating Neutron Stars. *Thomas W. Baumgarte, Stuart L. Shapiro, & Masaru Shibata.* 528, L29 (2000)

Nonaxisymmetric Dynamic Instabilities of Rotating Polytropes. II. Torques, Bars, and Mode Saturation with Applications to Protostars and Fizzlers. *James N. Imamura, Richard H. Durisen, & Brian K. Pickett.* 528, 946 (2000)

Relativistic Dynamos in Magnetospheres of Rotating Compact Objects. *Akira Tomimatsu.* 528, 972 (2000)

Iron Line Reverberation Mapping with *Constellation-X. A. J. Young & C. S. Reynolds.* 529, 101 (2000)

The Effect of the Self-Gravity of Gas on Gas Fueling in a Barred Galaxy with a Supermassive Black Hole. *Hiroyuki Fukuda, Asao Habe, & Keiichi Wada.* 529, 109 (2000)

The Dynamics of a Viscous Gas Ring around a Kerr Black Hole. *H. Riffert.* 529, 119 (2000)

Dynamics of the Transition from a Thin Accretion Disk to an Advection-dominated Accretion Flow. *Tadahiro Manmoto, Shoji Kato, Kenji E. Nakamura, & Ramesh Narayan.* 529, 127 (2000)

On the Superradiance of Spin-1 Waves in an Equatorial Wedge around a Kerr Hole. *Anthony N. Aguirre.* 529, L9 (2000)

A Method for Distinguishing between Transiently Accreting Neutron Stars and Black Holes, in Quiescence. *Robert E. Rutledge, Lars Bildsten, Edward F. Brown, George G. Pavlov, & Vyatcheslav E. Zavlin.* 529, 985 (2000)

Modeling the X-Ray Timing Properties of Cygnus X-1 Caused by Waves Propagating in a Transition Disk. *R. Misra.* 529, L95 (2000)

CATALOGS

Compact Radio Sources with the Steepest Spectra. *D. L. Kaplan, J. M. Cordes, J. J. Condon, & S. G. Djorgovski.* 529, 859 (2000)

CELESTIAL MECHANICS, STELLAR DYNAMICS

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

Evidence for Early Stellar Encounters in the Orbital Distribution of Edgeworth–Kuiper Belt Objects. *Shigeru Ida, John Larwood, & Andreas Burkert.* 528, 351 (2000)

Stability Analysis of the Planetary System Orbiting υ Andromedae. *Eugenio J. Rivera & Jack J. Lissauer.* 530, 454 (2000)

COMETS: GENERAL

Population of the Scattered Kuiper Belt. *Chadwick A. Trujillo, David C. Jewitt, & Jane X. Luu.* 529, L103 (2000)

The Coma Morphology Due to an Extended Active Region and the Implications for the Spin State of Comet Hale-Bopp. *Nalin H. Samarasinha.* 529, L107 (2000)

COMETS: INDIVIDUAL

Name: Hale-Bopp 1995 O1

The Coma Morphology Due to an Extended Active Region and the Implications for the Spin State of Comet Hale-Bopp. *Nalin H. Samarasinha.* 529, L107 (2000)

Name: Halley

Measurements of Absolute, Single Charge-Exchange Cross Sections of H^+, He^+, and He^{+2} with H_2O and CO_2. *J. B. Greenwood, A. Chutjian, & S. J. Smith.* 529, 605 (2000)

CONDUCTION

The Effect of Resistivity on the Nonlinear Stage of the Magnetorotational Instability in Accretion Disks. *Timothy P. Fleming, James M. Stone, & John F. Hawley.* 530, 464 (2000)

CONVECTION

Calibrating the Mixing-Length Parameter for a Red Giant Envelope. *S. M. Asida.* 528, 896 (2000)

Examination of Scaling Relationships Involving Penetration Distance at the Bottom of a Stellar Convective Envelope. *E. Saikia, Harinder P. Singh, K. L. Chan, I. W. Roxburgh, & M. P. Srivastava.* 529, 402 (2000)

Influence of Turbulent Energy Spectra on Damping and Frequency Reduction of the Solar *f*-Mode. *M. Mędrek & K. Murawski.* 529, 548 (2000)

Does Turbulence in the Iron Convection Zone Cause the Massive Outburst of η Carinae? *Richard B. Stothers.* 530, L103 (2000)

Numerical Simulations of Oscillation Modes of the Solar Convection Zone. *D. Georgobiani, A. G. Kosovichev, R. Nigam, Å Nordlund, & R. F. Stein.* 530, L139 (2000)

COSMOLOGY: COSMIC MICROWAVE BACKGROUND

New Non-Gaussian Feature in *COBE*-DMR 4 Year Maps. *João Magueijo.* 528, L57 (2000)

A Model for Structure Formation Seeded by Gravitationally Produced Matter. *Wayne Hu & P. J. E. Peebles.* 528, L61 (2000)

On the Number Density of Sunyaev-Zeldovich Clusters of Galaxies. *C. Hernández-Monteagudo & F. Atrio-Barandela.* 528, L69 (2000)

Lensing-induced Structure of Submillimeter Sources: Implications for the Microwave Background. *Evan Scannapieco, Joseph Silk, & Jonathan C. Tan.* 529, 1 (2000)

Reionization Revisited: Secondary Cosmic Microwave Background Anisotropies and Polarization. *Wayne Hu.* 529, 12 (2000)

Bulk Flows and Cosmic Microwave Background Dipole Anisotropy in Cosmological Void Models. *Kenji Tomita.* 529, 26 (2000)

The Tenerife Cosmic Microwave Background Maps: Observations and First Analysis. *C. M. Gutiérrez, R. Rebolo, R. A. Watson, R. D. Davies, A. W. Jones, & A. N. Lasenby.* 529, 47 (2000)

Correlations in the Far-Infrared Background. *Zoltan Haiman & Lloyd Knox.* 530, 124 (2000)

Foregrounds and Forecasts for the Cosmic Microwave Background. *Max Tegmark, Daniel J. Eisenstein, Wayne Hu, & Angelica de Oliveira-Costa.* 530, 133 (2000)

COSMOLOGY: DARK MATTER

Cosmological Redshift-Space Distortion on Clustering of High-Redshift Objects: Correction for Nonlinear Effects in the Power Spectrum and Tests with *N*-Body Simulations. *Hiromitsu Magira, Y. P. Jing, & Yasushi Suto.* 528, 30 (2000)

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)

The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)

The Linear Bias in the Zeldovich Approximation and a Relation between the Number Density and the Linear Bias of Dark Halos. *Zuhui Fan.* 528, 585 (2000)

Astrometric Parallax Measurements of Gravitational Microlensing Events. *Cheongho Han & Ho-Il Kim.* 528, 687 (2000)

A Model for Structure Formation Seeded by Gravitationally Produced Matter. *Wayne Hu & P. J. E. Peebles.* 528, L61 (2000)

Statistics of Weak Gravitational Lensing in Cold Dark Matter Models: Magnification Bias on Quasar Luminosity Functions. *Takashi Hamana, Hugo Martel, & Toshifumi Futamase.* 529, 56 (2000)

An Observational Test of Dark Matter as Cold Fractal Clouds. *Judith A. Irwin, Lawrence M. Widrow, & Jayanne English.* 529, 77 (2000)

Baryon Distribution in Galaxy Clusters as a Result of Sedimentation of Helium Nuclei. *Bo Qin & Xiang-Ping Wu.* 529, L1 (2000)

Is the Large Magellanic Cloud a Large Microlensing Cloud? *N. Wyn Evans & Eamonn Kerins.* 529, 917 (2000)

Detection of Iron Emission Lines from the Galaxy Cluster Including the Radio Galaxy 3C 220.1 at $z = 0.62$. *Naomi Ota, Kazuhisa Mitsuda, Makoto Hattori, & Tatehiro Mihara.* 530, 172 (2000)

Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

Event Rate and Einstein Time Evaluation in Pixel Microlensing. *Edward A. Baltz & Joseph Silk.* 530, 578 (2000)

An X-Ray and Optical Study of Matter Distribution in the Galaxy Cluster A2319. *D. Trévese, G. Cirimele, & M. De Simone.* 530, 680 (2000)

COSMOLOGY: DIFFUSE RADIATION

Clustering of the Diffuse Infrared Light from the *COBE* DIRBE Maps. III. Power Spectrum Analysis and Excess Isotropic Component of Fluctuations. *A. Kashlinsky & S. Odenwald.* 528, 74 (2000)

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

Radio Signatures of H I at High Redshift: Mapping the End of the "Dark Ages." *Paolo Tozzi, Piero Madau, Avery Meiksin, & Martin J. Rees.* 528, 597 (2000)

Formation of Subgalactic Clumps under Ultraviolet Background Radiation. *Tetsu Kitayama & Satoru Ikeuchi.* 529, 615 (2000)

Correlations in the Far-Infrared Background. *Zoltan Haiman & Lloyd Knox.* 530, 124 (2000)

Foregrounds and Forecasts for the Cosmic Microwave Background. *Max Tegmark, Daniel J. Eisenstein, Wayne Hu, & Angelica de Oliveira-Costa.* 530, 133 (2000)

COSMOLOGY: DISTANCE SCALE

Clump Giant Distance to the Magellanic Clouds and Anomalous Colors in the Galactic Bulge. *Piotr Popowski.* 528, L9 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXI. The Cepheid Distance to NGC 1425. *Jeremy R. Mould, Shaun M. G. Hughes, Peter B. Stetson, Brad K. Gibson, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Fabio Bresolin, Laura Ferrarese, Holland C. Ford, John A. Graham, Mingsheng Han, John G. Hoessel, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Randy L. Phelps, Charles F. Prosser, Daya Rawson, Abhijit Saha, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Anne M. Turner.* 528, 655 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXIV. The Calibration of Tully-Fisher Relations and the Value of the Hubble Constant. *Shoko Sakai, Jeremy R. Mould, Shaun M. G. Hughes, John P. Huchra, Lucas M. Macri, Robert C. Kennicutt, Jr., Brad K. Gibson, Laura Ferrarese, Wendy L. Freedman, Mingsheng Han, Holland C. Ford, John A. Graham, Garth D. Illingworth, Daniel D. Kelson, Barry F. Madore, Kim Sebo, N. A. Silbermann, & Peter B. Stetson.* 529, 698 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXV. A Recalibration of Cepheid Distance to Type Ia Supernovae and the Value of the Hubble Constant. *Brad K. Gibson, Peter B. Stetson, Wendy L. Freedman, Jeremy R. Mould, Robert C. Kennicutt, Jr., John P. Huchra, Shoko Sakai, John A. Graham, Caleb I. Fassett, Daniel D. Kelson, Laura Ferrarese, Shaun M. G. Hughes, Garth D. Illingworth, Lucas M. Macri, Barry F. Madore, Kim M. Sebo, & Nancy A. Silbermann.* 529, 723 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVI. The Calibration of Population II Secondary Distance Indicators and the Value of the Hubble Constant. *Laura Ferrarese, Jeremy R. Mould, Robert C. Kennicutt, Jr., John Huchra, Holland C. Ford, Wendy L. Freedman, Peter B. Stetson, Barry F. Madore, Shoko Sakai, Brad K. Gibson, John A. Graham, Shaun M. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas Macri, Kim Sebo, & N. A. Silbermann.* 529, 745 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVII. A Derivation of the Hubble Constant Using the Fundamental Plane and D_n-σ Relations in Leo I, Virgo, and Fornax. *Daniel D. Kelson, Garth D. Illingworth, John L. Tonry, Wendy L. Freedman, Robert C. Kennicutt, Jr., Jeremy R. Mould, John A. Graham, John P. Huchra, Lucas M. Macri, Barry F. Madore, Laura Ferrarese, Brad K. Gibson, Shoko Sakai, Peter B. Stetson, Edward A. Ajhar, John P. Blakeslee, Alan Dressler, Holland C. Ford, Shaun M. G. Hughes, Kim M. Sebo, & Nancy A. Silbermann.* 529, 768 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVIII. Combining the Constraints on the Hubble Constant. *Jeremy R. Mould, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Laura Ferrarese, Holland C. Ford, Brad K. Gibson, John A. Graham, Shaun M. G. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Peter B. Stetson.* 529, 786 (2000)

The Distribution of High- and Low-Redshift Type Ia Supernovae. *D. Andrew Howell, Lifan Wang, & J. Craig Wheeler.* 530, 166 (2000)

Has Blending Compromised Cepheid-based Determinations of the Extragalactic Distance Scale? *Brad K. Gibson, Philip R. Maloney, & Shoko Sakai.* 530, L5 (2000)

Type Ia Supernovae, Evolution, and the Cosmological Constant. *Persis S. Drell, Thomas J. Loredo, & Ira Wasserman.* 530, 593 (2000)

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

The Physics of Type Ia Supernova Light Curves. II. Opacity and Diffusion. *Philip A. Pinto & Ronald G. Eastman.* 530, 757 (2000)

COSMOLOGY: GRAVITATIONAL LENSING

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)

Detection Efficiencies of Microlensing Data Sets to Stellar and Planetary Companions. *B. Scott Gaudi & Penny D. Sackett.* 528, 56 (2000)

An Investigation of Gravitational Lensing in the Southern BL Lacertae Object PKS 0537−441. *Geraint F. Lewis & Rodrigo A. Ibata.* 528, 650 (2000)

Astrometric Parallax Measurements of Gravitational Microlensing Events. *Cheongho Han & Ho-Il Kim.* 528, 687 (2000)

Statistics of Weak Gravitational Lensing in Cold Dark Matter Models: Magnification Bias on Quasar Luminosity Functions. *Takashi Hamana, Hugo Martel, & Toshifumi Futamase.* 529, 56 (2000)

Detecting Stellar Spots by Gravitational Microlensing. *David Heyrovský & Dimitar Sasselov.* 529, 69 (2000)

The Optical Gravitational Lensing Experiment Monitoring of QSO 2237+0305. *P. R. Woźniak, C. Alard, A. Udalski, M. Szymański, M. Kubiak, G. Pietrzyński, & K. Zebruń.* 529, 88 (2000)

Is the Large Magellanic Cloud a Large Microlensing Cloud? *N. Wyn Evans & Eamonn Kerins.* 529, 917 (2000)

Detection of Iron Emission Lines from the Galaxy Cluster Including the Radio Galaxy 3C 220.1 at $z = 0.62$. *Naomi Ota, Kazuhisa Mitsuda, Makoto Hattori, & Tatehiro Mihara.* 530, 172 (2000)

Extinction Bias of Microlensed Stars toward the Large Magellanic Cloud and the Fraction of MACHOs in the Halo. *Hong Sheng Zhao.* 530, 299 (2000)

Statistics of Dark Matter Halos from Gravitational Lensing. *Bhuvnesh Jain & Ludovic van Waerbeke.* 530, L1 (2000)

Ray-tracing Simulations of Weak Lensing by Large-Scale Structure. *Bhuvnesh Jain, Uroš Seljak, & Simon White.* 530, 547 (2000)

Baryon Distribution in Galaxy Clusters as a Result of Sedimentation of Helium Nuclei. *Bo Qin & Xiang-Ping Wu.* 529, L1 (2000)

Correlation between the Halo Concentration c and the Virial Mass M_{vir} Determined from X-Ray Clusters. *Xiang-Ping Wu & Yan-Jie Xue.* 529, L5 (2000)

Prospects for Detecting Clusters of Galaxies through X-Ray Absorption. *Laurence P. David.* 529, 682 (2000)

The Density Profiles of the Dark Matter Halo Are Not Universal. *Y. P. Jing & Yasushi Suto.* 529, L69 (2000)

Evidence for Multiple Mergers among Ultraluminous Infrared Galaxies: Remnants of Compact Groups. *Kirk D. Borne, Howard Bushouse, Ray A. Lucas, & Luis Colina.* 529, L77 (2000)

The Angular Three-Point Correlation Function in the Quasi-linear Regime. *Ari Buchalter, Marc Kamionkowski, & Andrew H. Jaffe.* 530, 36 (2000)

Optical Luminosities and Mass-to-Light Ratios of Nearby Galaxy Clusters. *Marisa Girardi, Stefano Borgani, Giuliano Giuricin, Fabio Mardirossian, & Marino Mezzetti.* 530, 62 (2000)

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

The Effect of Environment on the Galaxy Interactions. *Yasuhiro Hashimoto & Augustus Oemler, Jr.* 530, 652 (2000)

Tidally Triggered Star Formation in Close Pairs of Galaxies. *Elizabeth J. Barton, Margaret J. Geller, & Scott J. Kenyon.* 530, 660 (2000)

GALAXIES: CLUSTERS: INDIVIDUAL

Name: Abell 496

Constraints on Type Ia Supernova Models from X-Ray Spectra of Galaxy Clusters. *Renato A. Dupke & Raymond E. White III.* 528, 139 (2000)

Name: Abell 644

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

Name: Abell 2199

Constraints on Type Ia Supernova Models from X-Ray Spectra of Galaxy Clusters. *Renato A. Dupke & Raymond E. White III.* 528, 139 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

Name: Abell 3266

Reconstructing the Merger History of the A3266 Galaxy Cluster. *Mark Henriksen, R. Hank Donnelly, & David S. Davis.* 529, 692 (2000)

Name: Abell 3571

Constraints on Type Ia Supernova Models from X-Ray Spectra of Galaxy Clusters. *Renato A. Dupke & Raymond E. White III.* 528, 139 (2000)

Name: Centaurus

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

Name: Fornax

The Ionized Gas Kinematics of the LMC-Type Galaxy NGC 1427A in the Fornax Cluster. *J. Chanamé, L. Infante, & A. Reisenegger.* 530, 96 (2000)

Name: Virgo

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

Alphanumeric: A2319

An X-Ray and Optical Study of Matter Distribution in the Galaxy Cluster A2319. *D. Trévese, G. Cirimele, & M. De Simone.* 530, 680 (2000)

Alphanumeric: B2 1335+28 Cluster

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

Alphanumeric: 3C 220.1

Detection of Iron Emission Lines from the Galaxy Cluster Including the Radio Galaxy 3C 220.1 at z = 0.62. *Naomi Ota, Kazuhisa Mitsuda, Makoto Hattori, & Tatehiro Mihara.* 530, 172 (2000)

Alphanumeric: MS 1054−03

Constraints on Primordial Non-Gaussianity from the High-Redshift Cluster MS 1054−03. *Jeffrey A. Willick.* 530, 80 (2000)

GALAXIES: COOLING FLOWS

The Cooling Flow to Accretion Flow Transition. *Eliot Quataert & Ramesh Narayan.* 528, 236 (2000)

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

GALAXIES: DISTANCES AND REDSHIFTS

Cosmological Redshift-Space Distortion on Clustering of High-Redshift Objects: Correction for Nonlinear Effects in the Power Spectrum and Tests with *N*-Body Simulations. *Hiromitsu Magira, Y. P. Jing, & Yasushi Suto.* 528, 30 (2000)

The Velocity Function of Galaxies. *Anthony H. Gonzalez, Kurtis A. Williams, James S. Bullock, Tsafrir S. Kolatt, & Joel R. Primack.* 528, 145 (2000)

A New Kinematic Distance Estimator to the Large Magellanic Cloud. *Andrew Gould.* 528, 156 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXI. The Cepheid Distance to NGC 1425. *Jeremy R. Mould, Shaun M. G. Hughes, Peter B. Stetson, Brad K. Gibson, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Fabio Bresolin, Laura Ferrarese, Holland C. Ford, John A. Graham, Mingsheng Han, John G. Hoessel, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Randy L. Phelps, Charles F. Prosser, Daya Rawson, Abhijit Saha, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Anne M. Turner.* 528, 655 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXIV. The Calibration of Tully-Fisher Relations and the Value of the Hubble Constant. *Shoko Sakai, Jeremy R. Mould, Shaun M. G. Hughes, John P. Huchra, Lucas M. Macri, Robert C. Kennicutt, Jr., Brad K. Gibson, Laura Ferrarese, Wendy L. Freedman, Mingsheng Han, Holland C. Ford, John A. Graham, Garth D. Illingworth, Daniel D. Kelson, Barry F. Madore, Kim Sebo, N. A. Silbermann, & Peter B. Stetson.* 529, 698 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXV. A Recalibration of Cepheid Distance to Type Ia Supernovae and the Value of the Hubble Constant. *Brad K. Gibson, Peter B. Stetson, Wendy L. Freedman, Jeremy R. Mould, Robert C. Kennicutt, Jr., John P. Huchra, Shoko Sakai, John A. Graham, Caleb I. Fassett, Daniel D. Kelson, Laura Ferrarese, Shaun M. G. Hughes, Garth D. Illingworth, Lucas M. Macri, Barry F. Madore, Kim M. Sebo, & Nancy A. Silbermann.* 529, 723 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVII. A Derivation of the Hubble Constant Using the Fundamental Plane and D_n-σ Relations in Leo I, Virgo, and Fornax. *Daniel D. Kelson, Garth D. Illingworth, John L. Tonry, Wendy L. Freedman, Robert C. Kennicutt, Jr., Jeremy R. Mould, John A. Graham, John P. Huchra, Lucas M. Macri, Barry F. Madore, Laura Ferrarese, Brad K. Gibson, Shoko Sakai, Peter B. Stetson, Edward A. Ajhar, John P. Blakeslee, Alan Dressler, Holland C. Ford, Shaun M. G. Hughes, Kim M. Sebo, & Nancy A. Silbermann.* 529, 768 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVIII. Combining the Constraints on the Hubble Constant. *Jeremy R. Mould, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Laura Ferrarese, Holland C. Ford, Brad K. Gibson, John A. Graham, Shaun M. G. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Peter B. Stetson.* 529, 786 (2000)

Topology from the Simulated Sloan Digital Sky Survey. *Wesley N. Colley, J. Richard Gott III, David H. Weinberg, Changbom Park, & Andreas A. Berlind.* 529, 795 (2000)

Has Blending Compromised Cepheid-based Determinations of the Extragalactic Distance Scale? *Brad K. Gibson, Philip R. Maloney, & Shoko Sakai.* 530, L5 (2000)

The Scatter in the Relationship between Redshift and the Radio-to-Submillimeter Spectral Index. *C. L. Carilli & Min S. Yun.* 530, 618 (2000)

The Surface Brightness Fluctuation Survey of Galaxy Distances. II. Local and Large-Scale Flows. *John L. Tonry, John P. Blakeslee, Edward A. Ajhar, & Alan Dressler.* 530, 625 (2000)

Hubble Space Telescope Observations of the Large Magellanic Cloud Field around SN 1987A: Distance Determination with Red Clump and Tip of the Red Giant Branch Stars. *M. Romaniello, M. Salaris, S. Cassisi, & N. Panagia.* 530, 738 (2000)

Young Red Spheroidal Galaxies in the Hubble Deep Fields: Evidence for a Truncated Initial Mass Function at $\sim$2 $M_\odot$ and a Constant Space Density to $z \sim 2$. *Tom Broadhurst & Rychard J. Bouwens.* 530, L53 (2000)

GALAXIES: DWARF

Star Formation Triggering Mechanisms in Dwarf Galaxies: The Far-Ultraviolet, Hα, and H I Morphology of Holmberg II. *Susan G. Stewart, Michael N. Fanelli, Gene G. Byrd, Jesse K. Hill, David J. Westpfahl, Kwang-Ping Cheng, Robert W. O'Connell, Morton S. Roberts, Susan G. Neff, Andrew M. Smith, & Theodore P. Stecher.* 529, 201 (2000)

Young Globular Clusters and Dwarf Spheroidals. *Sidney van den Bergh.* 530, 777 (2000)

The Elusive Old Population of the Dwarf Spheroidal Galaxy Leo I. *E. V. Held, I. Saviane, Y. Momany, & G. Carraro.* 530, L85 (2000)

GALAXIES: ELLIPTICAL AND LENTICULAR, CD

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)

A Photometric and Kinematic Study of the Stars and Interstellar Medium in the Central 2 Kiloparsecs of NGC 3379. *Miriani G. Pastoriza, Cláudia Winge, Fabricio Ferrari, F. Duccio Macchetto, & Nicola Caon.* 529, 866 (2000)

Young Red Spheroidal Galaxies in the Hubble Deep Fields: Evidence for a Truncated Initial Mass Function at $\sim$2 $M_{\odot}$ and a Constant Space Density to $z \sim 2$. *Tom Broadhurst & Rychard J. Bouwens.* 530, L53 (2000)

GALAXIES: EVOLUTION

The Ultraviolet Spectrum of MS 1512−cB58: An Insight into Lyman-Break Galaxies. *Max Pettini, Charles C. Steidel, Kurt L. Adelberger, Mark Dickinson, & Mauro Giavalisco.* 528, 96 (2000)

Constraints on the Evolution of S0 Galaxies in Rich Clusters at Moderate Redshift. *Lewis Jones, Ian Smail, & Warrick J. Couch.* 528, 118 (2000)

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

Sensitive Radio Observations of High-Redshift Dusty QSOs. *M. S. Yun, C. L. Carilli, R. Kawabe, Y. Tutui, K. Kohno, & K. Ohta.* 528, 171 (2000)

Radio Signatures of H I at High Redshift: Mapping the End of the "Dark Ages." *Paolo Tozzi, Piero Madau, Avery Meiksin, & Martin J. Rees.* 528, 597 (2000)

The Core Density of Dark Matter Halos: A Critical Challenge to the Λ-CDM Paradigm? *Julio F. Navarro & Matthias Steinmetz.* 528, 607 (2000)

Radio Constraints on the Identifications and Redshifts of Submillimeter Galaxies. *Ian Smail, R. J. Ivison, F. N. Owen, A. W. Blain, & J.-P. Kneib.* 528, 612 (2000)

Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)

A Subarcsecond Resolution Near-Infrared Study of Seyfert and "Normal" Galaxies. II. Morphology. *Johan H. Knapen, Isaac Schlosman, & Reynier F. Peletier.* 529, 93 (2000)

Optical Spherical Signatures of Dusty Starburst Galaxies. *Bianca M. Poggianti & Hong Wu.* 529, 157 (2000)

The Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)

Far-Ultraviolet Emission from Elliptical Galaxies at z = 0.55. *Thomas M. Brown, Charles W. Bowers, Randy A. Kimble, & Henry C. Ferguson.* 529, L89 (2000)

Correlations in the Far-Infrared Background. *Zoltan Haiman & Lloyd Knox.* 530, 124 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

Star Formation in a Crossing Time. *Bruce G. Elmegreen.* 530, 277 (2000)

The Dwarf Irregular Galaxy UGC 7636 Exposed: Stripping at Work in the Virgo Cluster. *Henry Lee, Michael G. Richer, & Marshall L. McCall.* 530, L17 (2000)

The Scatter in the Relationship between Redshift and the Radio-to-Submillimeter Spectral Index. *C. L. Carilli & Min S. Yun.* 530, 618 (2000)

The Effect of Environment on the Galaxy Interactions. *Yasuhiro Hashimoto & Augustus Oemler, Jr.* 530, 652 (2000)

Comparing the Evolution of the Galaxy Disk Sizes with Cold Dark Matter Models: The Hubble Deep Field. *E. Giallongo, N. Menci, E. Poli, S. D'Odorico, & A. Fontana.* 530, L73 (2000)

The Elusive Old Population of the Dwarf Spheroidal Galaxy Leo I. *E. V. Held, I. Saviane, Y. Momany, & G. Carraro.* 530, L85 (2000)

GALAXIES: FORMATION

Locally Biased Galaxy Formation and Large-Scale Structure. *Vijay K. Narayanan, Andreas A. Berlind, & David H. Weinberg.* 528, 1 (2000)

Constraints on the Evolution of S0 Galaxies in Rich Clusters at Moderate Redshift. *Lewis Jones, Ian Smail, & Warrick J. Couch.* 528, 118 (2000)

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

Soft X-Ray Absorption by High-Redshift Intergalactic Helium. *Jordi Miralda-Escudé.* 528, L1 (2000)

The Linear Bias in the Zeldovich Approximation and a Relation between the Number Density and the Linear Bias of Dark Halos. *Zuhui Fan.* 528, 585 (2000)

The Core Density of Dark Matter Halos: A Critical Challenge to the Λ-CDM Paradigm? *Julio F. Navarro & Matthias Steinmetz.* 528, 607 (2000)

Radio Constraints on the Identifications and Redshifts of Submillimeter Galaxies. *Ian Smail, R. J. Ivison, F. N. Owen, A. W. Blain, & J.-P. Kneib.* 528, 612 (2000)

CO (4–3) and Dust Emission in Two Powerful High-z Radio Galaxies, and CO Lines at High Redshifts. *Padeli P. Papadopoulos, H. J. A. Röttgering, P. P. van der Werf, S. Guilloteau, A. Omont, W. J. M. van Breugel, & R. P. J. Tilanus.* 528, 626 (2000)

A Model for Structure Formation Seeded by Gravitationally Produced Matter. *Wayne Hu & P. J. E. Peebles.* 528, L61 (2000)

X-Raying the Star Formation History of the Universe. *A. Cavaliere, R. Giacconi, & N. Menci.* 528, L77 (2000)

Formation of Subgalactic Clumps under Ultraviolet Background Radiation. *Tetsu Kitayama & Satoru Ikeuchi.* 529, 615 (2000)

Correlations in the Far-Infrared Background. *Zoltan Haiman & Lloyd Knox.* 530, 124 (2000)

Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)

Young Red Spheroidal Galaxies in the Hubble Deep Fields: Evidence for a Truncated Initial Mass Function at $\sim$2 $M_{\odot}$ and a Constant Space Density to $z \sim 2$. *Tom Broadhurst & Rychard J. Bouwens.* 530, L53 (2000)

Comparing the Evolution of the Galaxy Disk Sizes with Cold Dark Matter Models: The Hubble Deep Field. *E. Giallongo, N. Menci, E. Poli, S. D'Odorico, & A. Fontana.* 530, L73 (2000)

GALAXIES: FUNDAMENTAL PARAMETERS

The Ultraviolet Spectrum of MS 1512−cB58: An Insight into Lyman-Break Galaxies. *Max Pettini, Charles C. Steidel, Kurt L. Adelberger, Mark Dickinson, & Mauro Giavalisco.* 528, 96 (2000)

The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)

Galaxy Selection and Clustering and Lyα Absorber Identification. *Suzanne M. Linder.* 529, 644 (2000)

The Space Density of Galaxies through $\mu_B(0) = 25.0$ Magnitudes per Inverse Arcsecond Squared. *K. O'Neil & G. Bothun.* 529, 811 (2000)

Optical Luminosities and Mass-to-Light Ratios of Nearby Galaxy Clusters. *Marisa Girardi, Stefano Borgani, Giuliano Giuricin, Fabio Mardirossian, & Marino Mezzetti.* 530, 62 (2000)

Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

Comparing the Evolution of the Galaxy Disk Sizes with Cold Dark Matter Models: The Hubble Deep Field. *E. Giallongo, N. Menci, E. Poli, S. D'Odorico, & A. Fontana.* 530, L73 (2000)

GALAXIES: HALOS

The Velocity Function of Galaxies. *Anthony H. Gonzalez, Kurtis A. Williams, James S. Bullock, Tsafrir S. Kolatt, & Joel R. Primack.* 528, 145 (2000)

The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)

An Observational Test of Dark Matter as Cold Fractal Clouds. *Judith A. Irwin, Lawrence M. Widrow, & Jayanne English.* 529, 77 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

Faint Blue Objects on the Hubble Deep Field North and South as Possible Nearby Old Halo White Dwarfs. *R. A. Méndez & D. Minniti.* 529, 911 (2000)

The Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)

Event Rate and Einstein Time Evaluation in Pixel Microlensing. *Edward A. Baltz & Joseph Silk.* 530, 578 (2000)

GALAXIES: INDIVIDUAL

Messier Number: M51

Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)

Messier Number: M87

The Cooling Flow to Accretion Flow Transition. *Eliot Quataert & Ramesh Narayan.* 528, 236 (2000)

Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)

Messier Number: M100

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

Messier Number: M101

Fluorescent Molecular Hydrogen in the Extragalactic Giant H II Region NGC 5461. *P. J. Puxley, S. K. Ramsay Howat, & C. M. Mountain.* 529, 224 (2000)

Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)

NGC Number: NGC 1052

Mid-Infrared *Infrared Space Observatory* Spectroscopy of the Prototypical Liner NGC 1052: Shocks Reconsidered. *H. Sugai & M. A. Malkan.* 529, 219 (2000)

NGC Number: NGC 1068

A Search for Broad Infrared Recombination Lines in NGC 1068. *D. Lutz, R. Genzel, E. Sturm, L. Tacconi, E. Wieprecht, T. Alexander, H. Netzer, A. Sternberg, A. F. M. Moorwood, R. A. E. Fosbury, K. Fricke, S. J. Wagner, A. Quirrenbach, H. Awaki, & K. Y. Lo.* 530, 733 (2000)

NGC Number: NGC 1275

VLBA Absorption Imaging of Ionized Gas Associated with the Accretion Disk in NGC 1275. *R. C. Walker, V. Dhawan, J. D. Romney, K. I. Kellermann, & R. C. Vermeulen.* 530, 233 (2000)

NGC Number: NGC 1395

X-Ray Emission from Rotating Elliptical Galaxies. *Patricia C. Hanlan & Joel N. Bregman.* 530, 213 (2000)

NGC Number: NGC 1404

X-Ray Emission from Rotating Elliptical Galaxies. *Patricia C. Hanlan & Joel N. Bregman.* 530, 213 (2000)

NGC Number: NGC 1415

The Remarkable Central Structure of the Barred Galaxy NCG 1415. *J. A. García-Barreto & E. Moreno.* 529, 832 (2000)

NGC Number: NGC 1425

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXI. The Cepheid Distance to NGC 1425. *Jeremy R. Mould, Shaun M. G. Hughes, Peter B. Stetson, Brad K. Gibson, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Fabio Bresolin, Laura Ferrarese, Holland C. Ford, John A. Graham, Mingsheng Han, John G. Hoessel, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Randy L. Phelps, Charles F. Prosser, Daya Rawson, Abhijit Saha, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Anne M. Turner.* 528, 655 (2000)

NGC Number: NGC 3079

An Observational Test of Dark Matter as Cold Fractal Clouds. *Judith A. Irwin, Lawrence M. Widrow, & Jayanne English.* 529, 77 (2000)

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

NGC Number: NGC 3227

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

NGC Number: NGC 3379

A Photometric and Kinematic Study of the Stars and Interstellar Medium in the Central 2 Kiloparsecs of NGC 3379. *Miriani G. Pastoriza, Cláudia Winge, Fabricio Ferrari, F. Duccio Macchetto, & Nicola Caon.* 529, 866 (2000)

NGC Number: NGC 4051

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

NGC Number: NGC 4151

The Resolved Narrow-Line Region in NGC 4151. *M. E. Kaiser, L. D. Bradley II, J. B. Hutchings, D. M. Crenshaw, T. R. Gull, S. B. Kraemer, C. H. Nelson, J. Ruiz, & D. Weistrop.* 528, 260 (2000)

NGC Number: NGC 4258

Maser Radiation in a Keplerian Disk. *W. D. Watson & H. W. Wyld.* 530, 207 (2000)

NGC Number: NGC 5033

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

NGC Number: NGC 5128

Unveiling the Active Nucleus of Centaurus A. *Alessandro Marconi, Ethan J. Schreier, Anton Koekemoer, Alessandro Capetti, David Axon, Duccio Macchetto, & Nicola Caon.* 528, 276 (2000)

NGC Number: NGC 5548

Simultaneous *EUVE/ASCA/RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

High-Resolution Study of Associated C IV Absorption Systems in NGC 5548. *R. Srianand.* 528, 617 (2000)

NGC Number: NGC 7771

Near-Infrared Line Imaging of the Circumnuclear Starburst Ring in NGC 7771. *J. Reunanen, J. K. Kotilainen, S. Laine, & S. D. Ryder.* 529, 853 (2000)

Name: Centaurus A

The X-ray Emission of the Centaurus A Jet. *G. T. Birk & H. Lesch.* 530, L77 (2000)

Name: Leo I

The Elusive Old Population of the Dwarf Spheroidal Galaxy Leo I. *E. V. Held, I. Saviane, Y. Momany, & G. Carraro.* 530, L85 (2000)

Name: Large Magellanic Cloud

Hubble Space Telescope Observations of the Large Magellanic Cloud Field around SN 1987A: Distance Determination with Red Clump and Tip of the Red Giant Branch Stars. *M. Romaniello, M. Salaris, S. Cassisi, & N. Panagia.* 530, 738 (2000)

Alphanumeric: 3C 295

Chandra X-Ray Detection of the Radio Hot Spots of 3C 295. *D. E. Harris, P. E. J. Nulsen, T. J. Ponman, M. Bautz, R. A. Cameron, L. P. David, R. H. Donnelly, W. R. Forman, L. Grego, M. J. Hardcastle, J. P. Henry, C. Jones, J. P. Leahy, M. Markevitch, A. R. Martel, B. R. Mazzotta, W. Tucker, S. N. Virani, & J. Vrtilek.* 530, L81 (2000)

Alphanumeric: 4C 60.07

CO (4–3) and Dust Emission in Two Powerful High-z Radio Galaxies, and CO Lines at High Redshifts. *Padeli P. Papadopoulos, H. J. A. Röttgering, P. P. van der Werf, S. Guilloteau, A. Omont, W. J. M. van Breugel, & R. P. J. Tilanus.* 528, 626 (2000)

Alphanumeric: 6C 1909+722

CO (4–3) and Dust Emission in Two Powerful High-z Radio Galaxies, and CO Lines at High Redshifts. *Padeli P. Papadopoulos, H. J. A. Röttgering, P. P. van der Werf, S. Guilloteau, A. Omont, W. J. M. van Breugel, & R. P. J. Tilanus.* 528, 626 (2000)

Alphanumeric: DDO 50

Star Formation Triggering Mechanisms in Dwarf Galaxies: The Far-Ultraviolet, Hα, and H I Morphology of Holmberg II. *Susan G. Stewart, Michael N. Fanelli, Gene G. Byrd, Jesse K. Hill, David J. Westpfahl, Kwang-Ping Cheng, Robert W. O'Connell, Morton S. Roberts, Susan G. Neff, Andrew M. Smith, & Theodore P. Stecher.* 529, 201 (2000)

Alphanumeric: GRB 971214

Environment of the Gamma-Ray Burst GRB 971214: A Giant H II Region Surrounded by a Galactic Supershell. *Sang-Hyeon Ahn.* 530, L9 (2000)

Alphanumeric: IRAS 14348−1447

Resolved CO (1→0) Nuclei in IRAS 14348−1447: Evidence for Massive Bulge Progenitors to Ultraluminous Infrared Galaxies. *A. S. Evans, J. A. Surace, & J. M. Mazzarella.* 529, L85 (2000)

Alphanumeric: MS 1512−cB58

The Ultraviolet Spectrum of MS 1512−cB58: An Insight into Lyman-Break Galaxies. *Max Pettini, Charles C. Steidel, Kurt L. Adelberger, Mark Dickinson, & Mauro Giavalisco.* 528, 96 (2000)

Alphanumeric: TXS 2226−184

Hubble Space Telescope and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

Alphanumeric: UGC 7636

The Dwarf Irregular Galaxy UGC 7636 Exposed: Stripping at Work in the Virgo Cluster. *Henry Lee, Michael G. Richer, & Marshall L. McCall.* 530, L17 (2000)

GALAXIES: INTERACTIONS

3C 48: Stellar Populations and the Kinematics of Stars and Gas in the Host Galaxy. *Gabriela Canalizo & Alan Stockton.* 528, 201 (2000)

High-Resolution Optical/Near-Infrared Imaging of Cool Ultraluminous Infrared Galaxies. *Jason A. Surace, D. B. Sanders, & A. S. Evans.* 529, 170 (2000)

Reconstructing the Merger History of the A3266 Galaxy Cluster. *Mark Henriksen, R. Hank Donnelly, & David S. Davis.* 529, 692 (2000)

Evidence for Multiple Mergers among Ultraluminous Infrared Galaxies: Remnants of Compact Groups. *Kirk D. Borne, Howard Bushouse, Ray A. Lucas, & Luis Colina.* 529, L77 (2000)

The Ionized Gas Kinematics of the LMC-Type Galaxy NGC 1427A in the Fornax Cluster. *J. Chanamé, L. Infante, & A. Reisenegger.* 530, 96 (2000)

The Effect of Environment on the Galaxy Interactions. *Yasuhiro Hashimoto & Augustus Oemler, Jr.* 530, 652 (2000)

Tidally Triggered Star Formation in Close Pairs of Galaxies. *Elizabeth J. Barton, Margaret J. Geller, & Scott J. Kenyon.* 530, 660 (2000)

GALAXIES: INTERGALACTIC MEDIUM

Soft X-Ray Absorption by High-Redshift Intergalactic Helium. *Jordi Miralda-Escudé.* 528, L1 (2000)

Zero-Metallicity Stars and the Effects of the First Stars on Reionization. *Jason Tumlinson & J. Michael Shull.* 528, L65 (2000)

X-Raying the Star Formation History of the Universe. *A. Cavaliere, R. Giacconi, & N. Menci.* 528, L77 (2000)

Non-Voigt Lyα Absorption Line Profiles. *P. J. Outram & R. F. Carswell.* 529, L73 (2000)

Galaxy Selection and Clustering and Lyα Absorber Identification. *Suzanne M. Linder.* 529, 644 (2000)

QSO 0130−4021: A Third QSO Showing a Low Deuterium-to-Hydrogen Abundance Ratio. *David Kirkman, David Tytler, Scott Burles, Dan Lubin, & John M. O'Meara.* 529, 655 (2000)

Reconstructing the Merger History of the A3266 Galaxy Cluster. *Mark Henriksen, R. Hank Donnelly, & David S. Davis.* 529, 692 (2000)

Reionization of the Inhomogeneous Universe. *Jordi Miralda-Escudé, Martin Haehnelt, & Martin J. Rees.* 530, 1 (2000)

The Ionized Gas Kinematics of the LMC-Type Galaxy NGC 1427A in the Fornax Cluster. *J. Chanamé, L. Infante, & A. Reisenegger.* 530, 96 (2000)

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

An X-Ray and Optical Study of Matter Distribution in the Galaxy Cluster A2319. *D. Trévese, G. Cirimele, & M. De Simone.* 530, 680 (2000)

GALAXIES: IRREGULAR

The Dwarf Irregular Galaxy UGC 7636 Exposed: Stripping at Work in the Virgo Cluster. *Henry Lee, Michael G. Richer, & Marshall L. McCall.* 530, L17 (2000)

GALAXIES: ISM

New Mid-Infrared Diagnostic of the Dusty Torus Model for Seyfert Nuclei. *Takashi Murayama, Hideaki Mouri, & Yoshiaki Taniguchi.* 528, 179 (2000)

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

CO (4–3) and Dust Emission in Two Powerful High-z Radio Galaxies, and CO Lines at High Redshifts. *Padeli P. Papadopoulos, H. J. A. Röttgering, P. P. van der Werf, S. Guilloteau, A. Omont, W. J. M. van Breugel, & R. P. J. Tilanus.* 528, 626 (2000)

Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)

New CO and Millimeter Continuum Observations of the z = 2.394 Radio Galaxy 53W002. *Danielle Alloin, Richard Barvainis, & Stephane Guilloteau.* 528, L81 (2000)

An Observational Test of Dark Matter as Cold Fractal Clouds. *Judith A. Irwin, Lawrence M. Widrow, & Jayanne English.* 529, 77 (2000)

Optical Spherical Signatures of Dusty Starburst Galaxies. *Bianca M. Poggianti & Hong Wu.* 529, 157 (2000)

Superdisks in Radio Galaxies. *Gopal-Krishna & Paul J. Wiita.* 529, 189 (2000)

Star Formation Triggering Mechanisms in Dwarf Galaxies: The Far-Ultraviolet, Hα, and H I Morphology of Holmberg II. *Susan G. Stewart, Michael N. Fanelli, Gene G. Byrd, Jesse K. Hill, David J. Westpfahl, Kwang-Ping Cheng, Robert W. O'Connell, Morton S. Roberts, Susan G. Neff, Andrew M. Smith, & Theodore P. Stecher.* 529, 201 (2000)

The Remarkable Central Structure of the Barred Galaxy NCG 1415. *J. A. García-Barreto & E. Moreno.* 529, 832 (2000)

A Photometric and Kinematic Study of the Stars and Interstellar Medium in the Central 2 Kiloparsecs of NGC 3379. *Miriani G. Pastoriza, Cláudia Winge, Fabricio Ferrari, F. Duccio Macchetto, & Nicola Caon.* 529, 866 (2000)

Resolved CO (1→0) Nuclei in IRAS 14348−1447: Evidence for Massive Bulge Progenitors to Ultraluminous Infrared Galaxies. *A. S. Evans, J. A. Surace, & J. M. Mazzarella.* 529, L85 (2000)

X-Ray Emission from Rotating Elliptical Galaxies. *Patricia C. Hanlan & Joel N. Bregman.* 530, 213 (2000)

The Space Density of Primordial Gas Clouds near Galaxies and Groups and Their Relation to Galactic High-Velocity Clouds. *Martin A. Zwaan & Frank H. Briggs.* 530, L61 (2000)

GALAXIES: JETS

3C 48: Stellar Populations and the Kinematics of Stars and Gas in the Host Galaxy. *Gabriela Canalizo & Alan Stockton.* 528, 201 (2000)

Radio Emission from Three-dimensional Relativistic Hydrodynamic Jets: Observational Evidence of Jet Stratification. *Miguel-Angel Aloy, José-Luis Gómez, José-María Ibáñez, José-María Martí, & Ewald Müller.* 528, L85 (2000)

Superdisks in Radio Galaxies. *Gopal-Krishna & Paul J. Wiita.* 529, 189 (2000)

Parsec-Scale Images of Flat-Spectrum Radio Sources in Seyfert Galaxies. *C. G. Mundell, A. S. Wilson, J. S. Ulvestad, & A. L. Roy.* 529, 816 (2000)

Double Radio Sources: Two Approaches. *M. J. Valtonen & P. Heinämäki.* 530, 107 (2000)

VLBA Absorption Imaging of Ionized Gas Associated with the Accretion Disk in NGC 1275. *R. C. Walker, V. Dhawan, J. D. Romney, K. I. Kellermann, & R. C. Vermeulen.* 530, 233 (2000)

Space VLBI Observations of 3C 371. *José-Luis Gómez & Alan P. Marscher.* 530, 245 (2000)

Hubble Space Telescope and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

The X-ray Emission of the Centaurus A Jet. *G. T. Birk & H. Lesch.* 530, L77 (2000)

GALAXIES: KINEMATICS AND DYNAMICS

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

The Resolved Narrow-Line Region in NGC 4151. *M. E. Kaiser, L. D. Bradley II, J. B. Hutchings, D. M. Crenshaw, T. R. Gull, S. B. Kraemer, C. H. Nelson, J. Ruiz, & D. Weistrop.* 528, 260 (2000)

The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)

Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)

Reconstructing the Merger History of the A3266 Galaxy Cluster. *Mark Henriksen, R. Hank Donnelly, & David S. Davis.* 529, 692 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXIV. The Calibration of Tully-Fisher Relations and the Value of the Hubble Constant. *Shoko Sakai, Jeremy R. Mould, Shaun M. G. Hughes, John P. Huchra, Lucas M. Macri, Robert C. Kennicutt, Jr., Brad K. Gibson, Laura Ferrarese, Wendy L. Freedman, Mingsheng Han, Holland C. Ford, John A. Graham, Garth D. Illingworth, Daniel D. Kelson, Barry F. Madore, Kim Sebo, N. A. Silbermann, & Peter B. Stetson.* 529, 698 (2000)

A Photometric and Kinematic Study of the Stars and Interstellar Medium in the Central 2 Kiloparsecs of NGC 3379. *Miriani G. Pastoriza, Cláudia Winge, Fabricio Ferrari, F. Duccio Macchetto, & Nicola Caon.* 529, 866 (2000)

Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)

Maser Radiation in a Keplerian Disk. *W. D. Watson & H. W. Wyld.* 530, 207 (2000)

X-Ray Emission from Rotating Elliptical Galaxies. *Patricia C. Hanlan & Joel N. Bregman.* 530, 213 (2000)

GALAXIES: LOCAL GROUP

The Space Density of Primordial Gas Clouds near Galaxies and Groups and Their Relation to Galactic High-Velocity Clouds. *Martin A. Zwaan & Frank H. Briggs.* 530, L61 (2000)

The Elusive Old Population of the Dwarf Spheroidal Galaxy Leo I. *E. V. Held, I. Saviane, Y. Momany, & G. Carraro.* 530, L85 (2000)

GALAXIES: LUMINOSITY FUNCTION, MASS FUNCTION

The Velocity Function of Galaxies. *Anthony H. Gonzalez, Kurtis A. Williams, James S. Bullock, Tsafrir S. Kolatt, & Joel R. Primack.* 528, 145 (2000)

The Space Density of Galaxies through $\mu_B(0) = 25.0$ Magnitudes per Inverse Arcsecond Squared. *K. O'Neil & G. Bothun.* 529, 811 (2000)

Nearby Gas-rich Low Surface Brightness Galaxies. *Stephen E. Schneider & James M. Schombert.* 530, 286 (2000)

The Space Density of Primordial Gas Clouds near Galaxies and Groups and Their Relation to Galactic High-Velocity Clouds. *Martin A. Zwaan & Frank H. Briggs.* 530, L61 (2000)

GALAXIES: MAGELLANIC CLOUDS

A New Kinematic Distance Estimator to the Large Magellanic Cloud. *Andrew Gould.* 528, 156 (2000)

Clump Giant Distance to the Magellanic Clouds and Anomalous Colors in the Galactic Bulge. *Piotr Popowski.* 528, L9 (2000)

The Large Magellanic Cloud Eclipsing Binary HV 2274: Fundamental Properties and Comparison with Evolutionary Models. *Ignasi Ribas, Edward F. Guinan, Edward L. Fitzpatrick, Laurence E. DeWarf, Frank P. Maloney, Philip A. Maurone, David H. Bradstreet, Álvaro Giménez, & John D. Pritchard.* 528, 692 (2000)

Is the Large Magellanic Cloud a Large Microlensing Cloud? *N. Wyn Evans & Eamonn Kerins.* 529, 917 (2000)

The Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)

Extinction Bias of Microlensed Stars toward the Large Magellanic Cloud and the Fraction of MACHOs in the Halo. *Hong Sheng Zhao.* 530, 299 (2000)

GALAXIES: MAGNETIC FIELDS

Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

GALAXIES: NUCLEI

The Resolved Narrow-Line Region in NGC 4151. *M. E. Kaiser, L. D. Bradley II, J. B. Hutchings, D. M. Crenshaw, T. R. Gull, S. B. Kraemer, C. H. Nelson, J. Ruiz, & D. Weistrop.* 528, 260 (2000)

Unveiling the Active Nucleus of Centaurus A. *Alessandro Marconi, Ethan J. Schreier, Anton Koekemoer, Alessandro Capetti, David Axon, Duccio Macchetto, & Nicola Caon.* 528, 276 (2000)

Simultaneous *EUVE/ASCA/RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

On the Nature of Soft X-Ray Weak Quasi-stellar Objects. *W. N. Brandt, A. Laor, & Beverley J. Wills.* 528, 637 (2000)

A Subarcsecond Resolution Near-Infrared Study of Seyfert and "Normal" Galaxies. II. Morphology. *Johan H. Knapen, Isaac Schlosman, & Reynier F. Peletier.* 529, 93 (2000)

The Effect of the Self-Gravity of Gas on Gas Fueling in a Barred Galaxy with a Supermassive Black Hole. *Hiroyuki Fukuda, Asao Habe, & Keiichi Wada.* 529, 109 (2000)

Mid-Infrared *Infrared Space Observatory* Spectroscopy of the Prototypical Liner NGC 1052: Shocks Reconsidered. *H. Sugai & M. A. Malkan.* 529, 219 (2000)

Parsec-Scale Images of Flat-Spectrum Radio Sources in Seyfert Galaxies. *C. G. Mundell, A. S. Wilson, J. S. Ulvestad, & A. L. Roy.* 529, 816 (2000)

Nuclear Bar, Star Formation, and Gas Fueling in the Active Galaxy NGC 4303. *Luis Colina & Keiichi Wada.* 529, 845 (2000)

Maser Radiation in a Keplerian Disk. *W. D. Watson & H. W. Wyld.* 530, 207 (2000)

Hubble Space Telescope and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

The Nature of LINERs. *Almudena Alonso-Herrero, Marcia J. Rieke, George H. Rieke, & Joseph C. Shields.* 530, 688 (2000)

GALAXIES: PHOTOMETRY

Astrometric Parallax Measurements of Gravitational Microlensing Events. *Cheongho Han & Ho-Il Kim.* 528, 687 (2000)

The Optical Gravitational Lensing Experiment Monitoring of QSO 2237+0305. *P. R. Woźniak, C. Alard, A. Udalski, M. Szymański, M. Kubiak, G. Pietrzyński, & K. Zebruń.* 529, 88 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXIV. The Calibration of Tully-Fisher Relations and the Value of the Hubble Constant. *Shoko Sakai, Jeremy R. Mould, Shaun M. G. Hughes, John P. Huchra, Lucas M. Macri, Robert C. Kennicutt, Jr., Brad K. Gibson, Laura Ferrarese, Wendy L. Freedman, Mingsheng Han, Holland C. Ford, John A. Graham, Garth D. Illingworth, Daniel D. Kelson, Barry F. Madore, Kim Sebo, N. A. Silbermann, & Peter B. Stetson.* 529, 698 (2000)

A Photometric and Kinematic Study of the Stars and Interstellar Medium in the Central 2 Kiloparsecs of NGC 3379. *Miriani G. Pastoriza, Cláudia Winge, Fabricio Ferrari, F. Duccio Macchetto, & Nicola Caon.* 529, 866 (2000)

The Asymmetry of Galaxies: Physical Morphology for Nearby and High-Redshift Galaxies. *Christopher J. Conselice, Matthew A. Bershady, & Anna Jangren.* 529, 886 (2000)

Optical Luminosities and Mass-to-Light Ratios of Nearby Galaxy Clusters. *Marisa Girardi, Stefano Borgani, Giuliano Giuricin, Fabio Mardirossian, & Marino Mezzetti.* 530, 62 (2000)

An X-Ray and Optical Study of Matter Distribution in the Galaxy Cluster A2319. *D. Trévese, G. Cirimele, & M. De Simone.* 530, 680 (2000)

GALAXIES: QUASARS: ABSORPTION LINES

Soft X-Ray Absorption by High-Redshift Intergalactic Helium. *Jordi Miralda-Escudé.* 528, L1 (2000)

High-Resolution Study of Associated C IV Absorption Systems in NGC 5548. *R. Srianand.* 528, 617 (2000)

Galaxy Selection and Clustering and Lyα Absorber Identification. *Suzanne M. Linder.* 529, 644 (2000)

QSO 0130−4021: A Third QSO Showing a Low Deuterium-to-Hydrogen Abundance Ratio. *David Kirkman, David Tytler, Scott Burles, Dan Lubin, & John M. O'Meara.* 529, 655 (2000)

Non-Voigt Lyα Absorption Line Profiles. *P. J. Outram & R. F. Carswell.* 529, L73 (2000)

The Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)

Reionization of the Inhomogeneous Universe. *Jordi Miralda-Escudé, Martin Haehnelt, & Martin J. Rees.* 530, 1 (2000)

GALAXIES: QUASARS: EMISSION LINES

Broad Emission Line Regions in Active Galactic Nuclei: The Link with the Accretion Power. *Fabrizio Nicastro.* 530, L65 (2000)

GALAXIES: QUASARS: GENERAL

Cosmological Redshift-Space Distortion on Clustering of High-Redshift Objects: Correction for Nonlinear Effects in the Power Spectrum and Tests with *N*-Body Simulations. *Hiromitsu Magira, Y. P. Jing, & Yasushi Suto.* 528, 30 (2000)

Radio Signatures of H I at High Redshift: Mapping the End of the "Dark Ages." *Paolo Tozzi, Piero Madau, Avery Meiksin, & Martin J. Rees.* 528, 597 (2000)

On the Nature of Soft X-Ray Weak Quasi-stellar Objects. *W. N. Brandt, A. Laor, & Beverley J. Wills.* 528, 637 (2000)

Statistics of Weak Gravitational Lensing in Cold Dark Matter Models: Magnification Bias on Quasar Luminosity Functions. *Takashi Hamana, Hugo Martel, & Toshifumi Futamase.* 529, 56 (2000)

Double Radio Sources: Two Approaches. *M. J. Valtonen & P. Heinämäki.* 530, 107 (2000)

GALAXIES: QUASARS: INDIVIDUAL

Alphanumeric: B2 1335+28

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada,*

Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto. 528, 123 (2000)

Alphanumeric: 3C 48

3C 48: Stellar Populations and the Kinematics of Stars and Gas in the Host Galaxy. *Gabriela Canalizo & Alan Stockton.* 528, 201 (2000)

Alphanumeric: J1819+3845

The Discovery of a Microarcsecond Quasar: J1819+3845. *J. Dennett-Thorpe & A. G. De Bruyn.* 529, L65 (2000)

Alphanumeric: Q2237+0305

The Optical Gravitational Lensing Experiment Monitoring of QSO 2237+0305. *P. R. Woźniak, C. Alard, A. Udalski, M. Szymański, M. Kubiak, G. Pietrzyński, & K. Zebruń.* 529, 88 (2000)

Alphanumeric: QSO 0130−4021

QSO 0130−4021: A Third QSO Showing a Low Deuterium-to-Hydrogen Abundance Ratio. *David Kirkman, David Tytler, Scott Burles, Dan Lubin, & John M. O'Meara.* 529, 655 (2000)

GALAXIES: SEYFERT

New Mid-Infrared Diagnostic of the Dusty Torus Model for Seyfert Nuclei. *Takashi Murayama, Hideaki Mouri, & Yoshiaki Taniguchi.* 528, 179 (2000)

Excitation Mechanism of Near-Infrared [Fe II] Emission in Seyfert and Starburst Galaxies. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 528, 186 (2000)

The Resolved Narrow-Line Region in NGC 4151. *M. E. Kaiser, L. D. Bradley II, J. B. Hutchings, D. M. Crenshaw, T. R. Gull, S. B. Kraemer, C. H. Nelson, J. Ruiz, & D. Weistrop.* 528, 260 (2000)

Unveiling the Active Nucleus of Centaurus A. *Alessandro Marconi, Ethan J. Schreier, Anton Koekemoer, Alessandro Capetti, David Axon, Duccio Macchetto, & Nicola Caon.* 528, 276 (2000)

Simultaneous *EUVE/ASCA/RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

A Subarcsecond Resolution Near-Infrared Study of Seyfert and "Normal" Galaxies. II. Morphology. *Johan H. Knapen, Isaac Schlosman, & Reynier F. Peletier.* 529, 93 (2000)

Iron Line Reverberation Mapping with *Constellation-X*. *A. J. Young & C. S. Reynolds.* 529, 101 (2000)

Parsec-Scale Images of Flat-Spectrum Radio Sources in Seyfert Galaxies. *C. G. Mundell, A. S. Wilson, J. S. Ulvestad, & A. L. Roy.* 529, 816 (2000)

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

Hubble Space Telescope and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

A Search for Broad Infrared Recombination Lines in NGC 1068. *D. Lutz, R. Genzel, E. Sturm, L. Tacconi, E. Wieprecht, T. Alexander, H. Netzer, A. Sternberg, A. F. M. Moorwood, R. A. E. Fosbury, K. Fricke, S. J. Wagner, A. Quirrenbach, H. Awaki, & K. Y. Lo.* 530, 733 (2000)

GALAXIES: SPIRAL

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)

A Subarcsecond Resolution Near-Infrared Study of Seyfert and "Normal" Galaxies. II. Morphology. *Johan H. Knapen, Isaac Schlosman, & Reynier F. Peletier.* 529, 93 (2000)

The Space Density of Galaxies through $\mu_B(0) = 25.0$ Magnitudes per Inverse Arcsecond Squared. *K. O'Neil & G. Bothun.* 529, 811 (2000)

Nuclear Bar, Star Formation, and Gas Fueling in the Active Galaxy NGC 4303. *Luis Colina & Keiichi Wada.* 529, 845 (2000)

Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)

GALAXIES: STARBURST

The Ultraviolet Spectrum of MS 1512−cB58: An Insight into Lyman-Break Galaxies. *Max Pettini, Charles C. Steidel, Kurt L. Adelberger, Mark Dickinson, & Mauro Giavalisco.* 528, 96 (2000)

Sensitive Radio Observations of High-Redshift Dusty QSOs. *M. S. Yun, C. L. Carilli, R. Kawabe, Y. Tutui, K. Kohno, & K. Ohta.* 528, 171 (2000)

Excitation Mechanism of Near-Infrared [Fe II] Emission in Seyfert and Starburst Galaxies. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 528, 186 (2000)

3C 48: Stellar Populations and the Kinematics of Stars and Gas in the Host Galaxy. *Gabriela Canalizo & Alan Stockton.* 528, 201 (2000)

The Effect of the Self-Gravity of Gas on Gas Fueling in a Barred Galaxy with a Supermassive Black Hole. *Hiroyuki Fukuda, Asao Habe, & Keiichi Wada.* 529, 109 (2000)

Optical Spherical Signatures of Dusty Starburst Galaxies. *Bianca M. Poggianti & Hong Wu.* 529, 157 (2000)

High-Resolution Optical/Near-Infrared Imaging of Cool Ultraluminous Infrared Galaxies. *Jason A. Surace, D. B. Sanders, & A. S. Evans.* 529, 170 (2000)

Nuclear Bar, Star Formation, and Gas Fueling in the Active Galaxy NGC 4303. *Luis Colina & Keiichi Wada.* 529, 845 (2000)

Near-Infrared Line Imaging of the Circumnuclear Starburst Ring in NGC 7771. *J. Reunanen, J. K. Kotilainen, S. Laine, & S. D. Ryder.* 529, 853 (2000)

Evidence for Multiple Mergers among Ultraluminous Infrared Galaxies: Remnants of Compact Groups. *Kirk D. Borne, Howard Bushouse, Ray A. Lucas, & Luis Colina.* 529, L77 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

Environment of the Gamma-Ray Burst GRB 971214: A Giant H II Region Surrounded by a Galactic Supershell. *Sang-Hyeon Ahn.* 530, L9 (2000)

The Scatter in the Relationship between Redshift and the Radio-to-Submillimeter Spectral Index. *C. L. Carilli & Min S. Yun.* 530, 618 (2000)

GALAXIES: STAR CLUSTERS

High-Resolution Optical/Near-Infrared Imaging of Cool Ultraluminous Infrared Galaxies. *Jason A. Surace, D. B. Sanders, & A. S. Evans.* 529, 170 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVI. The Calibration of Population II Secondary Distance Indicators and the Value of the Hubble Constant. *Laura Ferrarese, Jeremy R. Mould, Robert C. Kennicutt, Jr., John Huchra, Holland C. Ford, Wendy L. Freedman, Peter B. Stetson, Barry F. Madore, Shoko Sakai, Brad K. Gibson, John A. Graham, Shaun M. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas Macri, Kim Sebo, & N. A. Silbermann.* 529, 745 (2000)

Classical Cepheid Pulsation Models. III. The Predictable Scenario. *Giuseppe Bono, Vittorio Castellani, & Marcella Marconi.* 529, 293 (2000)

Faint Blue Objects on the Hubble Deep Field North and South as Possible Nearby Old Halo White Dwarfs. *R. A. Méndez & D. Minniti.* 529, 911 (2000)

Far-Ultraviolet Emission from Elliptical Galaxies at $z = 0.55$. *Thomas M. Brown, Charles W. Bowers, Randy A. Kimble, & Henry C. Ferguson.* 529, L89 (2000)

The Distribution of High- and Low-Redshift Type Ia Supernovae. *D. Andrew Howell, Lifan Wang, & J. Craig Wheeler.* 530, 166 (2000)

Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

Tidally Triggered Star Formation in Close Pairs of Galaxies. *Elizabeth J. Barton, Margaret J. Geller, & Scott J. Kenyon.* 530, 660 (2000)

The Nature of LINERs. *Almudena Alonso-Herrero, Marcia J. Rieke, George H. Rieke, & Joseph C. Shields.* 530, 688 (2000)
The Elusive Old Population of the Dwarf Spheroidal Galaxy Leo I. *E. V. Held, I. Saviane, Y. Momany, & G. Carraro.* 530, L85 (2000)

GALAXIES: STRUCTURE

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)
The Two-Component Virial Theorem and the Physical Properties of Stellar Systems. *Christine C. Dantas, André L. B. Ribeiro, Hugo V. Capelato, & Reinaldo R. De Carvalho.* 528, L5 (2000)
Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)
Superdisks in Radio Galaxies. *Gopal-Krishna & Paul J. Wiita.* 529, 189 (2000)
The Remarkable Central Structure of the Barred Galaxy NCG 1415. *J. A. García-Barreto & E. Moreno.* 529, 832 (2000)
The Asymmetry of Galaxies: Physical Morphology for Nearby and High-Redshift Galaxies. *Christopher J. Conselice, Matthew A. Bershady, & Anna Jangren.* 529, 886 (2000)
Semianalytical Models for the Formation of Disk Galaxies. I. Constraints from the Tully-Fisher Relation. *Frank C. van den Bosch.* 530, 177 (2000)
Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)
The Effect of Environment on the Galaxy Interactions. *Yasuhiro Hashimoto & Augustus Oemler, Jr.* 530, 652 (2000)

GALAXY: ABUNDANCES

The Chemical Evolution of the Galaxy with Variable Initial Mass Functions. *C. Chiappini, F. Matteucci, & P. Padoan.* 528, 711 (2000)
The Origin of Extremely Metal Poor Carbon Stars and the Search for Population III. *Masayuki Y. Fujimoto, Yasufumi Ikeda, & Icko Iben, Jr.* 529, L25 (2000)

GALAXY: CENTER

Clump Giant Distance to the Magellanic Clouds and Anomalous Colors in the Galactic Bulge. *Piotr Popowski.* 528, L9 (2000)
Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)
Magnetic Flux Accumulation at the Galactic Center and Its Implications for the Strength of the Pregalactic Magnetic Field. *Benjamin D. G. Chandran, Steve C. Cowley, & Mark Morris.* 528, 723 (2000)
Submillimeter Polarimetric Observations of the Galactic Center. *G. Novak, J. L. Dotson, C. D. Dowell, R. H. Hildebrand, T. Renbarger, & D. A. Schleuning.* 529, 241 (2000)
The First Stellar Abundance Measurements in the Galactic Center: The M Supergiant IRS 7. *John S. Carr, K. Sellgren, & Suchitra C. Balachandran.* 530, 307 (2000)
Identification of New Methanol Lines toward Sagittarius B2. *C. C. Pei, Sheng-Yuan Liu, & Lewis E. Snyder.* 530, 800 (2000)
A Second Luminous Blue Variable in the Quintuplet Cluster. *T. R. Geballe, F. Najarro, & D. F. Figer.* 530, L97 (2000)

GALAXY: EVOLUTION

The Chemical Evolution of the Galaxy with Variable Initial Mass Functions. *C. Chiappini, F. Matteucci, & P. Padoan.* 528, 711 (2000)
Magnetic Flux Accumulation at the Galactic Center and Its Implications for the Strength of the Pregalactic Magnetic Field. *Benjamin D. G. Chandran, Steve C. Cowley, & Mark Morris.* 528, 723 (2000)
Prompt Iron Enrichment, Two *r*-Process Components, and Abundances in Very Metal Poor Stars. *G. J. Wasserburg & Y.-Z. Qian.* 529, L21 (2000)

GALAXY: GENERAL

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

GALAXY: GLOBULAR CLUSTERS: GENERAL

Black Hole Mergers in the Universe. *Simon F. Portegies Zwart & Stephen L. W. McMillan.* 528, L17 (2000)
A New Spin on the Problem of Horizontal-Branch Gaps: Stellar Rotation along the Blue Horizonal Branch of Globular Cluster M13. *Bradford B. Behr, S. G. Djorgovski, Judith G. Cohen, James K. McCarthy, Patrick Côté, Giampaolo Piotto, & Manuela Zoccali.* 528, 849 (2000)
Isochrones and Luminosity Functions for Old White Dwarfs. *Harvey B. Richer, Brad Hansen, Marco Limongi, Alessandro Chieffi, Oscar Straniero, & Gregory G. Fahlman.* 529, 318 (2000)
Globular Cluster Giant Branch Luminosity Functions: "Extra Stars" and "Deep Mixing." *G. E. Langer, Michael Bolte, & Eric Sandquist.* 529, 936 (2000)
Young Globular Clusters and Dwarf Spheroidals. *Sidney van den Bergh.* 530, 777 (2000)

GALAXY: GLOBULAR CLUSTERS: INDIVIDUAL

Messier Number: M4

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

NGC Number: NGC 6205

A New Spin on the Problem of Horizontal-Branch Gaps: Stellar Rotation along the Blue Horizonal Branch of Globular Cluster M13. *Bradford B. Behr, S. G. Djorgovski, Judith G. Cohen, James K. McCarthy, Patrick Côté, Giampaolo Piotto, & Manuela Zoccali.* 528, 849 (2000)

NGC Number: NGC 6388

RR Lyrae Stars in NGC 6388 and NGC 6441: A New Oosterhoff Group? *Barton Pritzl, Horace A. Smith, Márcio Catelan, & Allen V. Sweigart.* 530, L41 (2000)

NGC Number: NGC 6397

The Mass Function of Main-Sequence Stars in NGC 6397 from Near-IR and Optical High-Resolution *Hubble Space Telescope* Observations. *Guido De Marchi, Francesco Paresce, & Luigi Pulone.* 530, 342 (2000)

NGC Number: NGC 6441

RR Lyrae Stars in NGC 6388 and NGC 6441: A New Oosterhoff Group? *Barton Pritzl, Horace A. Smith, Márcio Catelan, & Allen V. Sweigart.* 530, L41 (2000)

NGC Number: NGC 6652

Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)

Name: ω Centauri

Hubble Space Telescope Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri. *Noella L. D'Cruz, Robert W. O'Connell, Robert T. Rood, Jonathan H. Whitney, Ben Dorman, Wayne B. Landsman, Robert S. Hill, Theodore P. Stecher, & Ralph C. Bohlin.* 530, 352 (2000)

GALAXY: HALO

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)
ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)
The Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)
The *r*-Process–enriched Low-Metallicity Giant HD 115444. *Jenny Westin, Christopher Sneden, Bengt Gustafsson, & John J. Cowan.* 530, 783 (2000)
Primordial Lithium and Big Bang Nucleosynthesis. *Sean G. Ryan, Timothy C. Beers, Keith A. Olive, Brian D. Fields, & John E. Norris.* 530, L57 (2000)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: GENERAL

Evidence for Early Stellar Encounters in the Orbital Distribution of Edgeworth–Kuiper Belt Objects. *Shigeru Ida, John Larwood, & Andreas Burkert.* 528, 351 (2000)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: INDIVIDUAL

Name: TW Hydrae

NICMOS Narrowband Infrared Photometry of TW Hydrae Association Stars. *David A. Weintraub, Didier Saumon, Joel H. Kastner, & Thierry Forveille.* 530, 867 (2000)

GALAXY: STRUCTURE

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)
An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)
Faint Blue Objects on the Hubble Deep Field North and South as Possible Nearby Old Halo White Dwarfs. *R. A. Méndez & D. Minniti.* 529, 911 (2000)

Extinction Bias of Microlensed Stars toward the Large Magellanic Cloud and the Fraction of MACHOs in the Halo. *Hong Sheng Zhao.* 530, 299 (2000)

GAMMA RAYS: BURSTS

The Optical Afterglow Light Curve of GRB 980519. *F. J. Vrba, A. A. Henden, B. Canzian, S. E. Levine, C. B. Luginbuhl, H. H. Guetter, J. A. Munn, D. H. Hartmann, & M. C. Jennings.* 528, 254 (2000)

ASCA Observations of the Quiescent X-Ray Counterpart to SGR 1627−41. *K. Hurley, T. Strohmayer, P. Li, C. Kouveliotou, P. Woods, J. Van Paradijs, T. Murakami, D. Hartmann, I. Smith, M. Ando, A. Yoshida, & M. Sugizaki.* 528, L21 (2000)

The Ejection of Relativistic Bullets from Supernovae and the Generation of Gamma-Ray Bursts. *Hideyuki Umeda.* 528, L89 (2000)

A Compact Fireball Model of Gamma-Ray Bursts. *David Eichler & Amir Levinson.* 529, 146 (2000)

On Beaming Effects in Afterglow Light Curves. *R. Moderski, M. Sikora, & T. Bulik.* 529, 151 (2000)

On the Superradiance of Spin-1 Waves in an Equatorial Wedge around a Kerr Hole. *Anthony N. Aguirre.* 529, L9 (2000)

On the Time Evolution of Gamma-Ray Burst Pulses: A Self-consistent Description. *Felix Ryde & Roland Svensson.* 529, L13 (2000)

Compton-dragged Gamma-Ray Bursts Associated with Supernovae. *Davide Lazzati, Gabriele Ghisellini, Annalisa Celotti, & Martin J. Rees.* 529, L17 (2000)

A New Approach to Statistics of Cosmological Gamma-Ray Bursts. *M. Böttcher & C. D. Dermer.* 529, 635 (2000)

Steep Slopes and Preferred Breaks in Gamma-Ray Burst Spectra: The Role of Photospheres and Comptonization. *P. Mészáros & M. J. Rees.* 530, 292 (2000)

Environment of the Gamma-Ray Burst GRB 971214: A Giant H II Region Surrounded by a Galactic Supershell. *Sang-Hyeon Ahn.* 530, L9 (2000)

Conversion of Neutron Stars to Strange Stars as the Central Engine of Gamma-Ray Bursts. *Ignazio Bombaci & Bhaskar Datta.* 530, L69 (2000)

GAMMA RAYS: OBSERVATIONS

The Optical Afterglow Light Curve of GRB 980519. *F. J. Vrba, A. A. Henden, B. Canzian, S. E. Levine, C. B. Luginbuhl, H. H. Guetter, J. A. Munn, D. H. Hartmann, & M. C. Jennings.* 528, 254 (2000)

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

High-Energy Gamma-Ray Observations of Two Young, Energetic Radio Pulsars. *V. M. Kaspi, J. R. Lackey, J. Mattox, R. N. Manchester, & M. Bailes.* 528, 445 (2000)

Simultaneous X-Ray and Radio Monitoring of the Unusual Binary LS I +61°303: Measurements of the Light Curve and High-Energy Spectrum. *F. A. Harrison, P. S. Ray, D. A. Leahy, E. B. Waltman, & G. G. Pooley.* 528, 454 (2000)

Detection of 33.8 Millisecond X-Ray Pulsations in SAX J0635+0533. *G. Cusumano, M. C. Maccarone, L. Nicastro, & B. Sacco.* 528, L25 (2000)

Detection Techniques of Microsecond Gamma-Ray Bursts Using Ground-based Telescopes. *F. Krennrich, S. Le Bohec, & T. C. Weekes.* 529, 506 (2000)

Radio and Millimeter Spectral Properties of Newly Identified High-Energy Gamma-Ray Sources. *S. D. Bloom, J. Hallum, H. Teräsranta, & M. Tornikoski.* 529, 675 (2000)

GAMMA RAYS: THEORY

Variability Pattern and the Spectral Evolution of the BL Lacertae Object PKS 2155−304. *J. Kataoka, T. Takahashi, F. Makino, S. Inoue, G. M. Madejski, M. Tashiro, C. M. Urry, & H. Kubo.* 528, 243 (2000)

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

Inverse Bremsstrahlung in Shocked Astrophysical Plasmas. *Matthew G. Baring, Frank C. Jones, & Donald C. Ellison.* 528, 775 (2000)

A New Approach to Statistics of Cosmological Gamma-Ray Bursts. *M. Böttcher & C. D. Dermer.* 529, 635 (2000)

GRAVITATION

Can the Density Distribution and Shape of the Galactic Dark Halo Be Determined by Low-Frequency Gravitational Waves? *Kunihito Ioka, Takahiro Tanaka, & Takashi Nakamura.* 528, 51 (2000)

Black Hole Mergers in the Universe. *Simon F. Portegies Zwart & Stephen L. W. McMillan.* 528, L17 (2000)

Viscous Boundary-Layer Dumping of *r*-Modes in Neutron Stars. *Lars Bildsten & Greg Ushomirsky.* 529, L33 (2000)

HYDRODYNAMICS

The Cooling Flow to Accretion Flow Transition. *Eliot Quataert & Ramesh Narayan.* 528, 236 (2000)

The Jeans Condition and Collapsing Molecular Cloud Cores: Filaments or Binaries? *Alan P. Boss, Robert T. Fisher, Richard I. Klein, & Christopher F. McKee.* 528, 325 (2000)

Presupernova Evolution of Rotating Massive Stars. I. Numerical Method and Evolution of the Internal Stellar Structure. *A. Heger, N. Langer, & S. E. Woosley.* 528, 368 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II. Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

Density Waves inside the Inner Lindblad Resonance: Nuclear Spirals in Disk Galaxies. *Peter Englmaier & Isaac Shlosman.* 528, 677 (2000)

Physical Properties of Laminar Helium Deflagrations. *F. X. Timmes.* 528, 913 (2000)

Nonaxisymmetric Dynamic Instabilities of Rotating Polytropes. II. Torques, Bars, and Mode Saturation with Applications to Protostars and Fizzlers. *James N. Imamura, Richard H. Durisen, & Brian K. Pickett.* 528, 946 (2000)

Two-dimensional versus Three-dimensional Supernova Hydrodynamic Instability Growth. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazán, E. Müller, B. A. Fryxell, & R. Teyssier.* 528, 989 (2000)

Radio Emission from Three-dimensional Relativistic Hydrodynamic Jets: Observational Evidence of Jet Stratification. *Miguel-Angel Aloy, José-Luis Gómez, José-María Ibáñez, José-María Martí, & Ewald Müller.* 528, L85 (2000)

The Dynamics of a Viscous Gas Ring around a Kerr Black Hole. *H. Riffert.* 529, 119 (2000)

Dynamics of the Transition from a Thin Accretion Disk to an Advection-dominated Accretion Flow. *Tadahiro Manmoto, Shoji Kato, Kenji E. Nakamura, & Ramesh Narayan.* 529, 127 (2000)

Dynamics of Circumstellar Disks. II. Heating and Cooling. *Andrew F. Nelson, Willy Benz, & Tamara V. Ruzmaikina.* 529, 357 (2000)

Examination of Scaling Relationships Involving Penetration Distance at the Bottom of a Stellar Convective Envelope. *E. Saikia, Harinder P. Singh, K. L. Chan, I. W. Roxburgh, & M. P. Srivastava.* 529, 402 (2000)

The Effects of Thermal Energetics on Three-dimensional Hydrodynamic Instabilities in Massive Protostellar Disks. II. High-Resolution and Adiabatic Evolutions. *Brian K. Pickett, Patrick Cassen, Richard H. Durisen, & Robert Link.* 529, 1034 (2000)

Is There a Dynamic Effect in the Screening of Nuclear Reactions in Stellar Plasmas? *Giora Shaviv & Nir J. Shaviv.* 529, 1054 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

INFRARED: GALAXIES

Clustering of the Diffuse Infrared Light from the *COBE* DIRBE Maps. III. Power Spectrum Analysis and Excess Isotropic Component of Fluctuations. *A. Kashlinsky & S. Odenwald.* 528, 74 (2000)

New Mid-Infrared Diagnostic of the Dusty Torus Model for Seyfert Nuclei. *Takashi Murayama, Hideaki Mouri, & Yoshiaki Taniguchi.* 528, 179 (2000)

3C 48: Stellar Populations and the Kinematics of Stars and Gas in the Host Galaxy. *Gabriela Canalizo & Alan Stockton.* 528, 201 (2000)

Unveiling the Active Nucleus of Centaurus A. *Alessandro Marconi, Ethan J. Schreier, Anton Koekemoer, Alessandro Capetti, David Axon, Duccio Macchetto, & Nicola Caon.* 528, 276 (2000)

Radio Constraints on the Identifications and Redshifts of Submillimeter Galaxies. *Ian Smail, R. J. Ivison, F. N. Owen, A. W. Blain, & J.-P. Kneib.* 528, 612 (2000)

Lensing-induced Structure of Submillimeter Sources: Implications for the Microwave Background. *Evan Scannapieco, Joseph Silk, & Jonathan C. Tan.* 529, 1 (2000)

A Subarcsecond Resolution Near-Infrared Study of Seyfert and "Normal" Galaxies. II. Morphology. *Johan H. Knapen, Isaac Schlosman, & Reynier F. Peletier.* 529, 93 (2000)

Optical Spherical Signatures of Dusty Starburst Galaxies. *Bianca M. Poggianti & Hong Wu.* 529, 157 (2000)

High-Resolution Optical/Near-Infrared Imaging of Cool Ultraluminous Infrared Galaxies. *Jason A. Surace, D. B. Sanders, & A. S. Evans.* 529, 170 (2000)

Mid-Infrared *Infrared Space Observatory* Spectroscopy of the Prototypical Liner NGC 1052: Shocks Reconsidered. *H. Sugai & M. A. Malkan.* 529, 219 (2000)

Near-Infrared Line Imaging of the Circumnuclear Starburst Ring in NGC 7771. *J. Reunanen, J. K. Kotilainen, S. Laine, & S. D. Ryder.* 529, 853 (2000)

Far-Infrared *ISO* Maps of Active Galaxies. *A. M. Pérez García, J. M. Rodríguez Espinosa, & J. J. Fuensalida.* 529, 875 (2000)

Evidence for Multiple Mergers among Ultraluminous Infrared Galaxies: Remnants of Compact Groups. *Kirk D. Borne, Howard Bushouse, Ray A. Lucas, & Luis Colina.* 529, L77 (2000)

Resolved CO (1→0) Nuclei in IRAS 14348−1447: Evidence for Massive Bulge Progenitors to Ultraluminous Infrared Galaxies. *A. S. Evans, J. A. Surace, & J. M. Mazzarella.* 529, L85 (2000)

The Scatter in the Relationship between Redshift and the Radio-to-Submillimeter Spectral Index. *C. L. Carilli & Min S. Yun.* 530, 618 (2000)

The Nature of LINERs. *Almudena Alonso-Herrero, Marcia J. Rieke, George H. Rieke, & Joseph C. Shields.* 530, 688 (2000)

Compact Radio Emission from Warm Infrared Galaxies. *L. J. Kewley, C. A. Heisler, M. A. Dopita, R. Sutherland, R. P. Norris, J. Reynolds, & S. Lumsden.* 530, 704 (2000)

INFRARED: GENERAL

Large Proper-Motion Infrared [Fe II] Emission-Line Features in GGD 37. *S. N. Raines, Dan M. Watson, J. L. Pipher, W. J. Forrest, M. A. Greenhouse, S. Satyapal, Charles E. Woodward, H. A. Smith, J. Fischer, J. A. Goetz, & Adam Frank.* 528, L115 (2000)

INFRARED: ISM: CONTINUUM

Multiple Scattering in Clumpy Media. II. Galactic Environments. *Adolf N. Witt & Karl D. Gordon.* 528, 799 (2000)

Submillimeter Polarimetric Observations of the Galactic Center. *G. Novak, J. L. Dotson, C. D. Dowell, R. H. Hildebrand, T. Renbarger, & D. A. Schleuning.* 529, 241 (2000)

Knacke, S. F. Dermott, M. C. Wyatt, K. Grogan, E. K. Holmes, A. M. Ghez, L. Prato, L. W. Hartmann, & R. Jayawardhana.* 530, 329 (2000)

Infrared Space Observatory Spectroscopy of Extreme Carbon Stars. *Kevin Volk, Guan-Zhu Xiong, & Sun Kwok.* 530, 408 (2000)

The Initial Mass Function of the Galactic Bulge down to ~0.15 $M_\odot$. *Manuela Zoccali, Santi Cassisi, Jay A. Frogel, Andrew Gould, Sergio Ortolani, Alvio Renzini, R. Michael Rich, & Andrew W. Stephens.* 530, 418 (2000)

NICMOS Narrowband Infrared Photometry of TW Hydrae Association Stars. *David A. Weintraub, Didier Saumon, Joel H. Kastner, & Thierry Forveille.* 530, 867 (2000)

Infrared Spectroscopy of the Secondary Star in ST Leonis Minoris: Implications for Evolution and High-/Low-State Behavior in Cataclysmic Variables. *Steve B. Howell, David R. Ciardi, V. S. Dhillon, & Warren Skidmore.* 530, 904 (2000)

Using Laboratory Spectroscopy to Identify Lines in the *K*- and *L*-Band Spectrum of Water in a Sunspot. *Nikolai F. Zobov, Oleg L. Polyansky, Jonathan Tennyson, Sergey V. Shirin, Ray Nassar, Tsuyoshi Hirao, Takashi Imajo, Peter F. Bernath, & Lloyd Wallace.* 530, 994 (2000)

O-bearing Molecules in Carbon-rich Proto–Planetary Objects. *F. Herpin & J. Cernicharo.* 530, L129 (2000)

INSTABILITIES

Global Magnetohydrodymanical Simulations of Accretion Tori. *John F. Hawley.* 528, 462 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II. Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

Nonaxisymmetric Dynamic Instabilities of Rotating Polytropes. II. Torques, Bars, and Mode Saturation with Applications to Protostars and Fizzlers. *James N. Imamura, Richard H. Durisen, & Brian K. Pickett.* 528, 946 (2000)

Two-dimensional versus Three-dimensional Supernova Hydrodynamic Instability Growth. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazán, E. Müller, B. A. Fryxell, & R. Teyssier.* 528, 989 (2000)

The Magnetohydrodynamic Kelvin-Helmholtz Instability. III. The Role of Sheared Magnetic Field in Planar Flows. *Hyunji Jeong, Dongsu Ryu, T. W. Jones, & Adam Frank.* 529, 536 (2000)

Inertial Modes of Slowly Rotating Isentropic Stars. *Shijun Yoshida & Umin Lee.* 529, 997 (2000)

The Effects of Thermal Energetics on Three-dimensional Hydrodynamic Instabilities in Massive Protostellar Disks. II. High-Resolution and Adiabatic Evolutions. *Brian K. Pickett, Patrick Cassen, Richard H. Durisen, & Robert Link.* 529, 1034 (2000)

Whistler Heat Flux Instability at High Beta. *S. Peter Gary & Hui Li.* 529, 1131 (2000)

The Effect of Resistivity on the Nonlinear Stage of the Magnetorotational Instability in Accretion Disks. *Timothy P. Fleming, James M. Stone, & John F. Hawley.* 530, 464 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

INSTRUMENTATION: DETECTORS

Detection Techniques of Microsecond Gamma-Ray Bursts Using Ground-based Telescopes. *F. Krennrich, S. Le Bohec, & T. C. Weekes.* 529, 506 (2000)

INSTRUMENTATION: MISCELLANEOUS

In-Flight Determination of the Plate Scale of the Extreme-Ultraviolet Imaging Telescope. *F. Auchére, C. E. DeForest, & G. Artzner.* 529, L115 (2000)

INSTRUMENTATION: SPECTROGRAPHS

First Light Measurements of Capella with the Low-Energy Transmission Grating Spectrometer Aboard the *Chandra X-Ray Observatory*. *A. C. Brinkman, C. J. T. Gunsing, J. S. Kaastra, R. L. J. van der Meer, R. Mewe, F. Paerels, A. J. J. Raasen, J. J. van Rooijen, H. Bräuninger, W. Burkert, V. Burwitz, G. Hartner, P. Predehl, J.-U. Ness, J. H. M. M. Schmitt, J. J. Drake, O. Johnson, M. Juda, V. Kashyap, S. S. Murray, D. Pease, P. Ratzlaff, & B. J. Wargelin.* 530, L111 (2000)

INTERPLANETARY MEDIUM

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

A Generalized Model for the Proton Expansion in Astrophysical Winds. III. The Collisional Transfers and Their Properties. *François Leblanc, Daniel Hubert, & Pierre-Louis Blelly.* 530, 478 (2000)

The Space Density of Primordial Gas Clouds near Galaxies and Groups and Their Relation to Galactic High-Velocity Clouds. *Martin A. Zwaan & Frank H. Briggs.* 530, L61 (2000)

ISM: ABUNDANCES

Modeling the Warm Ionized Interstellar Medium and Its Impact on Elemental Abundance Studies. *Kenneth R. Sembach, J. Christopher Howk, Robert S. I. Ryans, & Francis P. Keenan.* 528, 310 (2000)

The Three-dimensional Structure of the Warm Local Interstellar Medium. I. Methodology. *Jeffrey L. Linsky, Seth Redfield, Brian E. Wood, & Nikolai Piskunov.* 528, 756 (2000)

Chemical Evolution of Carbonaceous Material in Interstellar Clouds. *W. W. Duley.* 528, 841 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

Solid-State CO toward ρ Ophiuchi Elias 25: Ice Thresholds Revisited. *R. Young Shuping, Theodore P. Snow, Jean E. Chiar, & Thomas Kerr.* 529, 932 (2000)

Carbon Dioxide in Star-forming Regions. *S. B. Charnley & M. J. Kaufman.* 529, L111 (2000)

Identification of New Methanol Lines toward Sagittarius B2. *C. C. Pei, Sheng-Yuan Liu, & Lewis E. Snyder.* 530, 800 (2000)

ISM: ATOMS

Modeling the Warm Ionized Interstellar Medium and Its Impact on Elemental Abundance Studies. *Kenneth R. Sembach, J. Christopher Howk, Robert S. I. Ryans, & Francis P. Keenan.* 528, 310 (2000)

ISM: BUBBLES

An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)

ISM: CLOUDS

The Jeans Condition and Collapsing Molecular Cloud Cores: Filaments or Binaries? *Alan P. Boss, Robert T. Fisher, Richard I. Klein, & Christopher F. McKee.* 528, 325 (2000)

The Evolution of the Angular Momentum Distribution during Star Formation. *Kohji Tomisaka.* 528, L41 (2000)

Composite Polytrope Models of Molecular Clouds. I. Theory. *Charles L. Curry & Christopher F. McKee.* 528, 734 (2000)

C^{18}O Observations of the Dense Cloud Cores and Star Formation in Ophiuchus. *Kengo Tachihara, Akira Mizuno, & Yasuo Fukui.* 528, 817 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

Confinement and Isotropization of Galactic Cosmic Rays by Molecular-Cloud Magnetic Mirrors When Turbulent Scattering Is Weak. *Benjamin D. G. Chandran.* 529, 513 (2000)

Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

Solid-State CO toward ρ Ophiuchi Elias 25: Ice Thresholds Revisited. *R. Young Shuping, Theodore P. Snow, Jean E. Chiar, & Thomas Kerr.* 529, 932 (2000)

T... Magellanic Stream and the Density of Coronal Gas in the Galactic Halo. *Chigurupati Murali.* 529, L81 (2000)

Carbon Dioxide in Star-forming Regions. *S. B. Charnley & M. J. Kaufman.* 529, L111 (2000)

The Structure of Protostellar Envelopes Derived from Submillimeter Continuum Images. *Claire J. Chandler & John S. Richer.* 530, 851 (2000)

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

Growth of an Initial Mass Function Cluster in a Turbulent Dense Core. *P. C. Myers.* 530, L119 (2000)

ISM: COSMIC RAYS

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

Inverse Bremsstrahlung in Shocked Astrophysical Plasmas. *Matthew G. Baring, Frank C. Jones, & Donald C. Ellison.* 528, 775 (2000)

Age of Cosmic-Ray Protons Computed Using Simple Configurations of the Galactic Magnetic Field. *M. T. Brunetti & A. Codino.* 528, 789 (2000)

Confinement and Isotropization of Galactic Cosmic Rays by Molecular-Cloud Magnetic Mirrors When Turbulent Scattering Is Weak. *Benjamin D. G. Chandran.* 529, 513 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

ISM: DUST, EXTINCTION

The Scattering of X-Rays by Interstellar Dust on the Microarcsecond Scale. *David L. Windt, Webster Cash, & Steven M. Kahn.* 528, 306 (2000)

Clump Giant Distance to the Magellanic Clouds and Anomalous Colors in the Galactic Bulge. *Piotr Popowski.* 528, L9 (2000)

The Three-dimensional Structure of the Warm Local Interstellar Medium. I. Methodology. *Jeffrey L. Linsky, Seth Redfield, Brian E. Wood, & Nikolai Piskunov.* 528, 756 (2000)

Multiple Scattering in Clumpy Media. II. Galactic Environments. *Adolf N. Witt & Karl D. Gordon.* 528, 799 (2000)

Chemical Evolution of Carbonaceous Material in Interstellar Clouds. *W. W. Duley.* 528, 841 (2000)

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

Optical Spherical Signatures of Dusty Starburst Galaxies. *Bianca M. Poggianti & Hong Wu.* 529, 157 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

An Experimental Study on the Structure of Cosmic Dust Aggregates and Their Alignment by Motion Relative to Gas. *Gerhard Wurm & Jürgen Blum.* 529, L57 (2000)

Extinction Bias of Microlensed Stars toward the Large Magellanic Cloud and the Fraction of MACHOs in the Halo. *Hong Sheng Zhao.* 530, 299 (2000)

Infrared Space Observatory Mid-Infrared Spectra of Reflection Nebulae. *K. I. Uchida, K. Sellgren, M. W. Werner, & M. L. Houdashelt.* 530, 817 (2000)

The Structure of Protostellar Envelopes Derived from Submillimeter Continuum Images. *Claire J. Chandler & John S. Richer.* 530, 851 (2000)

ISM: GENERAL

Anisotropic Inverse Compton Scattering in the Galaxy. *Igor V. Moskalenko & Andrew W. Strong.* 528, 357 (2000)

Magnetoacoustic Waves of Small Amplitude in Optically Thin Quasi-isentropic Plasmas. *Valery M. Nakariakov, César A. Mendoza-Briceño, & Miguel H. Ibáñez S.* 528, 767 (2000)

The Discovery of a Microarcsecond Quasar: J1819+3845. *J. Dennett-Thorpe & A. G. De Bruyn.* 529, L65 (2000)

ISM: GLOBULES

Composite Polytrope Models of Molecular Clouds. I. Theory. *Charles L. Curry & Christopher F. McKee.* 528, 734 (2000)

ISM: H II REGIONS

Modeling the Warm Ionized Interstellar Medium and Its Impact on Elemental Abundance Studies. *Kenneth R. Sembach, J. Christopher Howk, Robert S. I. Ryans, & Francis P. Keenan.* 528, 310 (2000)

Fluorescent Molecular Hydrogen in the Extragalactic Giant H II Region NGC 5461. *P. J. Puxley, S. K. Ramsay Howat, & C. M. Mountain.* 529, 224 (2000)

Radio Continuum Emission at OH and H_2O Maser Sites. *J. R. Forster & J. L. Caswell.* 530, 371 (2000)

ISM: HERBIG-HARO OBJECTS

Large Proper-Motion Infrared [Fe II] Emission-Line Features in GGD 37. *S. N. Raines, Dan M. Watson, J. L. Pipher, W. J. Forrest, M. A. Greenhouse, S. Satyapal, Charles E. Woodward, H. A. Smith, J. Fischer, J. A. Goetz, & Adam Frank.* 528, L115 (2000)

ISM: INDIVIDUAL

Name: R Aquarii

The R Aquarii Jet: A Lorentz Force–driven Parcel Model. *J. M. Hollis & T. Koupelis.* 528, 418 (2000)

Name: Cassiopeia A

Nucleosynthesis and Mixing in Cassiopeia A. *John P. Hughes, Cara E. Rakowski, David N. Burrows, & Patrick O. Slane.* 528, L109 (2000)

Name: Cygnus Loop

Ne v Imaging of the Cygnus Loop. *Andrew H. Szentgyorgyi, John C. Raymond, John J. Hester, & Salvador Curiel.* 529, 279 (2000)

Name: Ophiuchus Cloud

Solid-State CO toward ρ Ophiuchi Elias 25: Ice Thresholds Revisited. *R. Young Shuping, Theodore P. Snow, Jean E. Chiar, & Thomas Kerr.* 529, 932 (2000)

Name: Sagittarius A

Submillimeter Polarimetric Observations of the Galactic Center. *G. Novak, J. L. Dotson, C. D. Dowell, R. H. Hildebrand, T. Renbarger, & D. A. Schleuning.* 529, 241 (2000)

Name: Sagittarius B2

Identification of New Methanol Lines toward Sagittarius B2. *C. C. Pei, Sheng-Yuan Liu, & Lewis E. Snyder.* 530, 800 (2000)

Name: Serpens

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

NGC Number: NGC 2023

H_2 Line Ratios to Discriminate Dense Photodissociation Regions from Shocks: Application to NGC 2023 and NGC 7023. *Takami Michihiro, Tomonori Usuda, Hajime Sugai, Hironobu Kawabata, Hiroshi Suto, & Masuo Tanaka.* 529, 268 (2000)

NGC Number: NGC 5461

Fluorescent Molecular Hydrogen in the Extragalactic Giant H II Region NGC 5461. *P. J. Puxley, S. K. Ramsay Howat, & C. M. Mountain.* 529, 224 (2000)

NGC Number: NGC 7023

H_2 Line Ratios to Discriminate Dense Photodissociation Regions from Shocks: Application to NGC 2023 and NGC 7023. *Takami Michihiro, Tomonori Usuda, Hajime Sugai, Hironobu Kawabata, Hiroshi Suto, & Masuo Tanaka.* 529, 268 (2000)

Alphanumeric: G0.15−0.05

A Second Luminous Blue Variable in the Quintuplet Cluster. *T. R. Geballe, F. Najarro, & D. F. Figer.* 530, L97 (2000)

Alphanumeric: GGD 37

Large Proper-Motion Infrared [Fe II] Emission-Line Features in GGD 37. *S. N. Raines, Dan M. Watson, J. L. Pipher, W. J. Forrest, M. A. Greenhouse, S. Satyapal, Charles E. Woodward, H. A. Smith, J. Fischer, J. A. Goetz, & Adam Frank.* 528, L115 (2000)

Alphanumeric: GW 46.4+5.5

An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)

Alphanumeric: L1544

Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

Alphanumeric: OMC-1

Extended Far-Infrared CO Emission in the OMC-1 Core of Orion. *María J. Sempere, José Cernicharo, Bertrand Lefloch, Eduardo González-Alfonso, & Sarah Leeks.* 530, L123 (2000)

ISM: JETS AND OUTFLOWS

The Evolution of the Angular Momentum Distribution during Star Formation. *Kohji Tomisaka.* 528, L41 (2000)

Large Proper-Motion Infrared [Fe II] Emission-Line Features in GGD 37. *S. N. Raines, Dan M. Watson, J. L. Pipher, W. J. Forrest, M. A. Greenhouse, S. Satyapal, Charles E. Woodward, H. A. Smith, J. Fischer, J. A. Goetz, & Adam Frank.* 528, L115 (2000)

Discovery of Circularly Polarized Radio Emission from SS 433. *Robert Fender, David Rayner, Ray Norris, R. J. Sault, & Guy Pooley.* 530, L29 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

ISM: KINEMATICS AND DYNAMICS

The Jeans Condition and Collapsing Molecular Cloud Cores: Filaments or Binaries? *Alan P. Boss, Robert T. Fisher, Richard I. Klein, & Christopher F. McKee.* 528, 325 (2000)

$C^{18}O$ Observations of the Dense Cloud Cores and Star Formation in Ophiuchus. *Kengo Tachihara, Akira Mizuno, & Yasuo Fukui.* 528, 817 (2000)

The Effect of the Self-Gravity of Gas on Gas Fueling in a Barred Galaxy with a Supermassive Black Hole. *Hiroyuki Fukuda, Asao Habe, & Keiichi Wada.* 529, 109 (2000)

Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

The Ionized Gas Kinematics of the LMC-Type Galaxy NGC 1427A in the Fornax Cluster. *J. Chanamé, L. Infante, & A. Reisenegger.* 530, 96 (2000)

ISM: LINES AND BANDS

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

ISM: MAGNETIC FIELDS

The Evolution of the Angular Momentum Distribution during Star Formation. *Kohji Tomisaka.* 528, L41 (2000)

Magnetic Flux Accumulation at the Galactic Center and Its Implications for the Strength of the Pregalactic Magnetic Field. *Benjamin D. G. Chandran, Steve C. Cowley, & Mark Morris.* 528, 723 (2000)

Age of Cosmic-Ray Protons Computed Using Simple Configurations of the Galactic Magnetic Field. *M. T. Brunetti & A. Codino.* 528, 789 (2000)

Submillimeter Polarimetric Observations of the Galactic Center. *G. Novak, J. L. Dotson, C. D. Dowell, R. H. Hildebrand, T. Renbarger, & D. A. Schleuning.* 529, 241 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

Confinement and Isotropization of Galactic Cosmic Rays by Molecular-Cloud Magnetic Mirrors When Turbulent Scattering Is Weak. *Benjamin D. G. Chandran.* 529, 513 (2000)

Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

ISM: MOLECULES

$C^{18}O$ Observations of the Dense Cloud Cores and Star Formation in Ophiuchus. *Kengo Tachihara, Akira Mizuno, & Yasuo Fukui.* 528, 817 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

H_2 Line Ratios to Discriminate Dense Photodissociation Regions from Shocks: Application to NGC 2023 and NGC 7023. *Takami Michihiro, Tomonori Usuda, Hajime Sugai, Hironobu Kawabata, Hiroshi Suto, & Masuo Tanaka.* 529, 268 (2000)

Laboratory Detection of a Molecular Band at λ4429. *C. D. Ball, M. C. McCarthy, & P. Thaddeus.* 529, L61 (2000)

Solid-State CO toward ρ Ophiuchi Elias 25: Ice Thresholds Revisited. *R. Young Shuping, Theodore P. Snow, Jean E. Chiar, & Thomas Kerr.* 529, 932 (2000)

Resolved CO (1→0) Nuclei in IRAS 14348−1447: Evidence for Massive Bulge Progenitors to Ultraluminous Infrared Galaxies. *A. S. Evans, J. A. Surace, & J. M. Mazzarella.* 529, L85 (2000)

Carbon Dioxide in Star-forming Regions. *S. B. Charnley & M. J. Kaufman.* 529, L111 (2000)

The Pure Rotational Spectrum of Gas-Phase $NaNH_2$ ($X\ ^1A_1$). *J. Xin, M. A. Brewster, & L. M. Ziurys.* 530, 323 (2000)

Laboratory Detection of Four New Cumulene Carbenes: H_2C_7, H_2C_8, H_2C_9, and D_2C_{10}. *A. J. Apponi, M. C. McCarthy, C. A. Gottlieb, & P. Thaddeus.* 530, 357 (2000)

Further Evidence for Carbon Isotopic Structure in the $\lambda\lambda$5797 and 6614 Diffuse Interstellar Bands. *Gordon A. H. Walker, David A. Bohlender, & Jacek Krełowski.* 530, 362 (2000)

Identification of New Methanol Lines toward Sagittarius B2. *C. C. Pei, Sheng-Yuan Liu, & Lewis E. Snyder.* 530, 800 (2000)

Extended Far-Infrared CO Emission in the OMC-1 Core of Orion. *María J. Sempere, José Cernicharo, Bertrand Lefloch, Eduardo González-Alfonso, & Sarah Leeks.* 530, L123 (2000)

O-bearing Molecules in Carbon-rich Proto–Planetary Objects. *F. Herpin & J. Cernicharo.* 530, L129 (2000)

ISM: PLANETARY NEBULAE: GENERAL

A *Hubble Space Telescope* Snapshot Survey of Proto–Planetary Nebula Candidates: Two Types of Axisymmetric Reflection Nebulosities. *Toshiya Ueta, Margaret Meixner, & Matthew Bobrowsky.* 528, 861 (2000)

Broad Hα Wing Formation in the Planetary Nebula IC 4997. *Hee-Won Lee & Siek Hyung.* 530, L49 (2000)

ISM: PLANETARY NEBULAE: INDIVIDUAL

Alphanumeric: CRL 618

O-bearing Molecules in Carbon-rich Proto–Planetary Objects. *F. Herpin & J. Cernicharo.* 530, L129 (2000)

Alphanumeric: IC 4997

Broad Hα Wing Formation in the Planetary Nebula IC 4997. *Hee-Won Lee & Siek Hyung.* 530, L49 (2000)

ISM: REFLECTION NEBULAE

A *Hubble Space Telescope* Snapshot Survey of Proto–Planetary Nebula Candidates: Two Types of Axisymmetric Reflection Nebulosities. *Toshiya Ueta, Margaret Meixner, & Matthew Bobrowsky.* 528, 861 (2000)

H_2 Line Ratios to Discriminate Dense Photodissociation Regions from Shocks: Application to NGC 2023 and NGC 7023. *Takami Michihiro, Tomonori Usuda, Hajime Sugai, Hironobu Kawabata, Hiroshi Suto, & Masuo Tanaka.* 529, 268 (2000)

Infrared Space Observatory Mid-Infrared Spectra of Reflection Nebulae. *K. I. Uchida, K. Sellgren, M. W. Werner, & M. L. Houdashelt.* 530, 817 (2000)

ISM: STRUCTURE

Composite Polytrope Models of Molecular Clouds. I. Theory. *Charles L. Curry & Christopher F. McKee.* 528, 734 (2000)

An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

Ne V Imaging of the Cygnus Loop. *Andrew H. Szentgyorgyi, John C. Raymond, John J. Hester, & Salvador Curiel.* 529, 279 (2000)

ISM: SUPERNOVA REMNANTS

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

ASCA Observations of the Quiescent X-Ray Counterpart to SGR 1627−41. *K. Hurley, T. Strohmayer, P. Li, C. Kouveliotou, P. Woods, J. Van Paradijs, T. Murakami, D. Hartmann, I. Smith, M. Ando, A. Yoshida, & M. Sugizaki.* 528, L21 (2000)

Inverse Bremsstrahlung in Shocked Astrophysical Plasmas. *Matthew G. Baring, Frank C. Jones, & Donald C. Ellison.* 528, 775 (2000)

Nucleosynthesis and Mixing in Cassiopeia A. *John P. Hughes, Cara E. Rakowski, David N. Burrows, & Patrick O. Slane.* 528, L109 (2000)

An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)

Spatial Variations of the Synchrotron Spectrum within Tycho's Supernova Remnant (3C 10): A Spectral Tomography Analysis of Radio Observations at 20 and 90 Centimeter Wavelengths. *D. M. Katz-Stone, N. E. Kassim, T. Joseph W. Lazio, & R. O'Donnell.* 529, 453 (2000)

KUIPER BELT, OORT CLOUD

Evidence for Early Stellar Encounters in the Orbital Distribution of Edgeworth–Kuiper Belt Objects. *Shigeru Ida, John Larwood, & Andreas Burkert.* 528, 351 (2000)

Circumstellar Dust Disks around Stars with Known Planetary Companions. *D. E. Trilling, R. H. Brown, & A. S. Rivkin.* 529, 499 (2000)

Population of the Scattered Kuiper Belt. *Chadwick A. Trujillo, David C. Jewitt, & Jane X. Luu.* 529, L103 (2000)

LINE: FORMATION

Excitation Mechanism of Near-Infrared [Fe II] Emission in Seyfert and Starburst Galaxies. *Hideaki Mouri, Kimiaki Kawara, & Yoshiaki Taniguchi.* 528, 186 (2000)

Mid-Infrared *Infrared Space Observatory* Spectroscopy of the Prototypical Liner NGC 1052: Shocks Reconsidered. *H. Sugai & M. A. Malkan.* 529, 219 (2000)

Further Evidence for Carbon Isotopic Structure in the λλ5797 and 6614 Diffuse Interstellar Bands. *Gordon A. H. Walker, David A. Bohlender, & Jacek Krełowski.* 530, 362 (2000)

Metallicity Effects in Non-LTE Model Atmospheres of Type Ia Supernovae. *Eric J. Lentz, E. Baron, David Branch, Peter H. Hauschildt, & Peter E. Nugent.* 530, 966 (2000)

LINE: IDENTIFICATION

Identification of SH $\Delta v = 1$ RO-Vibrational Lines in R Andromedae. *I. Yamamura, K. Kawaguchi, & S. T. Ridgway.* 528, L33 (2000)

Laboratory Detection of a Molecular Band at λ4429. *C. D. Ball, M. C. McCarthy, & P. Thaddeus.* 529, L61 (2000)

The Pure Rotational Spectrum of Gas-Phase $NaNH_2$ ($X\ ^1A_1$). *J. Xin, M. A. Brewster, & L. M. Ziurys.* 530, 323 (2000)

Laboratory Detection of Four New Cumulene Carbenes: H_2C_7, H_2C_8, H_2C_9, and D_2C_{10}. *A. J. Apponi, M. C. McCarthy, C. A. Gottlieb, & P. Thaddeus.* 530, 357 (2000)

Further Evidence for Carbon Isotopic Structure in the λλ5797 and 6614 Diffuse Interstellar Bands. *Gordon A. H. Walker, David A. Bohlender, & Jacek Krełowski.* 530, 362 (2000)

Identification of New Methanol Lines toward Sagittarius B2. *C. C. Pei, Sheng-Yuan Liu, & Lewis E. Snyder.* 530, 800 (2000)

Emission Lines in the Spectrum of the ^{3}He Star 3 Centauri A. *T. A. A. Sigut, J. D. Landstreet, & S. L. S. Shorlin.* 530, L89 (2000)

First Light Measurements of Capella with the Low-Energy Transmission Grating Spectrometer Aboard the *Chandra X-Ray Observatory*. *A. C. Brinkman, C. J. T. Gunsing, J. S. Kaastra, R. L. J. van der Meer, R. Mewe, F. Paerels, A. J. J. Raassen, J. J. van Rooijen, H. Bräuninger, W. Burkert, V. Burwitz, G. Hartner, P. Predehl, J.-U. Ness, J. H. M. M. Schmitt, J. J. Drake, O. Johnson, M. Juda, V. Kashyap, S. S. Murray, D. Pease, P. Ratzlaff, & B. J. Wargelin.* 530, L111 (2000)

Extended Far-Infrared CO Emission in the OMC-1 Core of Orion. *María J. Sempere, José Cernicharo, Bertrand Lefloch, Eduardo González-Alfonso, & Sarah Leeks.* 530, L123 (2000)

O-bearing Molecules in Carbon-rich Proto–Planetary Objects. *F. Herpin & J. Cernicharo.* 530, L129 (2000)

LINE: PROFILES

Magnetic Stress at the Marginally Stable Orbit: Altered Disk Structure, Radiation, and Black Hole Spin Evolution. *Eric Agol & Julian H. Krolik.* 528, 161 (2000)

Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

Extreme-Ultraviolet Spectral Line Widths in Quiet-Sun Coronal Plasmas at Distances of $1.03 \leq R_\odot \leq 1.45$ along the Solar Equatorial Plane. *G. A. Doschek & U. Feldman.* 529, 599 (2000)

Evidence for Doppler-shifted Iron Emission Lines in Black Hole Candidate 4U 1630−47. *Wei Cui, Wan Chen, & Shuang Nan Zhang.* 529, 952 (2000)

Non-Voigt Lyα Absorption Line Profiles. *P. J. Outram & R. F. Carswell.* 529, L73 (2000)

Environment of the Gamma-Ray Burst GRB 971214: A Giant H II Region Surrounded by a Galactic Supershell. *Sang-Hyeon Ahn.* 530, L9 (2000)

Broad Hα Wing Formation in the Planetary Nebula IC 4997. *Hee-Won Lee & Siek Hyung.* 530, L49 (2000)

Non-LTE Inversion of Stokes Profiles Induced by the Zeeman Effect. *H. Socas-Navarro, J. Trujillo Bueno, & B. Ruiz Cobo.* 530, 977 (2000)

MAGNETIC FIELDS

Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

Are Superflares on Solar Analogs Caused by Extrasolar Planets? *Eric P. Rubenstein & Bradley E. Schaefer.* 529, 1031 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

Chandra X-Ray Detection of the Radio Hot Spots of 3C 295. *D. E. Harris, P. E. J. Nulsen, T. J. Ponman, M. Bautz, R. A. Cameron, L. P. David, R. H. Donnelly, W. R. Forman, L. Grego, M. J. Hardcastle, J. P. Henry, C. Jones, J. P. Leahy, M. Markevitch, A. R. Martel, B. R. Mazzotta, W. Tucker, S. N. Virani, & J. Vrtilek.* 530, L81 (2000)

MAGNETOHYDRODYNAMICS: MHD

Global Magnetohydrodymanical Simulations of Accretion Tori. *John F. Hawley.* 528, 462 (2000)

Absorption and Scattering of Trapped Sound Waves by Nontrapped Sausage and Kink Modes on Slender Magnetic Flux Tubes. *W. J. Tirry.* 528, 493 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II. Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

Magnetic Flux Accumulation at the Galactic Center and Its Implications for the Strength of the Pregalactic Magnetic Field. *Benjamin D. G. Chandran, Steve C. Cowley, & Mark Morris.* 528, 723 (2000)

Magnetoacoustic Waves of Small Amplitude in Optically Thin Quasi-isentropic Plasmas. *Valery M. Nakariakov, César A. Mendoza-Briceño, & Miguel H. Ibáñez S.* 528, 767 (2000)

Winds from Luminous Late-Type Stars. I. The Effects of Nonlinear Alfvén Waves. *V. S. Airapetian, L. Ofman, R. D. Robinson, K. Carpenter, & J. Davila.* 528, 965 (2000)

Equilibrium and Stability of Magnetostatic Atmospheres. I. Dungey-Type Isothermal States. *B. C. Low & Ward Manchester IV.* 528, 1026 (2000)

Comparison of Transient Network Brightenings and Explosive Events in the Solar Transition Region. *Jongchul Chae, Haimin Wang, & Philip R. Goode.* 528, L119 (2000)

Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

The Magnetohydrodynamic Kelvin-Helmholtz Instability. III. The Role of Sheared Magnetic Field in Planar Flows. *Hyunji Jeong, Dongsu Ryu, T. W. Jones, & Adam Frank.* 529, 536 (2000)

Statistical Analysis of the Energy Distribution of Nanoflares in the Quiet Sun. *C. E. Parnell & P. E. Jupp.* 529, 554 (2000)

Temperature Structure of the Quiet Corona: An SXT-SUMER Discrepancy. *Richard Wolfson, Colin B. Roald, P. A. Sturrock, J. Lemen, & P. Shirts.* 529, 570 (2000)

UVCS WLC Observations of Compressional Waves in the South Polar Coronal Hole. *L. Ofman, M. Romoli, G. Poletto, G. Noci, & J. L. Kohl.* 529, 592 (2000)

A Twisted Flux Rope Model for Coronal Mass Ejections and Two-Ribbon Flares. *T. Amari, J. F. Luciani, Z. Mikic, & J. Linker.* 529, L49 (2000)

Consistency of Ambipolar Diffusion Models with Infall in the L1544 Protostellar Core. *Glenn E. Ciolek & Shantanu Basu.* 529, 925 (2000)

Magnetic Field Limitations on Advection-dominated Flows. *G. S. Bisnovatyi-Kogan & R. V. E. Lovelace.* 529, 978 (2000)

The Effect of Resistivity on the Nonlinear Stage of the Magnetorotational Instability in Accretion Disks. *Timothy P. Fleming, James M. Stone, & John F. Hawley.* 530, 464 (2000)

Radio Astronomical Constraints on Coronal Heating by High-Frequency Alfvén Waves. *Steven R. Spangler & Salvatore Mancuso.* 530, 491 (2000)

High-Order Upwind Schemes for Multidimensional Magnetohydrodynamics. *P. Londrillo & L. Del Zanna.* 530, 508 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

Stellar Winds, Dead Zones, and Coronal Mass Ejections. *R. Keppens & J. P. Goedbloed.* 530, 1036 (2000)

MASERS

A Submillimeter HCN Laser in IRC +10216. *Peter Schilke, David M. Mehringer, & Karl M. Menten.* 528, L37 (2000)

Maser Radiation in a Keplerian Disk. *W. D. Watson & H. W. Wyld.* 530, 207 (2000)

Radio Continuum Emission at OH and H_2O Maser Sites. *J. R. Forster & J. L. Caswell.* 530, 371 (2000)

Hubble Space Telescope and Very Large Array Observations of the H_2O Gigamaser Galaxy TXS 2226−184. *Heino Falcke, Andrew S. Wilson, Christian Henkel, Andreas Brunthaler, & James A. Braatz.* 530, L13 (2000)

METHODS: ANALYTICAL

Preconditioning the Differential Emission Measure (T_e) Inverse Problem. *S. W. McIntosh, P. Charbonneau, & J. C. Brown.* 529, 1115 (2000)

METHODS: DATA ANALYSIS

Random-Lag Singular Cross-Spectrum Analysis. *F. Varadi, R. K. Ulrich, L. Bertello, & C. J. Henney.* 528, L53 (2000)

Two-dimensional Modeling of the Solar Oscillation l-ν Power Spectrum. *Nadège Meunier & Stuart M. Jefferies.* 530, 1016 (2000)

Influence of the Stellar Population on Type Ia Supernovae: Consequences for the Determination of Ω. *P. Höflich, K. Nomoto, H. Umeda, & J. C. Wheeler.* 528, 590 (2000)

Multiple Scattering in Clumpy Media. II. Galactic Environments. *Adolf N. Witt & Karl D. Gordon.* 528, 799 (2000)

Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

Formation of Subgalactic Clumps under Ultraviolet Background Radiation. *Tetsu Kitayama & Satoru Ikeuchi.* 529, 615 (2000)

The Surprisingly Weak Effect of Gravity in Retarding Hot-Star Wind Acceleration. *K. G. Gayley.* 529, 1019 (2000)

Infrared Space Observatory Spectroscopy of Extreme Carbon Stars. *Kevin Volk, Guan-Zhu Xiong, & Sun Kwok.* 530, 408 (2000)

Broad Hα Wing Formation in the Planetary Nebula IC 4997. *Hee-Won Lee & Siek Hyung.* 530, L49 (2000)

The Physics of Type Ia Supernova Light Curves. I. Analytic Results and Time Dependence. *Philip A. Pinto & Ronald G. Eastman.* 530, 744 (2000)

The Physics of Type Ia Supernova Light Curves. II. Opacity and Diffusion. *Philip A. Pinto & Ronald G. Eastman.* 530, 757 (2000)

Metallicity Effects in Non-LTE Model Atmospheres of Type Ia Supernovae. *Eric J. Lentz, E. Baron, David Branch, Peter H. Hauschildt, & Peter E. Nugent.* 530, 966 (2000)

Non-LTE Inversion of Stokes Profiles Induced by the Zeeman Effect. *H. Socas-Navarro, J. Trujillo Bueno, & B. Ruiz Cobo.* 530, 977 (2000)

Extended Far-Infrared CO Emission in the OMC-1 Core of Orion. *María J. Sempere, José Cernicharo, Bertrand Lefloch, Eduardo González-Alfonso, & Sarah Leeks.* 530, L123 (2000)

RADIO CONTINUUM: GALAXIES

Sensitive Radio Observations of High-Redshift Dusty QSOs. *M. S. Yun, C. L. Carilli, R. Kawabe, Y. Tutui, K. Kohno, & K. Ohta.* 528, 171 (2000)

Radio Constraints on the Identifications and Redshifts of Submillimeter Galaxies. *Ian Smail, R. J. Ivison, F. N. Owen, A. W. Blain, & J.-P. Kneib.* 528, 612 (2000)

Superdisks in Radio Galaxies. *Gopal-Krishna & Paul J. Wiita.* 529, 189 (2000)

Radio and Millimeter Spectral Properties of Newly Identified High-Energy Gamma-Ray Sources. *S. D. Bloom, J. Hallum, H. Teräsranta, & M. Tornikoski.* 529, 675 (2000)

Compact Radio Sources with the Steepest Spectra. *D. L. Kaplan, J. M. Cordes, J. J. Condon, & S. G. Djorgovski.* 529, 859 (2000)

Resolved CO (1→0) Nuclei in IRAS 14348−1447: Evidence for Massive Bulge Progenitors to Ultraluminous Infrared Galaxies. *A. S. Evans, J. A. Surace, & J. M. Mazzarella.* 529, L85 (2000)

Double Radio Sources: Two Approaches. *M. J. Valtonen & P. Heinämäki.* 530, 107 (2000)

VLBA Absorption Imaging of Ionized Gas Associated with the Accretion Disk in NGC 1275. *R. C. Walker, V. Dhawan, J. D. Romney, K. I. Kellermann, & R. C. Vermeulen.* 530, 233 (2000)

Space VLBI Observations of 3C 371. *José-Luis Gómez & Alan P. Marscher.* 530, 245 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

The Scatter in the Relationship between Redshift and the Radio-to-Submillimeter Spectral Index. *C. L. Carilli & Min S. Yun.* 530, 618 (2000)

Compact Radio Emission from Warm Infrared Galaxies. *L. J. Kewley, C. A. Heisler, M. A. Dopita, R. Sutherland, R. P. Norris, J. Reynolds, & S. Lumsden.* 530, 704 (2000)

X-Ray–emitting Atmospheres of B2 Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 530, 719 (2000)

RADIO CONTINUUM: GENERAL

Spatial Variations of the Synchrotron Spectrum within Tycho's Supernova Remnant (3C 10): A Spectral Tomography Analysis of Radio Observations at 20 and 90 Centimeter Wavelengths. *D. M. Katz-Stone, N. E. Kassim, T. Joseph W. Lazio, & R. O'Donnell.* 529, 453 (2000)

RADIO CONTINUUM: ISM

What is Hatching in the Egg? *M. Jura, J. L. Turner, S. Van Dyk, & G. R. Knapp.* 528, L105 (2000)

RADIO CONTINUUM: STARS

Simultaneous X-Ray and Radio Monitoring of the Unusual Binary LS I +61°303: Measurements of the Light Curve and High-Energy Spectrum. *F. A. Harrison, P. S. Ray, D. A. Leahy, E. B. Waltman, & G. G. Pooley.* 528, 454 (2000)

The Mode-separated Pulse Profiles of Pulsar Radio Emission. *Mark M. McKinnon & Daniel R. Stinebring.* 529, 435 (2000)

Unveiling the Circumstellar Envelope and Disk: A Subarcsecond Survey of Circumstellar Structures. *Leslie W. Looney, Lee G. Mundy, & W. J. Welch.* 529, 477 (2000)

Compact Radio Sources with the Steepest Spectra. *D. L. Kaplan, J. M. Cordes, J. J. Condon, & S. G. Djorgovski.* 529, 859 (2000)

VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)

Discovery of Circularly Polarized Radio Emission from SS 433. *Robert Fender, David Rayner, Ray Norris, R. J. Sault, & Guy Pooley.* 530, L29 (2000)

RADIO LINES: GALAXIES

Kinematics of Ionized and Molecular Hydrogen in the Core of M100. *J. H. Knapen, I. Shlosman, C. H. Heller, R. J. Rand, J. E. Beckman, & M. Rozas.* 528, 219 (2000)

New CO and Millimeter Continuum Observations of the z = 2.394 Radio Galaxy 53W002. *Danielle Alloin, Richard Barvainis, & Stephane Guilloteau.* 528, L81 (2000)

An Observational Test of Dark Matter as Cold Fractal Clouds. *Judith A. Irwin, Lawrence M. Widrow, & Jayanne English.* 529, 77 (2000)

RADIO LINES: GENERAL

Radio Signatures of H I at High Redshift: Mapping the End of the "Dark Ages." *Paolo Tozzi, Piero Madau, Avery Meiksin, & Martin J. Rees.* 528, 597 (2000)

RADIO LINES: ISM

C^{18}O Observations of the Dense Cloud Cores and Star Formation in Ophiuchus. *Kengo Tachihara, Akira Mizuno, & Yasuo Fukui.* 528, 817 (2000)

An Infrared and Radio Study of the Galactic Worm GW 46.4+5.5. *Kee-Tae Kim & Bon-Chul Koo.* 529, 229 (2000)

Laboratory Detection of Four New Cumulene Carbenes: H_2C_7, H_2C_8, H_2C_9, and D_2C_{10}. *A. J. Apponi, M. C. McCarthy, C. A. Gottlieb, & P. Thaddeus.* 530, 357 (2000)

The Space Density of Primordial Gas Clouds near Galaxies and Groups and Their Relation to Galactic High-Velocity Clouds. *Martin A. Zwaan & Frank H. Briggs.* 530, L61 (2000)

RELATIVITY

Magnetic Stress at the Marginally Stable Orbit: Altered Disk Structure, Radiation, and Black Hole Spin Evolution. *Eric Agol & Julian H. Krolik.* 528, 161 (2000)

Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)

On the Maximum Mass of Differentially Rotating Neutron Stars. *Thomas W. Baumgarte, Stuart L. Shapiro, & Masaru Shibata.* 528, L29 (2000)

Relativistic Dynamos in Magnetospheres of Rotating Compact Objects. *Akira Tomimatsu.* 528, 972 (2000)

Radio Emission from Three-dimensional Relativistic Hydrodynamic Jets: Observational Evidence of Jet Stratification. *Miguel-Angel Aloy, José-Luis Gómez, José-María Ibáñez, José-María Martí, & Ewald Müller.* 528, L85 (2000)

The Dynamics of a Viscous Gas Ring around a Kerr Black Hole. *H. Riffert.* 529, 119 (2000)

Modeling the X-Ray Timing Properties of Cygnus X-1 Caused by Waves Propagating in a Transition Disk. *R. Misra.* 529, L95 (2000)

SCATTERING

The Scattering of X-Rays by Interstellar Dust on the Microarcsecond Scale. *David L. Windt, Webster Cash, & Steven M. Kahn.* 528, 306 (2000)

Broad Hα Wing Formation in the Planetary Nebula IC 4997. *Hee-Won Lee & Siek Hyung.* 530, L49 (2000)

SHOCK WAVES

Magnetoacoustic Waves of Small Amplitude in Optically Thin Quasi-isentropic Plasmas. *Valery M. Nakariakov, César A. Mendoza-Briceño, & Miguel H. Ibáñez S.* 528, 767 (2000)

Interplanetary and Interacting Protons Accelerated in a Parallel Shock Wave. *R. Vainio, L. Kocharov, & T. Laitinen.* 528, 1015 (2000)

On Beaming Effects in Afterglow Light Curves. *R. Moderski, M. Sikora, & T. Bulik.* 529, 151 (2000)

Ne v Imaging of the Cygnus Loop. *Andrew H. Szentgyorgyi, John C. Raymond, John J. Hester, & Salvador Curiel.* 529, 279 (2000)

The Ionized Gas Kinematics of the LMC-Type Galaxy NGC 1427A in the Fornax Cluster. *J. Chanamé, L. Infante, & A. Reisenegger.* 530, 96 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

SOLAR SYSTEM: FORMATION

Evidence for Early Stellar Encounters in the Orbital Distribution of Edgeworth–Kuiper Belt Objects. *Shigeru Ida, John Larwood, & Andreas Burkert.* 528, 351 (2000)

Circumstellar Dust Disks around Stars with Known Planetary Companions. *D. E. Trilling, R. H. Brown, & A. S. Rivkin.* 529, 499 (2000)

An Experimental Study on the Structure of Cosmic Dust Aggregates and Their Alignment by Motion Relative to Gas. *Gerhard Wurm & Jürgen Blum.* 529, L57 (2000)

The Effects of Thermal Energetics on Three-dimensional Hydrodynamic Instabilities in Massive Protostellar Disks. II. High-Resolution and Adiabatic Evolutions. *Brian K. Pickett, Patrick Cassen, Richard H. Durisen, & Robert Link.* 529, 1034 (2000)

Population of the Scattered Kuiper Belt. *Chadwick A. Trujillo, David C. Jewitt, & Jane X. Luu.* 529, L103 (2000)

SPACE VEHICLES

Iron Line Reverberation Mapping with *Constellation-X*. *A. J. Young & C. S. Reynolds.* 529, 101 (2000)

STARS: ABUNDANCES

The Evolution of AmFm Stars, Abundance Anomalies, and Turbulent Transport. *J. Richer, G. Michaud, & S. Turcotte.* 529, 338 (2000)

Prompt Iron Enrichment, Two *r*-Process Components, and Abundances in Very Metal Poor Stars. *G. J. Wasserburg & Y.-Z. Qian.* 529, L21 (2000)

The First Stellar Abundance Measurements in the Galactic Center: The M Supergiant IRS 7. *John S. Carr, K. Sellgren, & Suchitra C. Balachandran.* 530, 307 (2000)

Coronal Structure and Abundances of Capella from Simultaneous *EUVE* and *ASCA* Spectroscopy. *N. S. Brickhouse, A. K. Dupree, R. J. Edgar, D. A. Liedahl, S. A. Drake, N. E. White, & K. P. Singh.* 530, 387 (2000)

The *r*-Process–enriched Low-Metallicity Giant HD 115444. *Jenny Westin, Christopher Sneden, Bengt Gustafsson, & John J. Cowan.* 530, 783 (2000)

A Uniform Analysis of Boron in F and G Disk Dwarfs from *Hubble Space Telescope* Archival Spectra. *Katia Cunha, Verne V. Smith, Ann M. Boesgaard, & David L. Lambert.* 530, 939 (2000)

O-bearing Molecules in Carbon-rich Proto–Planetary Objects. *F. Herpin & J. Cernicharo.* 530, L129 (2000)

STARS: ACTIVITY

Infrared Spectroscopy of the Secondary Star in ST Leonis Minoris: Implications for Evolution and High-/Low-State Behavior in Cataclysmic Variables. *Steve B. Howell, David R. Ciardi, V. S. Dhillon, & Warren Skidmore.* 530, 904 (2000)

STARS: AGB AND POST-AGB

Identification of SH Δv = 1 RO-Vibrational Lines in R Andromedae. *I. Yamamura, K. Kawaguchi, & S. T. Ridgway.* 528, L33 (2000)

A Submillimeter HCN Laser in IRC +10216. *Peter Schilke, David M. Mehringer, & Karl M. Menten.* 528, L37 (2000)

A *Hubble Space Telescope* Snapshot Survey of Proto–Planetary Nebula Candidates: Two Types of Axisymmetric Reflection Nebulosities. *Toshiya Ueta, Margaret Meixner, & Matthew Bobrowsky.* 528, 861 (2000)

Calibrating the Mixing-Length Parameter for a Red Giant Envelope. *S. M. Asida.* 528, 896 (2000)

What is Hatching in the Egg? *M. Jura, J. L. Turner, S. Van Dyk, & G. R. Knapp.* 528, L105 (2000)

STARS: ATMOSPHERES

Identification of SH Δv = 1 RO-Vibrational Lines in R Andromedae. *I. Yamamura, K. Kawaguchi, & S. T. Ridgway.* 528, L33 (2000)

Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

Calibrating the Mixing-Length Parameter for a Red Giant Envelope. *S. M. Asida.* 528, 896 (2000)

A Method for Distinguishing between Transiently Accreting Neutron Stars and Black Holes, in Quiescence. *Robert E. Rutledge, Lars Bildsten, Edward F. Brown, George G. Pavlov, & Vyatcheslav E. Zavlin.* 529, 985 (2000)

Metallicity Effects in Non-LTE Model Atmospheres of Type Ia Supernovae. *Eric J. Lentz, E. Baron, David Branch, Peter H. Hauschildt, & Peter E. Nugent.* 530, 966 (2000)

STARS: BINARIES: CLOSE

Supernovae Rates: A Cosmic History. *Lev R. Yungelson & Mario Livio.* 528, 108 (2000)

Simultaneous X-Ray and Radio Monitoring of the Unusual Binary LS I +61°303: Measurements of the Light Curve and High-Energy Spectrum. *F. A. Harrison, P. S. Ray, D. A. Leahy, E. B. Waltman, & G. G. Pooley.* 528, 454 (2000)

Black Hole Mergers in the Universe. *Simon F. Portegies Zwart & Stephen L. W. McMillan.* 528, L17 (2000)

LMC X-2: The First Extragalactic Z Source? *Alan P. Smale & Erik Kuulkers.* 528, 702 (2000)

A Theoretical Light-Curve Model for the 1999 Outburst of U Scorpii. *Izumi Hachisu, Mariko Kato, Taichi Kato, & Katsura Matsumoto.* 528, L97 (2000)

VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)

Analyzing X-Ray Pulsar Profiles: Geometry and Beam Pattern of Hercules X-1. *S. Blum & U. Kraus.* 529, 968 (2000)

The Evolutionary Status of SS 433. *Andrew R. King, Ronald E. Taam, & Mitchell C. Begelman.* 530, L25 (2000)

An Upper Limit on the Coalescence Rate of Double Neutron-Star Binaries in the Galaxy. *Vassiliki Kalogera & Duncan R. Lorimer.* 530, 890 (2000)

Formation of Millisecond Pulsars with Heavy White Dwarf Companions: Extreme Mass Transfer on Subthermal Timescales. *Thomas M. Tauris, Edward P. J. van den Heuvel, & Gerrit J. Savonije.* 530, L93 (2000)

STARS: BINARIES: ECLIPSING

The Large Magellanic Cloud Eclipsing Binary HV 2274: Fundamental Properties and Comparison with Evolutionary Models. *Ignasi Ribas, Edward F. Guinan, Edward L. Fitzpatrick, Laurence E. DeWarf, Frank P.*

Maloney, Philip A. Maurone, David H. Bradstreet, Álvaro Giménez, & John D. Pritchard. 528, 692 (2000)

Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

Optical Observations of the Binary Pulsar System PSR B1718−19: Implications for Tidal Circularization. *M. H. van Kerkwijk, V. M. Kaspi, A. R. Klemola, S. R. Kulkarni, A. G. Lyne, & D. Van Buren.* 529, 428 (2000)

Light Curve Solution of HD 93205 (O3 V + O8 V) Containing the Earliest Known Star in a Well-studied Binary. *Eleonora A. Antokhina, Anthony F. J. Moffat, Igor I. Antokhin, Jean-François Bertrand, & Robert Lamontagne.* 529, 463 (2000)

Detection of Planetary Transits across a Sun-like Star. *David Charbonneau, Timothy M. Brown, David W. Latham, & Michel Mayor.* 529, L45 (2000)

STARS: BINARIES: GENERAL

Detection Efficiencies of Microlensing Data Sets to Stellar and Planetary Companions. *B. Scott Gaudi & Penny D. Sackett.* 528, 56 (2000)

The Jeans Condition and Collapsing Molecular Cloud Cores: Filaments or Binaries? *Alan P. Boss, Robert T. Fisher, Richard I. Klein, & Christopher F. McKee.* 528, 325 (2000)

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

Nonaxisymmetric Dynamic Instabilities of Rotating Polytropes. II. Torques, Bars, and Mode Saturation with Applications to Protostars and Fizzlers. *James N. Imamura, Richard H. Durisen, & Brian K. Pickett.* 528, 946 (2000)

Asteroseismology of the Multiply Periodic δ Scuti Star θ Tucanae. *Matthew R. Templeton, Paul A. Bradley, & Joyce A. Guzik.* 528, 979 (2000)

η Carinae: Binarity Confirmed. *Augusto Damineli, Andreas Kaufer, Bernhard Wolf, Otmar Stahl, Dalton F. Lopes, & Francisco X. de Araújo.* 528, L101 (2000)

The Discovery of a Companion to the Very Cool Dwarf Gliese 569B with the Keck Adaptive Optics Facility. *E. L. Martín, C. D. Koresko, S. R. Kulkarni, B. F. Lane, & P. L. Wizinowich.* 529, L37 (2000)

Cygnus X-2: The Descendant of an Intermediate-Mass X-Ray Binary. *Ph. Podsiadlowski & S. Rappaport.* 529, 946 (2000)

Evidence for Doppler-shifted Iron Emission Lines in Black Hole Candidate 4U 1630−47. *Wei Cui, Wan Chen, & Shuang Nan Zhang.* 529, 952 (2000)

The Temperature and Cooling Age of the White Dwarf Companion to the Millisecond Pulsar PSR B1855+09. *M. H. van Kerkwijk, J. F. Bell, V. M. Kaspi, & S. R. Kulkarni.* 530, L37 (2000)

Infrared Spectroscopy of the Secondary Star in ST Leonis Minoris: Implications for Evolution and High-/Low-State Behavior in Cataclysmic Variables. *Steve B. Howell, David R. Ciardi, V. S. Dhillon, & Warren Skidmore.* 530, 904 (2000)

STARS: BINARIES: SPECTROSCOPIC

Coronal Structure and Abundances of Capella from Simultaneous *EUVE* and *ASCA* Spectroscopy. *N. S. Brickhouse, A. K. Dupree, R. J. Edgar, D. A. Liedahl, S. A. Drake, N. E. White, & K. P. Singh.* 530, 387 (2000)

STARS: BINARIES: SYMBIOTIC

The R Aquarii Jet: A Lorentz Force–driven Parcel Model. *J. M. Hollis & T. Koupelis.* 528, 418 (2000)

Behr, S. G. Djorgovski, Judith G. Cohen, James K. McCarthy, Patrick Côté, Giampaolo Piotto, & Manuela Zoccali. 528, 849 (2000)

Hubble Space Telescope Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri. *Noella L. D'Cruz, Robert W. O'Connell, Robert T. Rood, Jonathan H. Whitney, Ben Dorman, Wayne B. Landsman, Robert S. Hill, Theodore P. Stecher, & Ralph C. Bohlin.* 530, 352 (2000)

STARS: INDIVIDUAL

Constellation Name: υ Andromedae

Stability Analysis of the Planetary System Orbiting υ Andromedae. *Eugenio J. Rivera & Jack J. Lissauer.* 530, 454 (2000)

Constellation Name: R Andromedae

Identification of SH Δv = 1 RO-Vibrational Lines in R Andromedae. *I. Yamamura, K. Kawaguchi, & S. T. Ridgway.* 528, L33 (2000)

Constellation Name: Aquila X-1

Correlated Timing and Spectral Variations of the Soft X-Ray Transient Aquila X-1: Evidence for an Atoll Classification. *P. Reig, M. Méndez, M. van der Klis, & E. C. Ford.* 530, 916 (2000)

Constellation Name: UX Arietis

VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)

Constellation Name: η Carinae

η Carinae: Binarity Confirmed. *Augusto Damineli, Andreas Kaufer, Bernhard Wolf, Otmar Stahl, Dalton F. Lopes, & Francisco X. de Araújo.* 528, L101 (2000)

Recent Changes in the Near-Infrared Structure of η Carinae. *Nathan Smith & Robert D. Gehrz.* 529, L99 (2000)

Does Turbulence in the Iron Convection Zone Cause the Massive Outburst of η Carinae? *Richard B. Stothers.* 530, L103 (2000)

η Carinae: Testing a Binary Orbit Model with the *Hubble Space Telescope*/Space Telescope Imaging Spectrograph. *Kris Davidson, Kazunori Ishibashi, Theodore R. Gull, Roberta M. Humphreys, & Nathan Smith.* 530, L107 (2000)

Constellation Name: Centaurus X-3

The 0.1–100 keV Spectrum of Centaurus X-3: Pulse Phase Spectroscopy of the Cyclotron Line and Magnetic Field Structure. *L. Burderi, T. Di Salvo, N. R. Robba, A. La Barbera, & M. Guainazzi.* 530, 429 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

Constellation Name: 3 Centauri A

Emission Lines in the Spectrum of the ^{3}He Star 3 Centauri A. *T. A. A. Sigut, J. D. Landstreet, & S. L. S. Shorlin.* 530, L89 (2000)

Constellation Name: κ Ceti

Are Superflares on Solar Analogs Caused by Extrasolar Planets? *Eric P. Rubenstein & Bradley E. Schaefer.* 529, 1031 (2000)

Constellation Name: Cygnus X-1

Modeling the X-Ray Timing Properties of Cygnus X-1 Caused by Waves Propagating in a Transition Disk. *R. Misra.* 529, L95 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

Constellation Name: Cygnus X-2

Changes in the Long-Term Intensity Variations in Cygnus X-2 and LMC X-3. *B. Paul, S. Kitamoto, & F. Makino.* 528, 410 (2000)

Cygnus X-2: The Descendant of an Intermediate-Mass X-Ray Binary. *Ph. Podsiadlowski & S. Rappaport.* 529, 946 (2000)

Constellation Name: ϵ Eridani

Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

Constellation Name: Hercules X-1

Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

Constellation Name: ST Leonis Minoris

Infrared Spectroscopy of the Secondary Star in ST Leonis Minoris: Implications for Evolution and High-/Low-State Behavior in Cataclysmic Variables. *Steve B. Howell, David R. Ciardi, V. S. Dhillon, & Warren Skidmore.* 530, 904 (2000)

Constellation Name: α Orionis

Winds from Luminous Late-Type Stars. I. The Effects of Nonlinear Alfvén Waves. *V. S. Airapetian, L. Ofman, R. D. Robinson, K. Carpenter, & J. Davila.* 528, 965 (2000)

Constellation Name: β Pictoris

Rings in the Planetesimal Disk of β Pictoris. *P. Kalas, J. Larwood, B. A. Smith, & A. Schultz.* 530, L133 (2000)

Constellation Name: V4641 Sagittarii

The Rapid X-Ray Variability of V4641 Sagittarii (SAX J1819.3−2525=XTE J1819−254. *Rudy Wijnands & Michiel van der Klis.* 528, L93 (2000)

Constellation Name: U Scorpii

A Theoretical Light-Curve Model for the 1999 Outburst of U Scorpii. *Izumi Hachisu, Mariko Kato, Taichi Kato, & Katsura Matsumoto.* 528, L97 (2000)

Constellation Name: θ Tucanae

Asteroseismology of the Multiply Periodic δ Scuti Star θ Tucanae. *Matthew R. Templeton, Paul A. Bradley, & Joyce A. Guzik.* 528, 979 (2000)

Constellation Name: π^1 Ursae Majoris

Are Superflares on Solar Analogs Caused by Extrasolar Planets? *Eric P. Rubenstein & Bradley E. Schaefer.* 529, 1031 (2000)

Constellation Name: α Ursae Majoris A

Evolutionary Model and Oscillation Frequencies for α Ursae Majoris: A Comparison with Observations. *D. B. Guenther, P. Demarque, D. Buzasi, J. Catanzarite, R. Laher, T. Conrow, & T. Kreidl.* 530, L45 (2000)

Constellation Name: α Virginis

Far-Ultraviolet Absolute Flux of α Virginis. *Carmen Morales, Joaquín Trapero, José F. Gómez, Álavro Giménez, Verónica Orozco, Stuart Bowyer, Jerry Edelstein, Eric Korpela, Michael Lampton, & Jeff Cobb.* 530, 403 (2000)

Bright Star Number: HR 4796A

Deep 10 and 18 Micron Imaging of the HR 4796A Circumstellar Disk: Transient Dust Particles and Tentative Evidence for a Brightness Asymmetry. *C. M. Telesco, R. S. Fisher, R. K. Piña, R. F. Knacke, S. F. Dermott, M. C. Wyatt, K. Grogan, E. K. Holmes, A. M. Ghez, L. Prato, L. W. Hartmann, & R. Jayawardhana.* 530, 329 (2000)

Henry Draper Number: HD 93025

Light Curve Solution of HD 93205 (O3 V + O8 V) Containing the Earliest Known Star in a Well-studied Binary. *Eleonora A. Antokhina, Anthony F. J. Moffat, Igor I. Antokhin, Jean-François Bertrand, & Robert Lamontagne.* 529, 463 (2000)

Henry Draper Number: HD 209458

A Transiting "51 Peg–like" Planet. *Gregory W. Henry, Geoffrey W. Marcy, R. Paul Butler, & Steven S. Vogt.* 529, L41 (2000)

Detection of Planetary Transits across a Sun-like Star. *David Charbonneau, Timothy M. Brown, David W. Latham, & Michel Mayor.* 529, L45 (2000)

Name: Capella

Coronal Structure and Abundances of Capella from Simultaneous *EUVE* and *ASCA* Spectroscopy. *N. S. Brickhouse, A. K. Dupree, R. J. Edgar, D. A. Liedahl, S. A. Drake, N. E. White, & K. P. Singh.* 530, 387 (2000)

First Light Measurements of Capella with the Low-Energy Transmission Grating Spectrometer Aboard the *Chandra X-Ray Observatory*. *A. C. Brinkman, C. J. T. Gunsing, J. S. Kaastra, R. L. J. van der Meer, R. Mewe, F. Paerels, A. J. J. Raasen, J. J. van Rooijen, H. Bräuninger, W. Burkert, V. Burwitz, G. Hartner, P. Predehl, J.-U. Ness, J. H. M. M. Schmitt, J. J. Drake, O. Johnson, M. Juda, V. Kashyap, S. S. Murray, D. Pease, P. Ratzlaff, & B. J. Wargelin.* 530, L111 (2000)

Name: Groombridge 1830

Model Photospheres for Late-Type Stars from the Inversion of High-Resolution Spectroscopic Observations: Groombridge 1830 and ϵ Eridani. *Carlos Allende Prieto, Ramón J. García López, David L. Lambert, & Basilio Ruiz Cobo.* 528, 885 (2000)

Alphanumeric: Gl 569

The Discovery of a Companion to the Very Cool Dwarf Gliese 569B with the Keck Adaptive Optics Facility. *E. L. Martín, C. D. Koresko, S. R. Kulkarni, B. F. Lane, & P. L. Wizinowich.* 529, L37 (2000)

Alphanumeric: GS 1354−644

Rossi X-Ray Timing Explorer Observations of an Outburst of Recurrent X-Ray Nova GS 1354−644. *Mikhail G. Revnivtsev, Konstantin N. Borozdin, William C. Priedhorsky, & Alexey Vikhlinin.* 530, 955 (2000)

Alphanumeric: HV 2274

The Large Magellanic Cloud Eclipsing Binary HV 2274: Fundamental Properties and Comparison with Evolutionary Models. *Ignasi Ribas, Edward F. Guinan, Edward L. Fitzpatrick, Laurence E. DeWarf, Frank P. Maloney, Philip A. Maurone, David H. Bradstreet, Álvaro Giménez, & John D. Pritchard.* 528, 692 (2000)

Alphanumeric: IRC +10216

Laboratory Detection of Four New Cumulene Carbenes: H_2C_7, H_2C_8, H_2C_9, and D_2C_{10}. *A. J. Apponi, M. C. McCarthy, C. A. Gottlieb, & P. Thaddeus.* 530, 357 (2000)

Alphanumeric: LMC X-2

LMC X-2: The First Extragalactic Z Source? *Alan P. Smale & Erik Kuulkers.* 528, 702 (2000)

Alphanumeric: LMC X-3

Changes in the Long-Term Intensity Variations in Cygnus X-2 and LMC X-3. *B. Paul, S. Kitamoto, & F. Makino.* 528, 410 (2000)

Alphanumeric: LS I +61°303

Simultaneous X-Ray and Radio Monitoring of the Unusual Binary LS I +61°303: Measurements of the Light Curve and High-Energy Spectrum. *F. A. Harrison, P. S. Ray, D. A. Leahy, E. B. Waltman, & G. G. Pooley.* 528, 454 (2000)

Alphanumeric: RX J0812.4−3114

The Orbital Period of the Be/Neutron Star Binary RX J0812.4−3114. *Robin H. D. Corbet & Andrew G. Peele.* 530, L33 (2000)

Alphanumeric: SAX J0635+0533

Detection of 33.8 Millisecond X-Ray Pulsations in SAX J0635+0533. *G. Cusumano, M. C. Maccarone, L. Nicastro, & B. Sacco.* 528, L25 (2000)

Alphanumeric: SS 433

The Evolutionary Status of SS 433. *Andrew R. King, Ronald E. Taam, & Mitchell C. Begelman.* 530, L25 (2000)

Discovery of Circularly Polarized Radio Emission from SS 433. *Robert Fender, David Rayner, Ray Norris, R. J. Sault, & Guy Pooley.* 530, L29 (2000)

Alphanumeric: 4U 1630−47

Evidence for Doppler-shifted Iron Emission Lines in Black Hole Candidate 4U 1630−47. *Wei Cui, Wan Chen, & Shuang Nan Zhang.* 529, 952 (2000)

STARS: INTERIORS

Presupernova Evolution of Rotating Massive Stars. I. Numerical Method and Evolution of the Internal Stellar Structure. *A. Heger, N. Langer, & S. E. Woosley.* 528, 368 (2000)

The Energetics of Crystallizing White Dwarfs Revisited Again. *J. Isern, E. García-Berro, M. Hernanz, & G. Chabrier.* 528, 397 (2000)

Calibrating the Mixing-Length Parameter for a Red Giant Envelope. *S. M. Asida.* 528, 896 (2000)

Physical Properties of Laminar Helium Deflagrations. *F. X. Timmes.* 528, 913 (2000)

Classical Cepheid Pulsation Models. III. The Predictable Scenario. *Giuseppe Bono, Vittorio Castellani, & Marcella Marconi.* 529, 293 (2000)

Isochrones and Luminosity Functions for Old White Dwarfs. *Harvey B. Richer, Brad Hansen, Marco Limongi, Alessandro Chieffi, Oscar Straniero, & Gregory G. Fahlman.* 529, 318 (2000)

The Evolution of AmFm Stars, Abundance Anomalies, and Turbulent Transport. *J. Richer, G. Michaud, & S. Turcotte.* 529, 338 (2000)

Examination of Scaling Relationships Involving Penetration Distance at the Bottom of a Stellar Convective Envelope. *E. Saikia, Harinder P. Singh, K. L. Chan, I. W. Roxburgh, & M. P. Srivastava.* 529, 402 (2000)

The Origin of Extremely Metal Poor Carbon Stars and the Search for Population III. *Masayuki Y. Fujimoto, Yasufumi Ikeda, & Icko Iben, Jr.* 529, L25 (2000)

Globular Cluster Giant Branch Luminosity Functions: "Extra Stars" and "Deep Mixing." *G. E. Langer, Michael Bolte, & Eric Sandquist.* 529, 936 (2000)

Detection of p-Mode Pulsations and Possible Ellipsoidal Luminosity Variations in the Hot Subdwarf B Star KPD 1930+2752. *M. Billéres, G. Fontaine, P. Brassard, S. Charpinet, James Liebert, & R. A. Saffer.* 530, 441 (2000)

The Physics of Type Ia Supernova Light Curves. I. Analytic Results and Time Dependence. *Philip A. Pinto & Ronald G. Eastman.* 530, 744 (2000)

Mass-Radius Relation for Magnetic White Dwarfs. *In-Saeng Suh & G. J. Mathews.* 530, 949 (2000)

STARS: KINEMATICS

Constraints on Supernova Kicks from the Double Neutron Star System PSR B1913+16. *N. Wex, V. Kalogera, & M. Kramer.* 528, 401 (2000)

STARS: LOW-MASS, BROWN DWARFS

The Discovery of a Companion to the Very Cool Dwarf Gliese 569B with the Keck Adaptive Optics Facility. *E. L. Martín, C. D. Koresko, S. R. Kulkarni, B. F. Lane, & P. L. Wizinowich.* 529, L37 (2000)

NICMOS Narrowband Infrared Photometry of TW Hydrae Association Stars. *David A. Weintraub, Didier Saumon, Joel H. Kastner, & Thierry Forveille.* 530, 867 (2000)

Infrared Spectroscopy of the Secondary Star in ST Leonis Minoris: Implications for Evolution and High-/Low-State Behavior in Cataclysmic Variables. *Steve B. Howell, David R. Ciardi, V. S. Dhillon, & Warren Skidmore.* 530, 904 (2000)

STARS: LUMINOSITY FUNCTION, MASS FUNCTION

The Chemical Evolution of the Galaxy with Variable Initial Mass Functions. *C. Chiappini, F. Matteucci, & P. Padoan.* 528, 711 (2000)

Isochrones and Luminosity Functions for Old White Dwarfs. *Harvey B. Richer, Brad Hansen, Marco Limongi, Alessandro Chieffi, Oscar Straniero, & Gregory G. Fahlman.* 529, 318 (2000)

Globular Cluster Giant Branch Luminosity Functions: "Extra Stars" and "Deep Mixing." *G. E. Langer, Michael Bolte, & Eric Sandquist.* 529, 936 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

The Mass Function of Main-Sequence Stars in NGC 6397 from Near-IR and Optical High-Resolution *Hubble Space Telescope* Observations. *Guido De Marchi, Francesco Paresce, & Luigi Pulone.* 530, 342 (2000)

The Initial Mass Function of the Galactic Bulge down to $\sim$0.15 $M_\odot$. *Manuela Zoccali, Santi Cassisi, Jay A. Frogel, Andrew Gould, Sergio Ortolani, Alvio Renzini, R. Michael Rich, & Andrew W. Stephens.* 530, 418 (2000)

Tidally Triggered Star Formation in Close Pairs of Galaxies. *Elizabeth J. Barton, Margaret J. Geller, & Scott J. Kenyon.* 530, 660 (2000)

Growth of an Initial Mass Function Cluster in a Turbulent Dense Core. *P. C. Myers.* 530, L119 (2000)

STARS: MAGNETIC FIELDS

The R Aquarii Jet: A Lorentz Force–driven Parcel Model. *J. M. Hollis & T. Koupelis.* 528, 418 (2000)

Relativistic Dynamos in Magnetospheres of Rotating Compact Objects. *Akira Tomimatsu.* 528, 972 (2000)

Period Clustering of the Anomalous X-Ray Pulsars and Magnetic Field Decay in Magnetars. *Monica Colpi, Ulrich Geppert, & Dany Page.* 529, L29 (2000)

A Twisted Flux Rope Model for Coronal Mass Ejections and Two-Ribbon Flares. *T. Amari, J. F. Luciani, Z. Mikic, & J. Linker.* 529, L49 (2000)

Magnetic Field Limitations on Advection-dominated Flows. *G. S. Bisnovatyi-Kogan & R. V. E. Lovelace.* 529, 978 (2000)

Polarization of Thermal X-Rays from Isolated Neutron Stars. *G. G. Pavlov & V. E. Zavlin.* 529, 1011 (2000)

Are Superflares on Solar Analogs Caused by Extrasolar Planets? *Eric P. Rubenstein & Bradley E. Schaefer.* 529, 1031 (2000)

The 0.1–100 keV Spectrum of Centaurus X-3: Pulse Phase Spectroscopy of the Cyclotron Line and Magnetic Field Structure. *L. Burderi, T. Di Salvo, N. R. Robba, A. La Barbera, & M. Guainazzi.* 530, 429 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

The Neutron Star Census. *S. B. Popov, M. Colpi, A. Treves, R. Turolla, V. M. Lipunov, & M. E. Prokhorov.* 530, 896 (2000)

Mass-Radius Relation for Magnetic White Dwarfs. *In-Saeng Suh & G. J. Mathews.* 530, 949 (2000)

STARS: MASS LOSS

SN 1987A's Circumstellar Envelope. II. Kinematics of the Three Rings and the Diffuse Nebula. *Arlin P. S. Crotts & Stephen R. Heathcote.* 528, 426 (2000)

A Submillimeter HCN Laser in IRC +10216. *Peter Schilke, David M. Mehringer, & Karl M. Menten.* 528, L37 (2000)

A *Hubble Space Telescope* Snapshot Survey of Proto–Planetary Nebula Candidates: Two Types of Axisymmetric Reflection Nebulosities. *Toshiya Ueta, Margaret Meixner, & Matthew Bobrowsky.* 528, 861 (2000)

Hubble Space Telescope Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri. *Noella L. D'Cruz, Robert W. O'Connell, Robert T. Rood, Jonathan H. Whitney, Ben Dorman, Wayne B. Landsman, Robert S. Hill, Theodore P. Stecher, & Ralph C. Bohlin.* 530, 352 (2000)

Infrared Space Observatory Spectroscopy of Extreme Carbon Stars. *Kevin Volk, Guan-Zhu Xiong, & Sun Kwok.* 530, 408 (2000)

Formation of Millisecond Pulsars with Heavy White Dwarf Companions: Extreme Mass Transfer on Subthermal Timescales. *Thomas M. Tauris, Edward P. J. van den Heuvel, & Gerrit J. Savonije.* 530, L93 (2000)

A Second Luminous Blue Variable in the Quintuplet Cluster. *T. R. Geballe, F. Najarro, & D. F. Figer.* 530, L97 (2000)

STARS: NEUTRON

Constraints on Supernova Kicks from the Double Neutron Star System PSR B1913+16. *N. Wex, V. Kalogera, & M. Kramer.* 528, 401 (2000)

Changes in the Long-Term Intensity Variations in Cygnus X-2 and LMC X-3. *B. Paul, S. Kitamoto, & F. Makino.* 528, 410 (2000)

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

ASCA Observations of the Quiescent X-Ray Counterpart to SGR 1627−41. *K. Hurley, T. Strohmayer, P. Li, C. Kouveliotou, P. Woods, J. Van Paradijs, T. Murakami, D. Hartmann, I. Smith, M. Ando, A. Yoshida, & M. Sugizaki.* 528, L21 (2000)

Detection of 33.8 Millisecond X-Ray Pulsations in SAX J0635+0533. *G. Cusumano, M. C. Maccarone, L. Nicastro, & B. Sacco.* 528, L25 (2000)

On the Maximum Mass of Differentially Rotating Neutron Stars. *Thomas W. Baumgarte, Stuart L. Shapiro, & Masaru Shibata.* 528, L29 (2000)

LMC X-2: The First Extragalactic Z Source? *Alan P. Smale & Erik Kuulkers.* 528, 702 (2000)

Pulse Profiles, Accretion Column Dips, and a Flare in GX 1+4 during a Faint State. *A. B. Giles, D. K. Galloway, J. G. Greenhill, M. C. Storey, & C. A. Wilson.* 529, 447 (2000)

Period Clustering of the Anomalous X-Ray Pulsars and Magnetic Field Decay in Magnetars. *Monica Colpi, Ulrich Geppert, & Dany Page.* 529, L29 (2000)

Viscous Boundary-Layer Dumping of r-Modes in Neutron Stars. *Lars Bildsten & Greg Ushomirsky.* 529, L33 (2000)

Analyzing X-Ray Pulsar Profiles: Geometry and Beam Pattern of Hercules X-1. *S. Blum & U. Kraus.* 529, 968 (2000)

A Method for Distinguishing between Transiently Accreting Neutron Stars and Black Holes, in Quiescence. *Robert E. Rutledge, Lars Bildsten, Edward F. Brown, George G. Pavlov, & Vyatcheslav E. Zavlin.* 529, 985 (2000)

Inertial Modes of Slowly Rotating Isentropic Stars. *Shijun Yoshida & Umin Lee.* 529, 997 (2000)

Polarization of Thermal X-Rays from Isolated Neutron Stars. *G. G. Pavlov & V. E. Zavlin.* 529, 1011 (2000)

The 0.1–100 keV Spectrum of Centaurus X-3: Pulse Phase Spectroscopy of the Cyclotron Line and Magnetic Field Structure. *L. Burderi, T. Di Salvo, N. R. Robba, A. La Barbera, & M. Guainazzi.* 530, 429 (2000)

Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)

The Orbital Period of the Be/Neutron Star Binary RX J0812.4−3114. *Robin H. D. Corbet & Andrew G. Peele.* 530, L33 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

An Upper Limit on the Coalescence Rate of Double Neutron-Star Binaries in the Galaxy. *Vassiliki Kalogera & Duncan R. Lorimer.* 530, 890 (2000)

The Neutron Star Census. *S. B. Popov, M. Colpi, A. Treves, R. Turolla, V. M. Lipunov, & M. E. Prokhorov.* 530, 896 (2000)

Correlated Timing and Spectral Variations of the Soft X-Ray Transient Aquila X-1: Evidence for an Atoll Classification. *P. Reig, M. Méndez, M. van der Klis, & E. C. Ford.* 530, 916 (2000)

Conversion of Neutron Stars to Strange Stars as the Central Engine of Gamma-Ray Bursts. *Ignazio Bombaci & Bhaskar Datta.* 530, L69 (2000)

Formation of Millisecond Pulsars with Heavy White Dwarf Companions: Extreme Mass Transfer on Subthermal Timescales. *Thomas M. Tauris, Edward P. J. van den Heuvel, & Gerrit J. Savonije.* 530, L93 (2000)

STARS: NOVAE, CATACLYSMIC VARIABLES

A Theoretical Light-Curve Model for the 1999 Outburst of U Scorpii. *Izumi Hachisu, Mariko Kato, Taichi Kato, & Katsura Matsumoto.* 528, L97 (2000)

Novae in External Galaxies: M51, M87, and M101. *A. W. Shafter, R. Ciardullo, & C. Pritchet.* 530, 193 (2000)

Rossi X-Ray Timing Explorer Observations of an Outburst of Recurrent X-Ray Nova GS 1354−644. *Mikhail G. Revnivtsev, Konstantin N. Borozdin, William C. Priedhorsky, & Alexey Vikhlinin.* 530, 955 (2000)

STARS: OSCILLATIONS

Asteroseismology of the Multiply Periodic δ Scuti Star θ Tucanae. *Matthew R. Templeton, Paul A. Bradley, & Joyce A. Guzik.* 528, 979 (2000)

Classical Cepheid Pulsation Models. III. The Predictable Scenario. *Giuseppe Bono, Vittorio Castellani, & Marcella Marconi.* 529, 293 (2000)

Viscous Boundary-Layer Dumping of r-Modes in Neutron Stars. *Lars Bildsten & Greg Ushomirsky.* 529, L33 (2000)

Inertial Modes of Slowly Rotating Isentropic Stars. *Shijun Yoshida & Umin Lee.* 529, 997 (2000)

Detection of p-Mode Pulsations and Possible Ellipsoidal Luminosity Variations in the Hot Subdwarf B Star KPD 1930+2752. *M. Billéres, G. Fontaine, P. Brassard, S. Charpinet, James Liebert, & R. A. Saffer.* 530, 441 (2000)

Evolutionary Model and Oscillation Frequencies for α Ursae Majoris: A Comparison with Observations. *D. B. Guenther, P. Demarque, D. Buzasi, J. Catanzarite, R. Laher, T. Conrow, & T. Kreidl.* 530, L45 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

Does Turbulence in the Iron Convection Zone Cause the Massive Outburst of η Carinae? *Richard B. Stothers.* 530, L103 (2000)

STARS: PLANETARY SYSTEMS

Detection Efficiencies of Microlensing Data Sets to Stellar and Planetary Companions. *B. Scott Gaudi & Penny D. Sackett.* 528, 56 (2000)

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

Circumstellar Dust Disks around Stars with Known Planetary Companions. *D. E. Trilling, R. H. Brown, & A. S. Rivkin.* 529, 499 (2000)

A Transiting "51 Peg–like" Planet. *Gregory W. Henry, Geoffrey W. Marcy, R. Paul Butler, & Steven S. Vogt.* 529, L41 (2000)

Detection of Planetary Transits across a Sun-like Star. *David Charbonneau, Timothy M. Brown, David W. Latham, & Michel Mayor.* 529, L45 (2000)

Are Superflares on Solar Analogs Caused by Extrasolar Planets? *Eric P. Rubenstein & Bradley E. Schaefer.* 529, 1031 (2000)

The Effects of Thermal Energetics on Three-dimensional Hydrodynamic Instabilities in Massive Protostellar Disks. II. High-Resolution and Adiabatic Evolutions. *Brian K. Pickett, Patrick Cassen, Richard H. Durisen, & Robert Link.* 529, 1034 (2000)

Stability Analysis of the Planetary System Orbiting υ Andromedae. *Eugenio J. Rivera & Jack J. Lissauer.* 530, 454 (2000)

Rings in the Planetesimal Disk of β Pictoris. *P. Kalas, J. Larwood, B. A. Smith, & A. Schultz.* 530, L133 (2000)

STARS: POPULATION II

Prompt Iron Enrichment, Two *r*-Process Components, and Abundances in Very Metal Poor Stars. *G. J. Wasserburg & Y.-Z. Qian.* 529, L21 (2000)

Faint Blue Objects on the Hubble Deep Field North and South as Possible Nearby Old Halo White Dwarfs. *R. A. Méndez & D. Minniti.* 529, 911 (2000)

Hubble Space Telescope Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri. *Noella L. D'Cruz, Robert W. O'Connell, Robert T. Rood, Jonathan H. Whitney, Ben Dorman, Wayne B. Landsman, Robert S. Hill, Theodore P. Stecher, & Ralph C. Bohlin.* 530, 352 (2000)

The *r*-Process–enriched Low-Metallicity Giant HD 115444. *Jenny Westin, Christopher Sneden, Bengt Gustafsson, & John J. Cowan.* 530, 783 (2000)

Primordial Lithium and Big Bang Nucleosynthesis. *Sean G. Ryan, Timothy C. Beers, Keith A. Olive, Brian D. Fields, & John E. Norris.* 530, L57 (2000)

STARS: PRE–MAIN-SEQUENCE

On the Snow Line in Dusty Protoplanetary Disks. *D. D. Sasselov & M. Lecar.* 528, 995 (2000)

High-Resolution Studies of Gans and Dust around Young Intermediate-Mass Stars. II. Observations of an Additional Sample of Herbig Ae Systems. *Vincent Mannings & Anneila I. Sargent.* 529, 391 (2000)

Unveiling the Circumstellar Envelope and Disk: A Subarcsecond Survey of Circumstellar Structures. *Leslie W. Looney, Lee G. Mundy, & W. J. Welch.* 529, 477 (2000)

Radio Continuum Emission at OH and H_2O Maser Sites. *J. R. Forster & J. L. Caswell.* 530, 371 (2000)

Influence of Magnetic Fields on Pulsed, Radiative Jets. *T. A. Gardiner, A. Frank, T. W. Jones, & D. Ryu.* 530, 834 (2000)

The Structure of Protostellar Envelopes Derived from Submillimeter Continuum Images. *Claire J. Chandler & John S. Richer.* 530, 851 (2000)

NICMOS Narrowband Infrared Photometry of TW Hydrae Association Stars. *David A. Weintraub, Didier Saumon, Joel H. Kastner, & Thierry Forveille.* 530, 867 (2000)

Interaction of Infall and Winds in Young Stellar Objects. *G. Delamarter, A. Frank, & L. Hartmann.* 530, 923 (2000)

STARS: PULSARS: GENERAL

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

High-Energy Gamma-Ray Observations of Two Young, Energetic Radio Pulsars. *V. M. Kaspi, J. R. Lackey, J. Mattox, R. N. Manchester, & M. Bailes.* 528, 445 (2000)

Detection of 33.8 Millisecond X-Ray Pulsations in SAX J0635+0533. *G. Cusumano, M. C. Maccarone, L. Nicastro, & B. Sacco.* 528, L25 (2000)

Timing Observations of Four Millisecond Pulsars with the Arecibo and Effelsberg Radio Telescopes. *A. Wolszczan, O. Doroshenko, M. Konacki, M. Kramer, A. Jessner, R. Wielebinski, F. Camilo, D. J. Nice, & J. H. Taylor.* 528, 907 (2000)

Period Clustering of the Anomalous X-Ray Pulsars and Magnetic Field Decay in Magnetars. *Monica Colpi, Ulrich Geppert, & Dany Page.* 529, L29 (2000)

Compact Radio Sources with the Steepest Spectra. *D. L. Kaplan, J. M. Cordes, J. J. Condon, & S. G. Djorgovski.* 529, 859 (2000)

Polarization of Thermal X-Rays from Isolated Neutron Stars. *G. G. Pavlov & V. E. Zavlin.* 529, 1011 (2000)

An Upper Limit on the Coalescence Rate of Double Neutron-Star Binaries in the Galaxy. *Vassiliki Kalogera & Duncan R. Lorimer.* 530, 890 (2000)

STARS: PULSARS: INDIVIDUAL

Name: Hercules X-1

Analyzing X-Ray Pulsar Profiles: Geometry and Beam Pattern of Hercules X-1. *S. Blum & U. Kraus.* 529, 968 (2000)

Alphanumeric: B1913+16

Constraints on Supernova Kicks from the Double Neutron Star System PSR B1913+16. *N. Wex, V. Kalogera, & M. Kramer.* 528, 401 (2000)

Alphanumeric: GX 1+4

Pulse Profiles, Accretion Column Dips, and a Flare in GX 1+4 during a Faint State. *A. B. Giles, D. K. Galloway, J. G. Greenhill, M. C. Storey, & C. A. Wilson.* 529, 447 (2000)

Alphanumeric: PSR B0525+21

The Mode-separated Pulse Profiles of Pulsar Radio Emission. *Mark M. McKinnon & Daniel R. Stinebring.* 529, 435 (2000)

Alphanumeric: PSR B1046−58

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

High-Energy Gamma-Ray Observations of Two Young, Energetic Radio Pulsars. *V. M. Kaspi, J. R. Lackey, J. Mattox, R. N. Manchester, & M. Bailes.* 528, 445 (2000)

Alphanumeric: PSR B1610−50

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

Alphanumeric: PSR B1620−26

Theoretical Implications of the PSR B1620−26 Triple System and Its Planet. *Eric B. Ford, Kriten J. Joshi, Frederic A. Rasio, & Boris Zbarsky.* 528, 336 (2000)

Alphanumeric: PSR B1718−19

Optical Observations of the Binary Pulsar System PSR B1718−19: Implications for Tidal Circularization. *M. H. van Kerkwijk, V. M. Kaspi, A. R. Klemola, S. R. Kulkarni, A. G. Lyne, & D. Van Buren.* 529, 428 (2000)

Alphanumeric: PSR B1855+09

The Temperature and Cooling Age of the White Dwarf Companion to the Millisecond Pulsar PSR B1855+09. *M. H. van Kerkwijk, J. F. Bell, V. M. Kaspi, & S. R. Kulkarni.* 530, L37 (2000)

Alphanumeric: PSR B2020+28

The Mode-separated Pulse Profiles of Pulsar Radio Emission. *Mark M. McKinnon & Daniel R. Stinebring.* 529, 435 (2000)

Alphanumeric: PSR J1105−6107

High-Energy Gamma-Ray Observations of Two Young, Energetic Radio Pulsars. *V. M. Kaspi, J. R. Lackey, J. Mattox, R. N. Manchester, & M. Bailes.* 528, 445 (2000)

STARS: ROTATION

Presupernova Evolution of Rotating Massive Stars. I. Numerical Method and Evolution of the Internal Stellar Structure. *A. Heger, N. Langer, & S. E. Woosley.* 528, 368 (2000)

On the Maximum Mass of Differentially Rotating Neutron Stars. *Thomas W. Baumgarte, Stuart L. Shapiro, & Masaru Shibata.* 528, L29 (2000)

The Evolution of the Angular Momentum Distribution during Star Formation. *Kohji Tomisaka.* 528, L41 (2000)

A New Spin on the Problem of Horizontal-Branch Gaps: Stellar Rotation along the Blue Horizonal Branch of Globular Cluster M13. *Bradford B. Behr, S. G. Djorgovski, Judith G. Cohen, James K. McCarthy, Patrick Côté, Giampaolo Piotto, & Manuela Zoccali.* 528, 849 (2000)

Nonaxisymmetric Dynamic Instabilities of Rotating Polytropes. II. Torques, Bars, and Mode Saturation with Applications to Protostars and Fizzlers. *James N. Imamura, Richard H. Durisen, & Brian K. Pickett.* 528, 946 (2000)

Viscous Boundary-Layer Dumping of *r*-Modes in Neutron Stars. *Lars Bildsten & Greg Ushomirsky.* 529, L33 (2000)

Inertial Modes of Slowly Rotating Isentropic Stars. *Shijun Yoshida & Umin Lee.* 529, 997 (2000)

STARS: SPOTS

Detecting Stellar Spots by Gravitational Microlensing. *David Heyrovský & Dimitar Sasselov.* 529, 69 (2000)

Compton-dragged Gamma-Ray Bursts Associated with Supernovae. *Davide Lazzati, Gabriele Ghisellini, Annalisa Celotti, & Martin J. Rees.* 529, L17 (2000)

The Luminous Type Ic Supernova 1992ar at $z = 0.145$. *Alejandro Clocchiati, Mark M. Phillips, Nicholas B. Suntzeff, Massimo DellaValle, Enrico Cappellaro, Massimo Turatto, Mario Hamuy, Roberto Avilés, Mauricio Navarette, Chris Smith, Eric P. Rubenstein, Ricardo Covarrubias, Peter B. Stetson, José Maza, Adam G. Riess, & Caterina Zanin.* 529, 661 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXV. A Recalibration of Cepheid Distance to Type Ia Supernovae and the Value of the Hubble Constant. *Brad K. Gibson, Peter B. Stetson, Wendy L. Freedman, Jeremy R. Mould, Robert C. Kennicutt, Jr., John P. Huchra, Shoko Sakai, John A. Graham, Caleb I. Fassett, Daniel D. Kelson, Laura Ferrarese, Shaun M. G. Hughes, Garth D. Illingworth, Lucas M. Macri, Barry F. Madore, Kim M. Sebo, & Nancy A. Silbermann.* 529, 723 (2000)

The Distribution of High- and Low-Redshift Type Ia Supernovae. *D. Andrew Howell, Lifan Wang, & J. Craig Wheeler.* 530, 166 (2000)

Type Ia Supernovae, Evolution, and the Cosmological Constant. *Persis S. Drell, Thomas J. Loredo, & Ira Wasserman.* 530, 593 (2000)

The Physics of Type Ia Supernova Light Curves. I. Analytic Results and Time Dependence. *Philip A. Pinto & Ronald G. Eastman.* 530, 744 (2000)

The Physics of Type Ia Supernova Light Curves. II. Opacity and Diffusion. *Philip A. Pinto & Ronald G. Eastman.* 530, 757 (2000)

Metallicity Effects in Non-LTE Model Atmospheres of Type Ia Supernovae. *Eric J. Lentz, E. Baron, David Branch, Peter H. Hauschildt, & Peter E. Nugent.* 530, 966 (2000)

STARS: SUPERNOVAE: INDIVIDUAL

Name: Tycho

Spatial Variations of the Synchrotron Spectrum within Tycho's Supernova Remnant (3C 10): A Spectral Tomography Analysis of Radio Observations at 20 and 90 Centimeter Wavelengths. *D. M. Katz-Stone, N. E. Kassim, T. Joseph W. Lazio, & R. O'Donnell.* 529, 453 (2000)

Alphanumeric: SN 1987A

SN 1987A's Circumstellar Envelope. II. Kinematics of the Three Rings and the Diffuse Nebula. *Arlin P. S. Crotts & Stephen R. Heathcote.* 528, 426 (2000)

Alphanumeric: SN 1992ar

The Luminous Type Ic Supernova 1992ar at $z = 0.145$. *Alejandro Clocchiati, Mark M. Phillips, Nicholas B. Suntzeff, Massimo DellaValle, Enrico Cappellaro, Massimo Turatto, Mario Hamuy, Roberto Avilés, Mauricio Navarette, Chris Smith, Eric P. Rubenstein, Ricardo Covarrubias, Peter B. Stetson, José Maza, Adam G. Riess, & Caterina Zanin.* 529, 661 (2000)

STARS: VARIABLES: CEPHEIDS

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXI. The Cepheid Distance to NGC 1425. *Jeremy R. Mould, Shaun M. G. Hughes, Peter B. Stetson, Brad K. Gibson, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Fabio Bresolin, Laura Ferrarese, Holland C. Ford, John A. Graham, Mingsheng Han, John G. Hoessel, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Randy L. Phelps, Charles F. Prosser, Daya Rawson, Abhijit Saha, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Anne M. Turner.* 528, 655 (2000)

Classical Cepheid Pulsation Models. III. The Predictable Scenario. *Giuseppe Bono, Vittorio Castellani, & Marcella Marconi.* 529, 293 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXV. A Recalibration of Cepheid Distance to Type Ia Supernovae and the Value of the Hubble Constant. *Brad K. Gibson, Peter B. Stetson, Wendy L. Freedman, Jeremy R. Mould, Robert C. Kennicutt, Jr., John P. Huchra, Shoko Sakai, John A. Graham, Caleb I. Fassett, Daniel D. Kelson, Laura Ferrarese, Shaun M. G. Hughes, Garth D. Illingworth, Lucas M. Macri, Barry F. Madore, Kim M. Sebo, & Nancy A. Silbermann.* 529, 723 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVI. The Calibration of Population II Secondary Distance Indicators and the Value of the Hubble Constant. *Laura Ferrarese, Jeremy R. Mould, Robert C. Kennicutt, Jr., John Huchra, Holland C. Ford, Wendy L. Freedman, Peter B. Stetson, Barry F. Madore, Shoko Sakai, Brad K. Gibson, John A. Graham, Shaun M. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas Macri, Kim Sebo, & N. A. Silbermann.* 529, 745 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVII. A Derivation of the Hubble Constant Using the Fundamental Plane and D_n-σ Relations in Leo I, Virgo, and Fornax. *Daniel D. Kelson, Garth D. Illingworth, John L. Tonry, Wendy L. Freedman, Robert C. Kennicutt, Jr., Jeremy R. Mould, John A. Graham, John P. Huchra, Lucas M. Macri, Barry F. Madore, Laura Ferrarese, Brad K. Gibson, Shoko Sakai, Peter B. Stetson, Edward A. Ajhar, John P. Blakeslee, Alan Dressler, Holland C. Ford, Shaun M. G. Hughes, Kim M. Sebo, & Nancy A. Silbermann.* 529, 768 (2000)

The *Hubble Space Telescope* Key Project on the Extragalactic Distance Scale. XXVIII. Combining the Constraints on the Hubble Constant. *Jeremy R. Mould, John P. Huchra, Wendy L. Freedman, Robert C. Kennicutt, Jr., Laura Ferrarese, Holland C. Ford, Brad K. Gibson, John A. Graham, Shaun M. G. Hughes, Garth D. Illingworth, Daniel D. Kelson, Lucas M. Macri, Barry F. Madore, Shoko Sakai, Kim M. Sebo, Nancy A. Silbermann, & Peter B. Stetson.* 529, 786 (2000)

Has Blending Compromised Cepheid-based Determinations of the Extragalactic Distance Scale? *Brad K. Gibson, Philip R. Maloney, & Shoko Sakai.* 530, L5 (2000)

STARS: VARIABLES: δ SCUTI

Asteroseismology of the Multiply Periodic δ Scuti Star θ Tucanae. *Matthew R. Templeton, Paul A. Bradley, & Joyce A. Guzik.* 528, 979 (2000)

STARS: VARIABLES: OTHER

A Second Luminous Blue Variable in the Quintuplet Cluster. *T. R. Geballe, F. Najarro, & D. F. Figer.* 530, L97 (2000)

(Luminous Blue Variables)

η Carinae: Binarity Confirmed. *Augusto Damineli, Andreas Kaufer, Bernhard Wolf, Otmar Stahl, Dalton F. Lopes, & Francisco X. de Araújo.* 528, L101 (2000)

Does Turbulence in the Iron Convection Zone Cause the Massive Outburst of η Carinae? *Richard B. Stothers.* 530, L103 (2000)

(RR Lyrae)

RR Lyrae Stars in NGC 6388 and NGC 6441: A New Oosterhoff Group? *Barton Pritzl, Horace A. Smith, Márcio Catelan, & Allen V. Sweigart.* 530, L41 (2000)

STARS: WHITE DWARFS

The Energetics of Crystallizing White Dwarfs Revisited Again. *J. Isern, E. García-Berro, M. Hernanz, & G. Chabrier.* 528, 397 (2000)

Isochrones and Luminosity Functions for Old White Dwarfs. *Harvey B. Richer, Brad Hansen, Marco Limongi, Alessandro Chieffi, Oscar Straniero, & Gregory G. Fahlman.* 529, 318 (2000)

Faint Blue Objects on the Hubble Deep Field North and South as Possible Nearby Old Halo White Dwarfs. *R. A. Méndez & D. Minniti.* 529, 911 (2000)

The Temperature and Cooling Age of the White Dwarf Companion to the Millisecond Pulsar PSR B1855+09. *M. H. van Kerkwijk, J. F. Bell, V. M. Kaspi, & S. R. Kulkarni.* 530, L37 (2000)

Mass-Radius Relation for Magnetic White Dwarfs. *In-Saeng Suh & G. J. Mathews.* 530, 949 (2000)

Formation of Millisecond Pulsars with Heavy White Dwarf Companions: Extreme Mass Transfer on Subthermal Timescales. *Thomas M. Tauris, Edward P. J. van den Heuvel, & Gerrit J. Savonije.* 530, L93 (2000)

STARS: WINDS, OUTFLOWS

Winds from Luminous Late-Type Stars. I. The Effects of Nonlinear Alfvén Waves. *V. S. Airapetian, L. Ofman, R. D. Robinson, K. Carpenter, & J. Davila.* 528, 965 (2000)

The Surprisingly Weak Effect of Gravity in Retarding Hot-Star Wind Acceleration. *K. G. Gayley.* 529, 1019 (2000)

Whistler Heat Flux Instability at High Beta. *S. Peter Gary & Hui Li.* 529, 1131 (2000)

A Generalized Model for the Proton Expansion in Astrophysical Winds. III. The Collisional Transfers and Their Properties. *François Leblanc, Daniel Hubert, & Pierre-Louis Blelly.* 530, 478 (2000)

Interaction of Infall and Winds in Young Stellar Objects. *G. Delamarter, A. Frank, & L. Hartmann.* 530, 923 (2000)

Stellar Winds, Dead Zones, and Coronal Mass Ejections. *R. Keppens & J. P. Goedbloed.* 530, 1036 (2000)

SUBMILLIMETER

Sensitive Radio Observations of High-Redshift Dusty QSOs. *M. S. Yun, C. L. Carilli, R. Kawabe, Y. Tutui, K. Kohno, & K. Ohta.* 528, 171 (2000)

Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)

High-Resolution Studies of Gans and Dust around Young Intermediate-Mass Stars. II. Observations of an Additional Sample of Herbig Ae Systems. *Vincent Mannings & Anneila I. Sargent.* 529, 391 (2000)

The Structure of Protostellar Envelopes Derived from Submillimeter Continuum Images. *Claire J. Chandler & John S. Richer.* 530, 851 (2000)

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

SUN: ACTIVITY

The Sun as an X-Ray Star. I. Deriving the Emission Measure Distribution versus Temperature of the Whole Solar Corona from the *Yohkoh*/Soft X-Ray Telescope Data. *S. Orlando, G. Peres, & F. Reale.* 528, 524 (2000)

Development of Coronal Mass Ejections: Radio Shock Signatures. *Dalmiro Maia, Monique Pick, Angelos Vourlidas, & Russel Howard.* 528, L49 (2000)

Current Helicity of the Large-Scale Photospheric Magnetic Field. *Alexei A. Pevtsov & Sergei M. Latushko.* 528, 999 (2000)

Comparison of Transient Network Brightenings and Explosive Events in the Solar Transition Region. *Jongchul Chae, Haimin Wang, & Philip R. Goode.* 528, L119 (2000)

Radio Tracking of a White-light Coronal Mass Ejection from Solar Corona to Interplanetary Medium. *M. J. Reiner, M. L. Kaiser, S. P. Plunkett, N. P. Prestage, & R. Manning.* 529, L53 (2000)

Analysis of NASA/NSO Spectromagnetograph Observations for Comparison with Solar Irradiance Variations. *Harrison P. Jones, Detrick D. Branston, Patricia B. Jones, & Meredith J. Wills-Davey.* 529, 1070 (2000)

A Picture of Solar Minimum and the Onset of Solar Cycle 23. I. Global Magnetic Field Evolution. *Giuliana de Toma, Oran R. White, & Karen L. Harvey.* 529, 1101 (2000)

SUN: ATMOSPHERE

Magnetoacoustic Waves of Small Amplitude in Optically Thin Quasi-isentropic Plasmas. *Valery M. Nakariakov, César A. Mendoza-Briceño, & Miguel H. Ibáñez S.* 528, 767 (2000)

Equilibrium and Stability of Magnetostatic Atmospheres. I. Dungey-Type Isothermal States. *B. C. Low & Ward Manchester IV.* 528, 1026 (2000)

Preconditioning the Differential Emission Measure (T_e) Inverse Problem. *S. W. McIntosh, P. Charbonneau, & J. C. Brown.* 529, 1115 (2000)

SUN: CHROMOSPHERE

Generation of Electron Suprathermal Tails in the Upper Solar Atmosphere: Implications for Coronal Heating. *Adolfo F. Viñas, Hung K Wong, & Alexander J. Klimas.* 528, 509 (2000)

SUN: CORONA

Generation of Electron Suprathermal Tails in the Upper Solar Atmosphere: Implications for Coronal Heating. *Adolfo F. Viñas, Hung K Wong, & Alexander J. Klimas.* 528, 509 (2000)

The Sun as an X-Ray Star. I. Deriving the Emission Measure Distribution versus Temperature of the Whole Solar Corona from the *Yohkoh*/Soft X-Ray Telescope Data. *S. Orlando, G. Peres, & F. Reale.* 528, 524 (2000)

The Sun as an X-Ray Star. II. Using the *Yohkoh*/Soft X-Ray Telescope–derived Solar Emission Measure versus Temperature to Interpret Stellar X-Ray Observations. *G. Peres, S. Orlando, F. Reale, R. Rosner, & H. Hudson.* 528, 537 (2000)

TRACE-derived Temperature and Emission Measure Profiles along Long-lived Coronal Loops: The Role of Filamentation. *F. Reale & G. Peres.* 528, L45 (2000)

Development of Coronal Mass Ejections: Radio Shock Signatures. *Dalmiro Maia, Monique Pick, Angelos Vourlidas, & Russel Howard.* 528, L49 (2000)

An Assessment of Magnetic Conditions for Strong Coronal Heating in Solar Active Regions by Comparing Observed Loops with Computed Potential Field Lines. *D. A. Falconer, G. A. Gary, R. L. Moore, & J. G. Porter.* 528, 1004 (2000)

Equilibrium and Stability of Magnetostatic Atmospheres. I. Dungey-Type Isothermal States. *B. C. Low & Ward Manchester IV.* 528, 1026 (2000)

Statistical Analysis of the Energy Distribution of Nanoflares in the Quiet Sun. *C. E. Parnell & P. E. Jupp.* 529, 554 (2000)

Temperature Structure of the Quiet Corona: An SXT-SUMER Discrepancy. *Richard Wolfson, Colin B. Roald, P. A. Sturrock, J. Lemen, & P. Shirts.* 529, 570 (2000)

Solar and Heliospheric Observatory Observations of a Helical Coronal Mass Ejection. *A. Ciaravella, J. C. Raymond, B. J. Thompson, A. van Ballegooijen, L. Strachan, J. Li, L. Gardner, R. E. O'Neal, E. Antonucci, J. Kohl, & G. Noci.* 529, 575 (2000)

UVCS WLC Observations of Compressional Waves in the South Polar Coronal Hole. *L. Ofman, M. Romoli, G. Poletto, G. Noci, & J. L. Kohl.* 529, 592 (2000)

Extreme-Ultraviolet Spectral Line Widths in Quiet-Sun Coronal Plasmas at Distances of $1.03 \leq R_{\odot} \leq 1.45$ along the Solar Equatorial Plane. *G. A. Doschek & U. Feldman.* 529, 599 (2000)

Radio Tracking of a White-light Coronal Mass Ejection from Solar Corona to Interplanetary Medium. *M. J. Reiner, M. L. Kaiser, S. P. Plunkett, N. P. Prestage, & R. Manning.* 529, L53 (2000)

Radio Astronomical Constraints on Coronal Heating by High-Frequency Alfvén Waves. *Steven R. Spangler & Salvatore Mancuso.* 530, 491 (2000)

Magnetic Field and Plasma Scaling Laws: Their Implications for Coronal Heating Models. *C. H. Mandrini, P. Démoulin, & J. A. Klimchuk.* 530, 999 (2000)

Tomography of the Solar Corona. I. A Robust, Regularized, Positive Estimation Method. *Richard A. Frazin.* 530, 1026 (2000)

Radial Evolution and Turbulence Characteristics of a Coronal Mass Ejection. *P. K. Manoharan, M. Kojima, N. Gopalswamy, T. Kondo, & Z. Smith.* 530, 1061 (2000)

SUN: FILAMENTS

Minifilament Eruption on the Quiet Sun. I. Observations at Hα Central Line. *Jingxiu Wang, Wei Li, Carsten Denker, Chikyin Lee, Haimin Wang, Philip R. Goode, Alan McAllister, & Sara F. Martin.* 530, 1071 (2000)

SUN: FLARES

Interplanetary and Interacting Protons Accelerated in a Parallel Shock Wave. *R. Vainio, L. Kocharov, & T. Laitinen.* 528, 1015 (2000)

Statistical Analysis of the Energy Distribution of Nanoflares in the Quiet Sun. *C. E. Parnell & P. E. Jupp.* 529, 554 (2000)

Radio Tracking of a White-light Coronal Mass Ejection from Solar Corona to Interplanetary Medium. *M. J. Reiner, M. L. Kaiser, S. P. Plunkett, N. P. Prestage, & R. Manning.* 529, L53 (2000)

On the Solar Origin of Complex Type III–like Radio Bursts Observed at and below 1 MHz. *M. J. Reiner, M. Karlický, K. Jiřička, H. Aurass, G. Mann, & M. L. Kaiser.* 530, 1049 (2000)

SUN: FUNDAMENTAL PARAMETERS

In-Flight Determination of the Plate Scale of the Extreme-Ultraviolet Imaging Telescope. *F. Auchére, C. E. DeForest, & G. Artzner.* 529, L115 (2000)

SUN: GENERAL

Analysis of NASA/NSO Spectromagnetograph Observations for Comparison with Solar Irradiance Variations. *Harrison P. Jones, Detrick D. Branston, Patricia B. Jones, & Meredith J. Wills-Davey.* 529, 1070 (2000)

SUN: INTERIOR

Meridional Motions and the Angular Momentum Balance in the Solar Convection Zone. *Bernard R. Durney.* 528, 486 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

Influence of Turbulent Energy Spectra on Damping and Frequency Reduction of the Solar *f*-Mode. *M. Mędrek & K. Murawski.* 529, 548 (2000)

Is There a Dynamic Effect in the Screening of Nuclear Reactions in Stellar Plasmas? *Giora Shaviv & Nir J. Shaviv.* 529, 1054 (2000)

How Much Do Helioseismological Inferences Depend on the Assumed Reference Model? *Sarbani Basu, M. H. Pinsonneault, & John N. Bahcall.* 529, 1084 (2000)

Two-dimensional Modeling of the Solar Oscillation l-ν Power Spectrum. *Nadège Meunier & Stuart M. Jefferies.* 530, 1016 (2000)

Numerical Simulations of Oscillation Modes of the Solar Convection Zone. *D. Georgobiani, A. G. Kosovichev, R. Nigam, Å Nordlund, & R. F. Stein.* 530, L139 (2000)

SUN: MAGNETIC FIELDS

Absorption and Scattering of Trapped Sound Waves by Nontrapped Sausage and Kink Modes on Slender Magnetic Flux Tubes. *W. J. Tirry.* 528, 493 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II. Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

Current Helicity of the Large-Scale Photospheric Magnetic Field. *Alexei A. Pevtsov & Sergei M. Latushko.* 528, 999 (2000)

An Assessment of Magnetic Conditions for Strong Coronal Heating in Solar Active Regions by Comparing Observed Loops with Computed Potential Field Lines. *D. A. Falconer, G. A. Gary, R. L. Moore, & J. G. Porter.* 528, 1004 (2000)

UVCS WLC Observations of Compressional Waves in the South Polar Coronal Hole. *L. Ofman, M. Romoli, G. Poletto, G. Noci, & J. L. Kohl.* 529, 592 (2000)

Analysis of NASA/NSO Spectromagnetograph Observations for Comparison with Solar Irradiance Variations. *Harrison P. Jones, Detrick D. Branston, Patricia B. Jones, & Meredith J. Wills-Davey.* 529, 1070 (2000)

A Picture of Solar Minimum and the Onset of Solar Cycle 23. I. Global Magnetic Field Evolution. *Giuliana de Toma, Oran R. White, & Karen L. Harvey.* 529, 1101 (2000)

Radio Astronomical Constraints on Coronal Heating by High-Frequency Alfvén Waves. *Steven R. Spangler & Salvatore Mancuso.* 530, 491 (2000)

Non-LTE Inversion of Stokes Profiles Induced by the Zeeman Effect. *H. Socas-Navarro, J. Trujillo Bueno, & B. Ruiz Cobo.* 530, 977 (2000)

Magnetic Field and Plasma Scaling Laws: Their Implications for Coronal Heating Models. *C. H. Mandrini, P. Démoulin, & J. A. Klimchuk.* 530, 999 (2000)

SUN: OSCILLATIONS

Absorption and Scattering of Trapped Sound Waves by Nontrapped Sausage and Kink Modes on Slender Magnetic Flux Tubes. *W. J. Tirry.* 528, 493 (2000)

Random-Lag Singular Cross-Spectrum Analysis. *F. Varadi, R. K. Ulrich, L. Bertello, & C. J. Henney.* 528, L53 (2000)

Influence of Turbulent Energy Spectra on Damping and Frequency Reduction of the Solar *f*-Mode. *M. Mędrek & K. Murawski.* 529, 548 (2000)

How Much Do Helioseismological Inferences Depend on the Assumed Reference Model? *Sarbani Basu, M. H. Pinsonneault, & John N. Bahcall.* 529, 1084 (2000)

Two-dimensional Modeling of the Solar Oscillation l-ν Power Spectrum. *Nadège Meunier & Stuart M. Jefferies.* 530, 1016 (2000)

Numerical Simulations of Oscillation Modes of the Solar Convection Zone. *D. Georgobiani, A. G. Kosovichev, R. Nigam, Å Nordlund, & R. F. Stein.* 530, L139 (2000)

SUN: PARTICLE EMISSION

Interplanetary and Interacting Protons Accelerated in a Parallel Shock Wave. *R. Vainio, L. Kocharov, & T. Laitinen.* 528, 1015 (2000)

On the Solar Origin of Complex Type III–like Radio Bursts Observed at and below 1 MHz. *M. J. Reiner, M. Karlický, K. Jiřička, H. Aurass, G. Mann, & M. L. Kaiser.* 530, 1049 (2000)

Radial Evolution and Turbulence Characteristics of a Coronal Mass Ejection. *P. K. Manoharan, M. Kojima, N. Gopalswamy, T. Kondo, & Z. Smith.* 530, 1061 (2000)

SUN: PROMINENCES

Solar and Heliospheric Observatory Observations of a Helical Coronal Mass Ejection. *A. Ciaravella, J. C. Raymond, B. J. Thompson, A. van Ballegooijen, L. Strachan, J. Li, L. Gardner, R. E. O'Neal, E. Antonucci, J. Kohl, & G. Noci.* 529, 575 (2000)

SUN: RADIO RADIATION

Development of Coronal Mass Ejections: Radio Shock Signatures. *Dalmiro Maia, Monique Pick, Angelos Vourlidas, & Russel Howard.* 528, L49 (2000)

Radio Tracking of a White-light Coronal Mass Ejection from Solar Corona to Interplanetary Medium. *M. J. Reiner, M. L. Kaiser, S. P. Plunkett, N. P. Prestage, & R. Manning.* 529, L53 (2000)

A Picture of Solar Minimum and the Onset of Solar Cycle 23. I. Global Magnetic Field Evolution. *Giuliana de Toma, Oran R. White, & Karen L. Harvey.* 529, 1101 (2000)

On the Solar Origin of Complex Type III–like Radio Bursts Observed at and below 1 MHz. *M. J. Reiner, M. Karlický, K. Jiřička, H. Aurass, G. Mann, & M. L. Kaiser.* 530, 1049 (2000)

Radial Evolution and Turbulence Characteristics of a Coronal Mass Ejection. *P. K. Manoharan, M. Kojima, N. Gopalswamy, T. Kondo, & Z. Smith.* 530, 1061 (2000)

SUN: ROTATION

Meridional Motions and the Angular Momentum Balance in the Solar Convection Zone. *Bernard R. Durney.* 528, 486 (2000)

Joint Instability of Latitudinal Differential Rotation and Concentrated Toroidal Fields below the Solar Convection Zone. II. Instability of Narrow Bands at All Latitudes. *Peter A. Gilman & Mausumi Dikpati.* 528, 552 (2000)

SUN: SOLAR-TERRESTRIAL RELATIONS

Radio Tracking of a White-light Coronal Mass Ejection from Solar Corona to Interplanetary Medium. *M. J. Reiner, M. L. Kaiser, S. P. Plunkett, N. P. Prestage, & R. Manning.* 529, L53 (2000)

SUN: SOLAR WIND

Fluctuations and Ion Isotropy in the Solar Wind. *Paul J. Kellogg.* 528, 480 (2000)

UVCS WLC Observations of Compressional Waves in the South Polar Coronal Hole. *L. Ofman, M. Romoli, G. Poletto, G. Noci, & J. L. Kohl.* 529, 592 (2000)

Measurements of Absolute, Single Charge-Exchange Cross Sections of H^+, He^+, and He^{+2} with H_2O and CO_2. *J. B. Greenwood, A. Chutjian, & S. J. Smith.* 529, 605 (2000)

Whistler Heat Flux Instability at High Beta. *S. Peter Gary & Hui Li.* 529, 1131 (2000)

A Generalized Model for the Proton Expansion in Astrophysical Winds. III. The Collisional Transfers and Their Properties. *François Leblanc, Daniel Hubert, & Pierre-Louis Blelly.* 530, 478 (2000)

Radio Astronomical Constraints on Coronal Heating by High-Frequency Alfvén Waves. *Steven R. Spangler & Salvatore Mancuso.* 530, 491 (2000)

Tomography of the Solar Corona. I. A Robust, Regularized, Positive Estimation Method. *Richard A. Frazin.* 530, 1026 (2000)

Stellar Winds, Dead Zones, and Coronal Mass Ejections. *R. Keppens & J. P. Goedbloed.* 530, 1036 (2000)

SUN: SUNSPOTS

A Picture of Solar Minimum and the Onset of Solar Cycle 23. I. Global Magnetic Field Evolution. *Giuliana de Toma, Oran R. White, & Karen L. Harvey.* 529, 1101 (2000)

Using Laboratory Spectroscopy to Identify Lines in the *K*- and *L*-Band Spectrum of Water in a Sunspot. *Nikolai F. Zobov, Oleg L. Polyansky, Jonathan Tennyson, Sergey V. Shirin, Ray Nassar, Tsuyoshi Hirao, Takashi Imajo, Peter F. Bernath, & Lloyd Wallace.* 530, 994 (2000)

SUN: TRANSITION REGION

Comparison of Transient Network Brightenings and Explosive Events in the Solar Transition Region. *Jongchul Chae, Haimin Wang, & Philip R. Goode.* 528, L119 (2000)

SUN: UV RADIATION

TRACE-derived Temperature and Emission Measure Profiles along Long-lived Coronal Loops: The Role of Filamentation. *F. Reale & G. Peres.* 528, L45 (2000)

Comparison of Transient Network Brightenings and Explosive Events in the Solar Transition Region. *Jongchul Chae, Haimin Wang, & Philip R. Goode.* 528, L119 (2000)

Solar and Heliospheric Observatory Observations of a Helical Coronal Mass Ejection. *A. Ciaravella, J. C. Raymond, B. J. Thompson, A. van Ballegooijen, L. Strachan, J. Li, L. Gardner, R. E. O'Neal, E. Antonucci, J. Kohl, & G. Noci.* 529, 575 (2000)

Extreme-Ultraviolet Spectral Line Widths in Quiet-Sun Coronal Plasmas at Distances of $1.03 \leq R_{\odot} \leq 1.45$ along the Solar Equatorial Plane. *G. A. Doschek & U. Feldman.* 529, 599 (2000)

Preconditioning the Differential Emission Measure (T_e) Inverse Problem. *S. W. McIntosh, P. Charbonneau, & J. C. Brown.* 529, 1115 (2000)

SUN: X-RAYS, GAMMA RAYS

The Sun as an X-Ray Star. I. Deriving the Emission Measure Distribution versus Temperature of the Whole Solar Corona from the *Yohkoh*/Soft X-Ray Telescope Data. *S. Orlando, G. Peres, & F. Reale.* 528, 524 (2000)

The Sun as an X-Ray Star. II. Using the *Yohkoh*/Soft X-Ray Telescope–derived Solar Emission Measure versus Temperature to Interpret Stellar X-Ray Observations. *G. Peres, S. Orlando, F. Reale, R. Rosner, & H. Hudson.* 528, 537 (2000)

TRACE-derived Temperature and Emission Measure Profiles along Long-lived Coronal Loops: The Role of Filamentation. *F. Reale & G. Peres.* 528, L45 (2000)

An Assessment of Magnetic Conditions for Strong Coronal Heating in Solar Active Regions by Comparing Observed Loops with Computed Potential Field Lines. *D. A. Falconer, G. A. Gary, R. L. Moore, & J. G. Porter.* 528, 1004 (2000)

Temperature Structure of the Quiet Corona: An SXT-SUMER Discrepancy. *Richard Wolfson, Colin B. Roald, P. A. Sturrock, J. Lemen, & P. Shirts.* 529, 570 (2000)

Magnetic Field and Plasma Scaling Laws: Their Implications for Coronal Heating Models. *C. H. Mandrini, P. Démoulin, & J. A. Klimchuk.* 530, 999 (2000)

Radial Evolution and Turbulence Characteristics of a Coronal Mass Ejection. *P. K. Manoharan, M. Kojima, N. Gopalswamy, T. Kondo, & Z. Smith.* 530, 1061 (2000)

SURVEYS

Evidence for Filamentarity in the Las Campanas Redshift Survey. *Somnath Bharadwaj, Varun Sahni, B. S. Sathyaprakash, Sergei F. Shandarin, & Capp Yess.* 528, 21 (2000)

Unveiling the Circumstellar Envelope and Disk: A Subarcsecond Survey of Circumstellar Structures. *Leslie W. Looney, Lee G. Mundy, & W. J. Welch.* 529, 477 (2000)

The Discovery of a Companion to the Very Cool Dwarf Gliese 569B with the Keck Adaptive Optics Facility. *E. L. Martín, C. D. Koresko, S. R. Kulkarni, B. F. Lane, & P. L. Wizinowich.* 529, L37 (2000)

Topology from the Simulated Sloan Digital Sky Survey. *Wesley N. Colley, J. Richard Gott III, David H. Weinberg, Changbom Park, & Andreas A. Berlind.* 529, 795 (2000)

Compact Radio Sources with the Steepest Spectra. *D. L. Kaplan, J. M. Cordes, J. J. Condon, & S. G. Djorgovski.* 529, 859 (2000)

TECHNIQUES: IMAGE PROCESSING

Analysis of NASA/NSO Spectromagnetograph Observations for Comparison with Solar Irradiance Variations. *Harrison P. Jones, Detrick D. Branston, Patricia B. Jones, & Meredith J. Wills-Davey.* 529, 1070 (2000)

Event Rate and Einstein Time Evaluation in Pixel Microlensing. *Edward A. Baltz & Joseph Silk.* 530, 578 (2000)

TECHNIQUES: INTERFEROMETRIC

Viewing the Shadow of the Black Hole at the Galactic Center. *Heino Falcke, Fulvio Melia, & Eric Agol.* 528, L13 (2000)

Unveiling the Circumstellar Envelope and Disk: A Subarcsecond Survey of Circumstellar Structures. *Leslie W. Looney, Lee G. Mundy, & W. J. Welch.* 529, 477 (2000)

VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)

Space VLBI Observations of 3C 371. *José-Luis Gómez & Alan P. Marscher.* 530, 245 (2000)

TECHNIQUES: PHOTOMETRIC

Detection of Planetary Transits across a Sun-like Star. *David Charbonneau, Timothy M. Brown, David W. Latham, & Michel Mayor.* 529, L45 (2000)

TECHNIQUES: POLARIMETRIC

Submillimeter Polarimetry of the Protostellar Outflow Sources in Serpens with the Submillimeter Common-User Bolometer Array. *Christopher J. Davis, Antonio Chrysostomou, Henry E. Matthews, Tim Jenness, & Thomas P. Ray.* 530, L115 (2000)

TECHNIQUES: RADIAL VELOCITIES

Detection of Planetary Transits across a Sun-like Star. *David Charbonneau, Timothy M. Brown, David W. Latham, & Michel Mayor.* 529, L45 (2000)

TECHNIQUES: SPECTROSCOPIC

A Method for Spatial Deconvolution of Spectra. *F. Courbin, P. Magain, M. Kirkove, & S. Sohy.* 529, 1136 (2000)

TURBULENCE

Magnetic Flux Accumulation at the Galactic Center and Its Implications for the Strength of the Pregalactic Magnetic Field. *Benjamin D. G. Chandran, Steve C. Cowley, & Mark Morris.* 528, 723 (2000)

Properties of Deflagration Fronts and Models for Type Ia Supernovae. *I. Domínguez & P. Höflich.* 528, 854 (2000)

Interplanetary and Interacting Protons Accelerated in a Parallel Shock Wave. *R. Vainio, L. Kocharov, & T. Laitinen.* 528, 1015 (2000)

Dynamics of the Transition from a Thin Accretion Disk to an Advection-dominated Accretion Flow. *Tadahiro Manmoto, Shoji Kato, Kenji E. Nakamura, & Ramesh Narayan.* 529, 127 (2000)

Mean Magnetic Field Generation in Sheared Rotators. *Eric G. Blackman.* 529, 138 (2000)

A Comparison of ^{13}CO Local Thermodynamic Equilibrium and True Column Densities in Molecular Cloud Models. *Paolo Padoan, Mika Juvela, John Bally, & Åke Nordlund.* 529, 259 (2000)

The Evolution of AmFm Stars, Abundance Anomalies, and Turbulent Transport. *J. Richer, G. Michaud, & S. Turcotte.* 529, 338 (2000)

Examination of Scaling Relationships Involving Penetration Distance at the Bottom of a Stellar Convective Envelope. *E. Saikia, Harinder P. Singh, K. L. Chan, I. W. Roxburgh, & M. P. Srivastava.* 529, 402 (2000)

Confinement and Isotropization of Galactic Cosmic Rays by Molecular-Cloud Magnetic Mirrors When Turbulent Scattering Is Weak. *Benjamin D. G. Chandran.* 529, 513 (2000)

The Effect of Resistivity on the Nonlinear Stage of the Magnetorotational Instability in Accretion Disks. *Timothy P. Fleming, James M. Stone, & John F. Hawley.* 530, 464 (2000)

Radio Astronomical Constraints on Coronal Heating by High-Frequency Alfvén Waves. *Steven R. Spangler & Salvatore Mancuso.* 530, 491 (2000)

Discovery of Kilohertz Fluctuations in Centaurus X-3: Evidence for Photon Bubble Oscillations and Turbulence in a High-Mass X-Ray Binary Pulsar. *J. Garrett Jernigan, Richard I. Klein, & Jonathan Arons.* 530, 875 (2000)

Does Turbulence in the Iron Convection Zone Cause the Massive Outburst of η Carinae? *Richard B. Stothers.* 530, L103 (2000)

Growth of an Initial Mass Function Cluster in a Turbulent Dense Core. *P. C. Myers.* 530, L119 (2000)

ULTRAVIOLET: GALAXIES

Simultaneous *EUVE*/*ASCA*/*RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

Superdisks in Radio Galaxies. *Gopal-Krishna & Paul J. Wiita.* 529, 189 (2000)

Star Formation Triggering Mechanisms in Dwarf Galaxies: The Far-Ultraviolet, Hα, and H I Morphology of Holmberg II. *Susan G. Stewart,*

Michael N. Fanelli, Gene G. Byrd, Jesse K. Hill, David J. Westpfahl, Kwang-Ping Cheng, Robert W. O'Connell, Morton S. Roberts, Susan G. Neff, Andrew M. Smith, & Theodore P. Stecher. 529, 201 (2000)

Far-Ultraviolet Emission from Elliptical Galaxies at $z = 0.55$. *Thomas M. Brown, Charles W. Bowers, Randy A. Kimble, & Henry C. Ferguson.* 529, L89 (2000)

ULTRAVIOLET: ISM

Multiple Scattering in Clumpy Media. II. Galactic Environments. *Adolf N. Witt & Karl D. Gordon.* 528, 799 (2000)

ORFEUS II Echelle Observations of Molecular Hydrogen in the Galactic Halo. *Kwang Sun Ryu, W. Van Dyke Dixon, Mark Hurwitz, Kwang Il Seon, Kyoung Wook Min, & Jerry Edelstein.* 529, 251 (2000)

Ne v Imaging of the Cygnus Loop. *Andrew H. Szentgyorgyi, John C. Raymond, John J. Hester, & Salvador Curiel.* 529, 279 (2000)

ULTRAVIOLET: SOLAR SYSTEM

Ultraviolet Emission from Oxygen Precipitating into Jovian Aurora. *Weihong Liu & D. R. Schultz.* 530, 500 (2000)

ULTRAVIOLET: STARS

Hercules X-1: Empirical Models of Ultraviolet Emission Lines. *Bram Boroson, Timothy Kallman, Saeqa Dil Vrtilek, John Raymond, Martin Still, Manuel Bautista, & Hannah Quaintrell.* 529, 414 (2000)

B Stars as a Diagnostic of Star Formation at Low and High Redshift. *Duília F. de Mello, Claus Leitherer, & Timothy M. Heckman.* 530, 251 (2000)

Hubble Space Telescope Observations of New Horizontal-Branch Structures in the Globular Cluster ω Centauri. *Noella L. D'Cruz, Robert W. O'Connell, Robert T. Rood, Jonathan H. Whitney, Ben Dorman, Wayne B. Landsman, Robert S. Hill, Theodore P. Stecher, & Ralph C. Bohlin.* 530, 352 (2000)

Coronal Structure and Abundances of Capella from Simultaneous *EUVE* and *ASCA* Spectroscopy. *N. S. Brickhouse, A. K. Dupree, R. J. Edgar, D. A. Liedahl, S. A. Drake, N. E. White, & K. P. Singh.* 530, 387 (2000)

Far-Ultraviolet Absolute Flux of α Virginis. *Carmen Morales, Joaquín Trapero, José F. Gómez, Álavro Giménez, Verónica Orozco, Stuart Bowyer, Jerry Edelstein, Eric Korpela, Michael Lampton, & Jeff Cobb.* 530, 403 (2000)

Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)

WAVES

Absorption and Scattering of Trapped Sound Waves by Nontrapped Sausage and Kink Modes on Slender Magnetic Flux Tubes. *W. J. Tirry.* 528, 493 (2000)

Generation of Electron Suprathermal Tails in the Upper Solar Atmosphere: Implications for Coronal Heating. *Adolfo F. Viñas, Hung K Wong, & Alexander J. Klimas.* 528, 509 (2000)

Magnetoacoustic Waves of Small Amplitude in Optically Thin Quasi-isentropic Plasmas. *Valery M. Nakariakov, César A. Mendoza-Briceño, & Miguel H. Ibáñez S.* 528, 767 (2000)

Winds from Luminous Late-Type Stars. I. The Effects of Nonlinear Alfvén Waves. *V. S. Airapetian, L. Ofman, R. D. Robinson, K. Carpenter, & J. Davila.* 528, 965 (2000)

UVCS WLC Observations of Compressional Waves in the South Polar Coronal Hole. *L. Ofman, M. Romoli, G. Poletto, G. Noci, & J. L. Kohl.* 529, 592 (2000)

X-RAYS: BURSTS

Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)

X-RAYS: GALAXIES

A Rich Cluster of Galaxies near the Quasar B2 1335+28 at z=1.1: Color Distribution and Star Formation Properties. *Ichi Tanaka, Toru Yamada, Alfonso Aragón-Salamanca, Tadayuki Kodama, Takamitsu Miyaji, Kouji Ohta, & Nobuo Arimoto.* 528, 123 (2000)

Constraints on Type Ia Supernova Models from X-Ray Spectra of Galaxy Clusters. *Renato A. Dupke & Raymond E. White III.* 528, 139 (2000)

Variability Pattern and the Spectral Evolution of the BL Lacertae Object PKS 2155−304. *J. Kataoka, T. Takahashi, F. Makino, S. Inoue, G. M. Madejski, M. Tashiro, C. M. Urry, & H. Kubo.* 528, 243 (2000)

Simultaneous *EUVE*/*ASCA*/*RXTE* Observations of NGC 5548. *J. Chiang, C. S. Reynolds, O. M. Blaes, M. A. Nowak, N. Murray, G. Madejski, H. L. Marshall, & P. Magdziarz.* 528, 292 (2000)

On the Nature of Soft X-Ray Weak Quasi-stellar Objects. *W. N. Brandt, A. Laor, & Beverley J. Wills.* 528, 637 (2000)

Evidence for X-Ray Emission from a Large-Scale Filament of Galaxies? *Caleb Scharf, Megan Donahue, G. Mark Voit, Piero Rosati, & Marc Postman.* 528, L73 (2000)

Iron Line Reverberation Mapping with *Constellation-X*. *A. J. Young & C. S. Reynolds.* 529, 101 (2000)

Baryon Distribution in Galaxy Clusters as a Result of Sedimentation of Helium Nuclei. *Bo Qin & Xiang-Ping Wu.* 529, L1 (2000)

Correlation between the Halo Concentration c and the Virial Mass $M_{\rm vir}$ Determined from X-Ray Clusters. *Xiang-Ping Wu & Yan-Jie Xue.* 529, L5 (2000)

Prospects for Detecting Clusters of Galaxies through X-Ray Absorption. *Laurence P. David.* 529, 682 (2000)

Reconstructing the Merger History of the A3266 Galaxy Cluster. *Mark Henriksen, R. Hank Donnelly, & David S. Davis.* 529, 692 (2000)

Constraints on Primordial Non-Gaussianity from the High-Redshift Cluster MS 1054−03. *Jeffrey A. Willick.* 530, 80 (2000)

Detection of Iron Emission Lines from the Galaxy Cluster Including the Radio Galaxy 3C 220.1 at $z = 0.62$. *Naomi Ota, Kazuhisa Mitsuda, Makoto Hattori, & Tatehiro Mihara.* 530, 172 (2000)

X-Ray Emission from Rotating Elliptical Galaxies. *Patricia C. Hanlan & Joel N. Bregman.* 530, 213 (2000)

X-Ray Properties of the Abell 644 Cluster of Galaxies. *Franz Bauer & Craig L. Sarazin.* 530, 222 (2000)

An X-Ray and Optical Study of Matter Distribution in the Galaxy Cluster A2319. *D. Trévese, G. Cirimele, & M. De Simone.* 530, 680 (2000)

X-Ray–emitting Atmospheres of B2 Radio Galaxies. *D. M. Worrall & M. Birkinshaw.* 530, 719 (2000)

The X-ray Emission of the Centaurus A Jet. *G. T. Birk & H. Lesch.* 530, L77 (2000)

X-RAYS: GENERAL

X-Raying the Star Formation History of the Universe. *A. Cavaliere, R. Giacconi, & N. Menci.* 528, L77 (2000)

Limits on the Diffuse Radio and Hard X-Ray Emission of Abell 2199. *Joshua C. Kempner & Craig L. Sarazin.* 530, 282 (2000)

X-RAYS: ISM

The Scattering of X-Rays by Interstellar Dust on the Microarcsecond Scale. *David L. Windt, Webster Cash, & Steven M. Kahn.* 528, 306 (2000)

Nucleosynthesis and Mixing in Cassiopeia A. *John P. Hughes, Cara E. Rakowski, David N. Burrows, & Patrick O. Slane.* 528, L109 (2000)

Ne v Imaging of the Cygnus Loop. *Andrew H. Szentgyorgyi, John C. Raymond, John J. Hester, & Salvador Curiel.* 529, 279 (2000)

X-RAYS: STARS

Changes in the Long-Term Intensity Variations in Cygnus X-2 and LMC X-3. *B. Paul, S. Kitamoto, & F. Makino.* 528, 410 (2000)

ASCA Observations of the Young Rotation-powered Pulsars PSR B1046−58 and PSR B1610−50. *M. J. Pivovaroff, V. M. Kaspi, & E. V. Gotthelf.* 528, 436 (2000)

ASCA Observations of the Quiescent X-Ray Counterpart to SGR 1627−41. *K. Hurley, T. Strohmayer, P. Li, C. Kouveliotou, P. Woods, J. Van Paradijs, T. Murakami, D. Hartmann, I. Smith, M. Ando, A. Yoshida, & M. Sugizaki.* 528, L21 (2000)

Detection of 33.8 Millisecond X-Ray Pulsations in SAX J0635+0533. *G. Cusumano, M. C. Maccarone, L. Nicastro, & B. Sacco.* 528, L25 (2000)

LMC X-2: The First Extragalactic Z Source? *Alan P. Smale & Erik Kuulkers.* 528, 702 (2000)

The Rapid X-Ray Variability of V4641 Sagittarii (SAX J1819.3−2525=XTE J1819−254. *Rudy Wijnands & Michiel van der Klis.* 528, L93 (2000)

Pulse Profiles, Accretion Column Dips, and a Flare in GX 1+4 during a Faint State. *A. B. Giles, D. K. Galloway, J. G. Greenhill, M. C. Storey, & C. A. Wilson.* 529, 447 (2000)

Period Clustering of the Anomalous X-Ray Pulsars and Magnetic Field Decay in Magnetars. *Monica Colpi, Ulrich Geppert, & Dany Page.* 529, L29 (2000)

Cygnus X-2: The Descendant of an Intermediate-Mass X-Ray Binary. *Ph. Podsiadlowski & S. Rappaport.* 529, 946 (2000)

Evidence for Doppler-shifted Iron Emission Lines in Black Hole Candidate 4U 1630−47. *Wei Cui, Wan Chen, & Shuang Nan Zhang.* 529, 952 (2000)

VLBA Imaging of Quiescent Radio Emission from UX Arietis. *Anthony J. Beasley & Manuel Güdel.* 529, 961 (2000)
Analyzing X-Ray Pulsar Profiles: Geometry and Beam Pattern of Hercules X-1. *S. Blum & U. Kraus.* 529, 968 (2000)
Magnetic Field Limitations on Advection-dominated Flows. *G. S. Bisnovatyi-Kogan & R. V. E. Lovelace.* 529, 978 (2000)
Polarization of Thermal X-Rays from Isolated Neutron Stars. *G. G. Pavlov & V. E. Zavlin.* 529, 1011 (2000)
Coronal Structure and Abundances of Capella from Simultaneous *EUVE* and *ASCA* Spectroscopy. *N. S. Brickhouse, A. K. Dupree, R. J. Edgar, D. A. Liedahl, S. A. Drake, N. E. White, & K. P. Singh.* 530, 387 (2000)
The 0.1–100 keV Spectrum of Centaurus X-3: Pulse Phase Spectroscopy of the Cyclotron Line and Magnetic Field Structure. *L. Burderi, T. Di Salvo, N. R. Robba, A. La Barbera, & M. Guainazzi.* 530, 429 (2000)
Ultracompact X-Ray Binaries in Globular Clusters: Variability of the Optical Counterpart of X1832−330 in NGC 6652. *Eric W. Deutsch, Bruce Margon, & Scott F. Anderson.* 530, L21 (2000)
The Evolutionary Status of SS 433. *Andrew R. King, Ronald E. Taam, & Mitchell C. Begelman.* 530, L25 (2000)
The Orbital Period of the Be/Neutron Star Binary RX J0812.4−3114. *Robin H. D. Corbet & Andrew G. Peele.* 530, L33 (2000)
The Neutron Star Census. *S. B. Popov, M. Colpi, A. Treves, R. Turolla, V. M. Lipunov, & M. E. Prokhorov.* 530, 896 (2000)
Correlated Timing and Spectral Variations of the Soft X-Ray Transient Aquila X-1: Evidence for an Atoll Classification. *P. Reig, M. Méndez, M. van der Klis, & E. C. Ford.* 530, 916 (2000)
Rossi X-Ray Timing Explorer Observations of an Outburst of Recurrent X-Ray Nova GS 1354−644. *Mikhail G. Revnivtsev, Konstantin N. Borozdin, William C. Priedhorsky, & Alexey Vikhlinin.* 530, 955 (2000)
First Light Measurements of Capella with the Low-Energy Transmission Grating Spectrometer Aboard the *Chandra X-Ray Observatory*. *A. C. Brinkman, C. J. T. Gunsing, J. S. Kaastra, R. L. J. van der Meer, R. Mewe, F. Paerels, A. J. J. Raasen, J. J. van Rooijen, H. Bräuninger, W. Burkert, V. Burwitz, G. Hartner, P. Predehl, J.-U. Ness, J. H. M. M. Schmitt, J. J. Drake, O. Johnson, M. Juda, V. Kashyap, S. S. Murray, D. Pease, P. Ratzlaff, & B. J. Wargelin.* 530, L111 (2000)
